NAME FUNNEL

Why Are You Renaming?

This is a big change for your company, but why is your existing name not working? It's critical to focus on this as a first step.

1. What are the clear business benefits to renaming?
2. Is there a legal reason to change the name?
3. Do you need to change the name for marketing reasons?
4. What emotional turmoil will this change have – is it worth it?
5. Has your business model changed?

A Good Brand Name

A Great Name makes you SMILE because it is
It must be Memorable

Easily remembered when merged into an existing knowledge base (association)

Names that are associated with images make a strong impression and are hard to forget.

The most powerful names get noticed, get buzz, and get sales because they connect with consumers on an emotional level, making us feel good.

- **Suggestive** — evokes something about your brand
- **Memorable** — makes an association with the familiar
- **Imagery** — aids memory through evocative visuals
- **Legs** — lends itself to a theme for extended mileage
- **Emotional** — moves people

A Bad Brand Name

A bad name, on the other hand, makes you SCRATCH your head because it is
Anytime you have to make excuses for your name, you're apologising for it. And when you apologise for your name, your brand is devalued.

- **Spelling challenged** — looks like a typo
- **Copycat** — resembles competitors' names
- **Restrictive** — limits future growth
- **Annoying** — seems forced, frustrates customers
- **Tame** — feels flat, descriptive, uninspired
- **Curse of knowledge** — speaks only to insiders
- **Hard to pronounce** — confuses and distances customers

Reduction of unwieldy name to shorter

Industry	Category	Real Example Names	Why It's a Great Name	Logic Behind the Name
Hospital	Premium	Mayo Clinic	Authoritative, trusted, and professional; the name evokes high-quality healthcare services.	Named after its founders (Dr. William Worrall Mayo and sons), conveying heritage, family trust, and expertise.
	Family-Friendly	Children's National	Clear and approachable; directly communicates its focus on child and family care.	The name emphasizes care and protection for children, appealing to parents and caregivers.
	Specialist	Cleveland Clinic	Geographically rooted and known for specialty care; communicates credibility and expertise.	Highlights a trusted location (Cleveland) while positioning itself as a center of excellence for specialized care.
Technology	Innovative	Apple	Simple, memorable, and approachable; avoids technical jargon and breaks the norm of tech naming.	Symbolizes simplicity and user-friendliness; inspired by Newton's apple, representing innovation and discovery.
	Consumer-Friendly	Nest	Evokes warmth, security, and comfort, aligning perfectly with its smart home product line.	Represents a safe and comfortable home environment, reinforcing its mission of making homes smarter and cozier.
Food & Beverage	Premium	Godiva	Luxurious and elegant; rooted in European sophistication, ideal for a high-end chocolate brand.	Named after Lady Godiva, symbolizing luxury, indulgence, and an iconic legacy.
	Friendly	Ben & Jerry's	Personal, quirky, and fun; humanizes the brand, making it approachable and relatable.	Named after the founders, adding authenticity and a personal story to the brand.
	Health-Focused	Kind Snacks	Simple, positive, and value-driven; reflects compassion and its focus on health and mindfulness.	The word "Kind" appeals to emotions, highlighting the brand's emphasis on kind-to-you snacks and ethical practices.
Fashion	Luxury	Chanel	Timeless and elegant; represents heritage and exclusivity in high fashion.	Named after founder Gabrielle "Coco" Chanel, emphasizing individuality, elegance, and classic appeal.
	Trendy/Youthful	H&M	Short and modern, appealing to younger demographics with its affordability and style accessibility.	Abbreviates the founders' names (Hennes & Mauritz), making it concise, global, and easily memorable.
	Sustainable	Patagonia	Reflects adventure, sustainability, and outdoor exploration; appeals to eco-conscious consumers.	Named after the Patagonian region in South America, reinforcing its outdoor and environmental values.
Real Estate	Premium	Sotheby's International Realty	Sophisticated and globally recognized; evokes luxury and exclusivity.	Builds on Sotheby's brand heritage in auctions and luxury, reinforcing high-end credibility in real estate.
	Family-Friendly	Lennar	Friendly and modern; suggests homes built for families and communities.	A short and approachable name that's easy to remember and adaptable across markets.
	Commercial	WeWork	Collaborative and modern; reflects flexible workspaces for businesses and professionals.	Combines "We" (community) and "Work" (productivity), emphasizing shared workspaces and collaboration.

Industry	Category	Real Example Names	Why It's a Great Name	Logic Behind the Name
Retail	Affordable	Dollar Tree	Clear and straightforward; directly communicates affordability and value.	Symbolizes a store where everything is affordable, with "Tree" adding a friendly and approachable tone.
	Premium	Nordstrom	A classic name associated with quality, service, and upscale shopping experiences.	Named after the founders, the name emphasizes heritage, luxury, and customer-first principles.
Education	Premium/Elite	Harvard University	Historic and authoritative; synonymous with academic excellence and prestige.	Named after its first benefactor, John Harvard, reinforcing legacy and long-standing academic quality.
	Youthful/Creative	Kumon	Short, unique, and easily memorable; reflects a systemized and creative approach to education.	Named after founder Toru Kumon, emphasizing personal dedication and innovation in teaching methods.
Automotive	Luxury	Rolls-Royce	Heritage-rich and synonymous with ultimate luxury and craftsmanship.	Combines the names of founders Charles Rolls and Henry Royce, emphasizing heritage and engineering precision.
	Mass-Market	Toyota	Short and globally recognizable; reflects reliability and quality across diverse markets.	Named after founder Kiichiro Toyoda, modified to "Toyota" for easier pronunciation and aesthetic appeal globally.
	Electric/Modern	Tesla	Innovative and cutting-edge; reflects sustainability and futuristic thinking.	Inspired by inventor Nikola Tesla, aligning the brand with innovation and groundbreaking technology.
Healthcare	Wellness	Peloton	Unique and energetic; referencing a cycling term that aligns with fitness and community.	A cycling term that signifies teamwork and momentum, connecting to its fitness-oriented ecosystem.
	Pharmaceuticals	Pfizer	Professional and scientific; conveys trust and expertise in medicine.	Named after founders Charles Pfizer and Charles Erhart, emphasizing heritage and trust in pharmaceuticals.
Hospitality	Premium	The Ritz-Carlton	Exudes luxury, service, and exclusivity; ideal for premium travelers.	Named after legendary hotelier Cesar Ritz, known for unparalleled service, paired with Carlton Hotel heritage.
	Affordable	Holiday Inn	Friendly and welcoming; communicates accessibility and comfort for budget-conscious travelers.	Evokes a sense of casual, family-friendly vacations, making it memorable and inviting.
Financial	Banking	Goldman Sachs	Strong, professional, and authoritative; evokes stability and financial expertise.	Named after its founders, the name reflects professionalism and longstanding trust in the finance sector.
	Digital	PayPal	Simple, modern, and user-friendly; suggests ease and friendliness in digital payments.	Combines "Pay" (transactions) and "Pal" (friend), symbolizing a trustworthy and helpful payment companion.

LOGO GUIDE

LOGO CREATION

Ideation > Features > Refinement

Process & Progress

1. It is important to trust the process, a great branding takes time to go through concepts.
2. Designs requires to breathe when each are completed. This means its important to step back and revisit.
3. If visualization is needed, wireframes can be done in early stages. However take in mind the logo is not complete without going through all the process.

LOGO DEVELOPMENT

The process starts with defining the brand's key ideas, such as innovation, focus, and versatility. These ideas are transformed into visual symbols, like a comet for innovation or a compass for direction.

The elements are then combined into a single design, ensuring everything works together harmoniously. Afterward, the design is refined with careful adjustments to proportions, colors, and details, making it adaptable for any application.

Finally, the logo is tested to ensure it performs well across all mediums, from digital platforms to physical materials, delivering both meaning and functionality.

LOGO EXPLORATION

This phase involves refining the logo through adjustments in shapes, angles, and effects. By testing different alignments, layering techniques, and perspectives, the design is enhanced for balance and depth. Simplified versions, such as outlines, are created for versatility in minimalistic applications like embossing or subtle branding. This ensures the logo is polished, adaptable, and ready for diverse uses.

ART STYLE & PERSONALIZATION

DETAILING & DIRECTION

semi abstract

shape

clear visual

CONCEPT DIRECTION

This process explores how a single character can take on different directions while retaining its core identity and positioning. By integrating distinct themes—like professionalism for a corporate look or heroism for a community-focused persona—the character evolves to convey unique meanings. Each direction aligns with the brand's values, ensuring consistency across all variations.

LOGO REFINEMENT

The Process of Logo Refinement: Creating a Unified Visual Identity System

This visual outlines the systematic approach to refining logos, emphasizing precision, consistency, and adaptability

1. Golden Ratio for Balance:

- Proportions are fine-tuned using the golden ratio to achieve harmony and visual appeal across all logo elements.

2. Geometric Grids for Consistency:

- A structured grid system ensures alignment, symmetry, and proportionality, making the logo adaptable for various sizes and applications.

3. Iterative Refinement Process:

- Multiple design iterations allow for continuous improvements, focusing on clarity, scalability, and user feedback integration.

4. Developing a Visual Identity System:

- From the core logo, complementary versions are refined to represent different services or products while maintaining design consistency.

5. Adaptability Across Mediums:

- Ensuring the logo works seamlessly in digital and print formats, from small icons to large displays, without losing impact or clarity.

LOGO SET

During the logo refinement process, various adaptations are created to ensure the logo functions seamlessly across all brand touchpoints. This includes:

- **Primary Logo:** The centrepiece of the visual identity, designed for high visibility on platforms like websites, storefronts, and advertisements.
- **Alternate Shapes and Sizes:** Variants like oval or compact designs are created for applications such as stickers, stamps, or seals, where space is limited but brand recognition is essential.
- **Specialized Applications:** Custom versions tailored for unique uses like embossing, heat branding, or merchandise. These designs ensure consistency even in unconventional formats.
- **Versatility Testing:** Each design is tested across multiple mediums—digital, print, large displays, and small-scale items—to guarantee clarity and adaptability.

BRAND FOUNDATION

NAME

The name, and everything it has to carry

CATEGORY	DESCRIPTION
Brand Name	MyHero
Descriptive Lockup	My Health Record — carries the category so the brand name does not have to
Pronunciation	/maɪ ˈhɪər.oʊ/ — "my hero", two words, no elision
Name Origin	From the parent's own words in clinic — the instinct to be the one who knows, remembers and advocates for their child
Core Meaning	The record that lets a parent be the capable one. Possession first ("my"), promise second ("hero")
Tone & Feel	Warm, plain-spoken, competent. Never heroic in the comic-book sense; never clinical in the institutional sense
Industry Fit	Consumer health records, paediatrics, maternity. Sits beside Flo, Huckleberry and Calm rather than beside Epic or Cerner
Symbolism	Protection, memory, advocacy. The hero is the parent — the app is what they carry
Naming Flexibility	Extends without strain — MyHero Kids · MyHero Bump · MyHero Clinic · MyHero Records
Risk	"My" is a crowded prefix in health apps. Trademark and app-store clearance required before artwork is finalised

NAME FUNNEL

Two hundred and forty candidates, eight gates, one name left standing

WHAT THE FUNNEL IS FOR

A name is not chosen, it is **survived**. Each gate is a question the brand will be asked later — asked now, while changing the answer is still free.

THE THREE THAT KILL MOST NAMES

- Legal** — 60% of the longlist fell here.
- Saying it** — anything needing a spelling correction was cut.
- The store** — the name has to be findable, not just available.

WHERE MYHERO ENTERED

MyHero was written at gate 01 as a throwaway line from a parent interview, and was the only candidate to clear all eight without an amendment. It was not the cleverest name on the longlist. It was the one that kept being true at every gate.

WHY THE NAME

Seven tests, and what the name deliberately avoids

TEST	WHY IT WORKS
Intelligence by association	"Hero" is understood in every language and age group without translation
Strategic nature	Names the relationship, not the mechanism. Survives the product becoming AI-assisted, or ceasing to be
Structural sound	Two syllables plus two, both open-vowel. Easy across English and Malay without distortion
Regional adoption	Reads cleanly in Malaysia and carries no unintended meaning in Malay, Mandarin or Tamil
Ownable	Unlike Health Record, MediFile or CareTrack, the emotional half of the name is defensible
Extendable	Supports sub-brands without dilution: MyHero Kids, Bump, Clinic
Ambition ready	Reads at the scale of a national consumer health brand, not one clinic's internal tool

IN ONE SENTENCE

The name positions the brand not as a product, but as **a role the parent already plays**.

IT MAKES ROOM FOR

- A record that is theirs, not the clinic's
- A tone that reassures instead of instructing
- A future beyond one clinic

WHAT IT AVOIDS

Any reference to artificial intelligence, any clinical Latin, any word that dates the product to a technology cycle, and any construction that sounds like a government service.

EXTENDING THE NAME

How far the name travels before it stops being one brand

MyHero Kids

PAEDIATRIC RECORD · 0-12

MyHero Bump

PREGNANCY TIMELINE

MyHero Clinic

DESK-SIDE STAFF VIEW

MyHero Records

EXPORT & PORTABILITY

RULE	ALWAYS	NEVER
Order	MyHero leads, descriptor follows	"Kids by MyHero", "The MyHero Kids App"
Descriptor	One word, sentence case, plain English	Compound descriptors, invented words, initials
Weight	Descriptor at 600 in Sky, master at 800 in Ink	Descriptor set at the same weight as MyHero
Spacing	One space, aligned baselines	Hyphens, camel case, stacked descriptors
Mark	One master mark across every sub-brand	A bespoke mark or colour per sub-brand
Legal	Each descriptor cleared before public use	Assuming the master registration covers it

THE RULE BEHIND THE RULES

A sub-brand is **a room in the house**, not a second house. If a descriptor still makes sense with a competitor's name in front of it, it is a feature label.

WHERE IT BREAKS

MyHero AI — names the mechanism and dates the product.

MyHero Pro — implies the free tier is the lesser record.

MyHero Malaysia — geography is not a product.

LIGHT BRAND POSITIONING

Where MyHero stands, and what it refuses to be

ELEMENT	DESCRIPTION
Archetype	The Caregiver, with a Sage undertone — competent and reassuring, never rescuing or dramatic
Category	Consumer health records for families, delivered through the clinic that creates the record
Core Offering	One trusted place where every visit, result and milestone is kept, explained in plain language, and carried forward
Target Audience	Primary: parents of young children, 28–40 · Secondary: expectant mothers · Tertiary: clinic staff at the desk
Brand Tone	Warm authority — the doctor who sits down before speaking. Professional first, cheerful second
Position Range	Premium-accessible. Trusted like a clinic, easy like a consumer app. Not free-and-ad-supported, not enterprise
Brand Promise	You will never walk into an appointment unsure of where you stand
Differentiation	Clinic-sourced rather than self-reported; plain-language rather than raw values; family-structured rather than single-user
Emotional Benefit	Preparedness. The relief of being the parent who remembers
Technology Enabler	AI-assisted record keeping, positioned strictly as background support — never named in the promise

SERVICES

What the brand actually delivers, module by module

MODULE	DESCRIPTION	USE CASE	KEY BENEFIT
Family Health Record	Every visit, result, prescription and immunisation for each family member, written by the clinic that performed it	Parents managing care for more than one person	Nothing to file, nothing to lose
Plain-Language Results	Every result carries a one-line answer in human words, with raw values underneath rather than above	Results received between appointments	Closes the wait-and-worry gap
Appointments	The next date is always visible, with reminders timed to the care plan rather than a generic calendar	Families juggling paediatric and maternity schedules	Fewer missed appointments
MyHero Kids	Immunisation schedule, growth tracking and childhood milestones held per child	Children aged 0–12 in care at the clinic	One timeline per child
MyHero Bump	Pregnancy timeline covering scans, measurements and week-by-week milestones	Expectant mothers at the clinic	No second app needed
MyHero Clinic	Desk-side view for nurses and front-desk staff — denser, faster and tabular	Clinic operations	The record is created once

BRAND ARCHITECTURE 01

Holding brand portfolio — where MyHero sits

PARENT

Elite Care Clinic

The clinic that creates the record. Owns the clinical relationship and the trust that makes the record credible.

PRODUCT BRAND

MyHero

The record itself, carried by the family. Branded independently so it can outlive any single clinic.

ENDORSEMENT

MyHero, by Elite Care

Used on signage, letterhead and referral material where clinical provenance must be explicit.

THE DECISION THIS PAGE ASKS FOR

A **branded house** would make MyHero read as clinic software. A **house of brands** would lose the provenance that makes the record trustworthy. The recommendation is an **endorsed brand** — MyHero leads, Elite Care endorses where credibility must be shown.

BRAND ARCHITECTURE 02

Internal modules and components

CORE

MyHero Records

Visits, results, prescriptions, immunisations

CHILD

MyHero Kids

Immunisation schedule, growth, milestones

MATERNITY

MyHero Bump

Scans, measurements, week-by-week

CLINIC SIDE

MyHero Clinic

Desk view, denser and tabular

NAMING RULE

Modules take the master name plus one plain English word. **No sub-module invents its own name**, and no module is named for a technology.

VISUAL RULE

Every module shares one mark and one palette. Modules are distinguished by **a single accent and an icon**, never by a separate logo.

BRAND ARCHITECTURE 03

Brand hierarchy — how a parent meets the brand

TIER 1 · ENDORSER

Elite Care Clinic — met first, in person, at the desk

TIER 2 · MASTER BRAND

MyHero — the app, the record, the thing carried home

TIER 3 · MODULES

Kids · Bump · Clinic — met only once inside the product

TAGLINE TEST

Six candidates against the promise the positioning already made

#	TAGLINE	WHAT IT CLAIMS	VERDICT
1	Your family's health, remembered	Memory and possession, in the parent's own frame	Recommended
2	Never walk in unsure	States the promise directly, from the positioning	Strong second
3	One record. Every visit.	Functional and plain; says what it is	Descriptive
4	The record that remembers	Elegant, but repeats the name's own idea	Redundant
5	Be the hero they need	Puts the burden on the parent	Rejected
6	Health, simplified	Category boilerplate; true of any competitor	Rejected

WHY ONE WINS

"Your family's health, remembered" is the only line that is true of the product, flattering to the parent and impossible for a self-reported competitor to claim. It also survives translation, which lines 2 and 3 do not.

CLOSEST COMPETITORS

Who the parent is actually choosing between

BRAND	CATEGORY	WHAT IT DOES WELL	WHERE MYHERO WINS
The paper book	Incumbent	Trusted, given at the clinic, needs no account	Cannot be lost, searched or shared with a second clinician
Flo	Femtech	Warm, habit-forming, beautifully built	Self-reported; MyHero's record comes from the clinic
Huckleberry	Child tracking	Genuinely useful daily utility for parents	Tracks behaviour, not clinical history
MySejahtera	Government	Universal reach, official records	Reads as compliance, not care; no family structure
Clinic portals	Enterprise	Authoritative and complete	Built for the clinic, not the parent; unusable on a phone

THE REAL COMPETITOR

Not another app — **the paper booklet in the kitchen drawer**. Every design decision is measured against it.

THE GAP ON THE BOARD

Nobody occupies **clinic-sourced and parent-owned** at once. That is the position, and it is empty.

COMPETITOR LOGOS

The visual language of the shelf MyHero has to stand on

Paper Book

Flo

Huckleberry

MySejahtera

Clinic Portal

Calm

BRAND	MARK TYPE	WHAT THE MARK SIGNALS	READ-ACROSS FOR MYHERO
Paper Book	No mark — a ministry crest	Officialdom, permanence, obligation	Borrow the permanence, drop the officialdom
Flo	Abstract droplet in a disc	Soft, feminine, self-directed	Warm is available — but not at the cost of clinical credibility
Huckleberry	Illustrative, hand-drawn	Playful, domestic, child-first	The nearest tonal neighbour, and the one easiest to be mistaken for
MySejahtera	Wordmark + tick in a disc	Compliance, clearance, the state	Ticks and discs read as government here — avoid both together
Clinic Portal	Literal document glyph	Records, systems, staff	The category default; being legible against it is the whole job
Calm	Gradient disc, no metaphor	Premium consumer wellbeing	Where the craft bar sits, not where the meaning sits

WHAT THE SHELF IS MISSING

Every mark is either **institutional** or **illustrative**. Nothing is warm and credible at once — exactly the gap the positioning claims.

CONSTRAINTS THIS SETS

- No green cross, no green disc — MySejahtera owns that read.
- No hand-drawn line: it undercuts clinic-sourced.
- No gradient-only abstraction.
- Must survive at 22px beside a ministry crest.

STYLEScape

40

TERRITORIES

Two directions, developed in full — not a spectrum, a choice

TERRITORY 01

Playful Guardian

The Duolingo model. A character, a path, chunky pressable surfaces and a reason to open the app between visits. The record becomes a place you are inside.

WHAT IT BUYS

Recall no health app in this market has. A parent recognises the tile on a home screen without reading a word, and the immunisation schedule finally has a shape.

WHAT IT COSTS

A character is permanent: an illustration library, a motion set and a voice maintained for as long as the product exists. It also reopens the mascot question kickstart closed.

TERRITORY 02

Pro and Cheerful

The positioning, drawn. Professional first, cheerful second — exactly the words already agreed. Clinical credibility carried in the structure, warmth carried in the detail.

WHAT IT BUYS

Immediate credibility with clinicians, who have to recommend this at the desk. Cheaper to build, faster to clear at trademark, and impossible to date.

WHAT IT COSTS

Distinctiveness. Put the mascot away and this territory has to earn attention through craft alone — there is no shortcut to recall.

HOW TO READ THE NEXT TWO PAGES

Each territory is built across the same five columns — **colour, art direction, type, product and environment** — so they can be judged like for like. They are alternatives. Blending them produces a mascot with nothing to do.

TERRITORY 01 · PLAYFUL GUARDIAN

The Duolingo model, carried on MyHero sky rather than borrowed green

COLOUR + TEXTURE

TERRITORY 01

Playful Guardian

Chunky, pressable, character-led. Every surface repeats the same four states until the product is recognisable from a tile.

WARM · CHUNKY · ENCOURAGING

HERO + ART DIRECTION

FONT + BRANDING

APP + ICON

ENVIRONMENT

COLOUR

MyHero sky leads. **Flame is spent only on a streak**, mint on an all-clear. Duolingo's green is not borrowed — in a clinic, green already means result normal.

TYPE & SHAPE

Heavy rounded display, 15px radii and a **5px pressable underside** on every button and node. Clinical data is exempt and stays plain.

CHARACTER

Hero, an elephant — because an elephant never forgets, and MyHero is the record that remembers. Not an owl, not a person, no cape.

TERRITORY 02 · PRO AND CHEERFUL

The agreed positioning drawn straight — professional first, cheerful second

COLOUR + TEXTURE

TERRITORY 02

Pro and Cheerful

Light ground, generous white, sky carrying the system. Blush kept for milestones only. Reads as a clinic that likes you.

CLEAR · CAPABLE · CALM

HERO + ART DIRECTION

PARENT + CHILD, DAYLIGHT

Your family's health, remembered

FONT + BRANDING

Aa

 MyHero

APP + ICON

NEXT VISIT

Wed 3 Sept

ENVIRONMENT

CONSULT ROOM, SOFT DAYLIGHT

COLOUR

The same sky, used quietly. **Blush appears only on a milestone**; it never carries a warning, a result or a system state.

TYPE & SHAPE

Geometric sans at medium weight, 8–12px radii, hairline rules. Nothing is pressable-looking that is not a control.

MARK

Shield, cross, record card — **geometry, no character**. Survives embroidery, one-colour print and a laminated badge without redrawing.

WWW.BRANDMETHOD.CO

MYHERO · BRAND CREATION BOOK 43

CHOSEN TERRITORY

The decision this document asks the client to make

RECOMMENDATION

Territory 02 Pro and Cheerful

It is the positioning already agreed, drawn without translation: **professional first, cheerful second**. It earns the clinician's endorsement at the desk, which is where every record actually begins, and it carries no permanent commitment the clinic has not yet agreed to fund.

It is also the safer answer to the one question that decides this brand: **would this still feel right to a parent whose child is seriously ill?**

IF THE CLIENT CHOOSES TERRITORY 01

Take it **whole**. The character, the path, the states and the tone are one system; adopting the look without the mechanics produces a mascot with nothing to do, and adopting the mechanics without the character produces a game nobody is playing.

WHAT TRAVELS EITHER WAY

The name, the descriptive lockup, the sky palette and the plain-language rule for clinical surfaces are **territory-independent** and are already settled.

BLOCKING

Nothing downstream — refinement, variants, colour, typography — can be finalised until one territory is selected. Both are carried through logo ideation on the following pages precisely so this choice can be made on evidence rather than description.

LOGO IDEATION

CONCEPT / ELEMENT

The vocabulary each territory may build from — and what stays out of both

#	ELEMENT	TERRITORY	MEANING	ALIGNMENT
1	Character head	T1	A companion who remembers	In the Duolingo model the character <i>is</i> the logo — the whole territory depends on it
2	Shield	T2	Protection without militarism	Credible and parental; the most immediately medical container
3	Squircle tile	Both	The app, the one place	Native to the phone; the container every other element sits inside
4	Cross	T2	Care, clinic, treatment	Unmistakable category cue; risks looking generic on its own
5	Record card	T2	The file itself	Most on-strategy — the record is the product
6	Path node	T1	A step on the schedule	The immunisation schedule already is a path; the mark and the node can be one shape
7	Pulse line	Both	A life being tracked	Proves the record is live and current, not an archive
8	Heart	Both	Care, family	Geometric only. Allowed as care — never as a life or a limit
9	Letter M	Both	MyHero monogram	Ownable but silent on category; the fallback if no character is carried
10	Human figure	—	Parent, child, clinician	Excluded — a human mascot ages, and has a race and a gender
11	Cape	—	Superhero	Excluded by kickstart decision, in both territories

COMBINATION RULE

One container plus one cue — and in Territory 01 the character replaces both. Elements 2, 3 and 5 are containers; 4, 6, 7 and 8 are cues. Two cues inside one container reads as clip art.

COMBO / BUILD

Container and cue, and what each combination would mean

#	COMBO	TERR.	COMBINATION	WHY IT COULD WORK
1	Hero	T1	Character + squircle	The full Duolingo model. Strongest recall, strongest app icon, largest build cost
2	Badge Node	T1	Shield + tick, as a node	The mark and a completed step on the schedule are the same shape — and it needs no character
3	Guardian	T2	Shield + cross	Most credible to a clinician; strongest at 16px; safest first impression
4	The Kept Record	T2	Record card + heart	Most on-strategy; blush earns a place inside the mark
5	Vital Shield	T2	Shield + pulse	Keeps the shield's authority but proves the record is live, not archived
6	Monogram Tile	Both	Letter M + squircle	Cleanest app icon of the set; almost silent about health without the wordmark
7	Pulse Heart	T2	Heart + pulse	Warmest route; also the most used pairing in the category, so a trademark risk
8	Heart Shield	T2	Shield + heart	Sentimental; drifts toward charity or insurance

CARRIED FORWARD

Rows 1–2 are drawn out for Territory 01 and rows 3–4 for Territory 02 on the next four pages. Everything else is documented so the client can see what was considered and why it was set aside.

SKETCH / SHAPE T1 · 01

Territory 01 — Hero, the character mark

SOFT-SQUARE HEAD, EARS OUT

ROUND HEAD, SMALL EARS

HEAD INSIDE THE TILE

BADGE NODE · SHIELD + TICK

CONCEPT	ELEMENT MATCH	ALIGNMENT
Soft-square head, ears out	Character head	The base drawing. Wide ears give a silhouette that survives at 20px where the eyes have gone
Round head, small ears	Character head	Friendlier and younger, but the silhouette collapses into a generic circle at small sizes
Head inside the tile	Character + squircle	The app icon in final form — the character is cropped by the tile rather than floating in it
Badge Node	Shield + tick	The only Territory 01 route that needs no character and still prints in one colour

SKETCH / SHAPE T1 · 02

Territory 01 — the mark as a step on the path

NODE WITH UNDERSIDE

MONOGRAM TILE

SHIELD WITH A CROSS

COMPLETION STATE

CONCEPT	ELEMENT MATCH	ALIGNMENT
Node with underside	Path node + tick	Mark and completed step are literally the same shape — every finished dose is a small appearance of the brand
Monogram tile	Letter M + squircle	The version of this territory that carries no mascot commitment at all
Shield with a cross	Shield + cross	Territory 02's mark restated in the heavier rounded language — the bridge between the two
Completion state	Badge + celebration	An animation frame for the moment a vaccination is recorded, not a static mark

SKETCH / SHAPE T1 · 03

Territory 01 — the letter M, for when no character is wanted

CHEVRON M

M INSIDE THE TILE

TWIN-PEAK M

M OVER A PULSE

CONCEPT	ELEMENT MATCH	ALIGNMENT
Chevron M	Letter M	The cleanest escape hatch from the mascot — still reads as forward motion rather than a letter alone
M inside the tile	Letter M + squircle	App-icon ready, but the M is doing no work the wordmark is not already doing
Twin-peak M	Letter M	Two peaks read as two people — parent and child. Fragile at small sizes
M over a pulse	Letter M + pulse	Adds the health cue back, at the cost of a busier silhouette

SKETCH / SHAPE T1 · 04

Territory 01 — the container, tested four ways

CONTAINER	READS AS	ALIGNMENT
Disc	Consumer app, wellbeing	Friendliest, and the most crowded — sits beside Calm and MySejahtera at once
Squirrel	Software, system, platform	The native shape of the icon grid; the container disappears and the cue does the talking
Soft badge	Protection, credential	Carries the Territory 02 meaning in the Territory 01 drawing language
Capsule	Label, tag, status	Works as a UI chip, fails as an app icon — the aspect ratio cannot crop square

SKETCH / SHAPE T2 · 01

Territory 02 — Guardian, shield + cross

ROUNDED SHIELD, EQUAL CROSS

DEEPER SHOULDER, TALLER BASE

OPEN LEFT EDGE

SHIELD HOLDING A PULSE

CONCEPT	ELEMENT MATCH	ALIGNMENT
Rounded shield, equal cross	Shield + cross	Protection and medical safety; the most literal answer to the brief
Deeper shoulder, taller base	Shield + cross	More protective, slightly defensive — reads closer to insurance than to care
Open left edge	Enclosure + cross	Protection that is not closed off; suggests a record you can open
Shield holding a pulse	Shield + pulse	Adds proof of life to the container; strongest second reading of the four

SKETCH / SHAPE T2 · 02

Territory 02 — The Kept Record, card + heart

CARD WITH SOLID HEART

SPINE-LEFT, TAB FORMAT

CARD HOLDING A PULSE

HEART HOLDING A PULSE

CONCEPT	ELEMENT MATCH	ALIGNMENT
Card with solid heart	Record card + heart	The file itself is the object of care; blush earns a home inside the mark
Spine-left, tab format	Bookmark + heart	Reads as a kept booklet rather than a database — closest to the paper book it replaces
Card holding a pulse	Record card + pulse	Clearest statement that the record is current; least sentimental of the four
Heart holding a pulse	Heart + pulse	Warmest route, and close enough to existing femtech marks to be a trademark risk

SKETCH / SHAPE T2 · 03

Territory 02 — the cross, abstracted away from the clinic

CROSS IN A SQUIRCLE

SOLID QUADRANT CROSS

ROUNDED TERMINALS

CROSS IN A DISC

CONCEPT	ELEMENT MATCH	ALIGNMENT
Cross in a squircle	Cross + squircle	Health without the shield’s defensiveness; the most app-native of the four
Solid quadrant cross	Cross	Strong at any size, but the four quadrants read as pharmacy signage
Rounded terminals	Cross	Warmest cross available — and the closest to a first-aid mark, which is a legal risk in some markets
Cross in a disc	Cross + disc + rays	Reads as government clearance. Ruled out on the competitor board for exactly that reason

SKETCH / SHAPE T2 · 04

Territory 02 — type-led, where the name carries the mark

CONCEPT	ELEMENT MATCH	ALIGNMENT
Lowercase, tight	Wordmark	Consumer-tech default. Warm, but gives up the clinical half of the positioning
Uppercase, tracked	Wordmark	Institutional and calm; loses the possessive read of “my”
Weight split	Wordmark	Says the two halves of the name out loud — possession, then promise. Survives without any mark at all
Cross as the join	Wordmark + cross	Puts the category cue between the two halves of the name. Legible, but the cross competes with the wordmark rather than serving it

2ND STAGE

56

REFINE, COMBINE, OR EVOLVE 01

Territory 01 — the character narrowed to two survivors

HERO • CHARACTER MARK

Refined: ears widened for silhouette, trunk simplified above 44px, eyes fixed as two solid circles so the expression set stays buildable.

BADGE NODE • SHIELD + TICK

Refined: tick drawn heavier than looks correct at full size so it survives 16px, shoulder softened to keep it out of security-badge territory.

WHAT CHANGED AND WHY

Two of the four Territory 01 routes were dropped. **The round head** lost its silhouette below 32px, and **the completion state** is an animation frame, not a mark. What remains is one route that needs a character and one that does not — which is the real question inside this territory.

REFINE, COMBINE, OR EVOLVE 02

Territory 02 — the container and the cue, resolved

VITAL SHIELD · SHIELD + PULSE

Refined: cross replaced by a single pulse stroke, optically centred rather than mathematically centred so it does not sit low inside the shield.

THE KEPT RECORD · CARD + PULSE

Refined: header bar retained — it is what makes the rectangle read as a record rather than a generic app tile. Heart swapped for a pulse to lose the sentiment.

WHAT CHANGED AND WHY

Both survivors converged on the same cue. **The pulse outperformed both the cross and the heart:** the cross is generic across the category, the outlined heart fails below 32px, and only the pulse says the record is current rather than archived.

REFINE, COMBINE, OR EVOLVE 03

Territory 01 — construction, weight and the small-size correction

ON THE GRID

Shoulders set on the 26px circle, base apex on the vertical axis. The tick sits on the 45° diagonals so it never looks hand-placed.

WEIGHT CORRECTED

Stroke lifted from 2.8 to 3.6 at display size. Anything lighter turns grey when the mark is printed on a clinic sticker.

ACROSS THE SIZE BAND

76px, 42px and 22px. Stroke thickens as the mark shrinks; the tick shortens by two units at 22px so the counters stay open.

WHAT CHANGED AND WHY

The character route was set aside at this pass, not killed — it survives as an **illustration system** rather than as the mark. A character cannot be redrawn by a nurse in a spreadsheet, cannot be embroidered, and cannot be trusted to a third-party clinic. The Badge Node can.

REFINE, COMBINE, OR EVOLVE 04

Territory 02 — construction, weight and the small-size correction

ON THE GRID

Card set to a 44×40 field on a 9px radius. The header rule lands on the inner circle so the proportion holds when the corners are re-cut.

WEIGHT CORRECTED

Pulse drawn one step heavier than the container. If both carry the same weight, the pulse disappears into the card at thumbnail size.

ACROSS THE SIZE BAND

76px, 42px and 22px. Below 30px the pulse drops from five strokes to three — the shape of the beat matters, the detail does not.

WHAT CHANGED AND WHY

The Vital Shield and The Kept Record were run through the same construction. **The shield failed the 22px test:** its taper closes the pulse into a grey mass. The card holds because its container is orthogonal, and orthogonal shapes survive pixel-snapping.

REFINE, COMBINE, OR EVOLVE 05

Territory 01 — colour, reversal and the one-colour fallback

POSITIVE · SKY

The default. Sky on white carries the warmth without asking the mark to hold a gradient it cannot print.

REVERSED · DEEP

Reversed at the same weight. White on Deep gains apparent thickness, so no compensation is applied — the eye does it.

ONE COLOUR · INK

The fallback that has to work: fax, stamp, embroidery, engraved plate, and the ministry form that accepts black only.

WHAT CHANGED AND WHY

Colour is applied last, and only to confirm the mark does not **depend** on it. A mark that needs Sky to be legible is a mark that will fail the first time it meets a photocopier in a clinic corridor.

REFINE, COMBINE, OR EVOLVE 06

Territory 02 — colour, reversal and the one-colour fallback

POSITIVE · HARBOUR

Harbour rather than Sky. The card carries more enclosed area, and Sky at that mass tips the mark from calm to bright.

REVERSED · DEEP

The header rule is the first thing lost when reversed. It is held at full weight rather than reduced, or the card stops reading as a record.

ONE COLOUR · INK

Prints clean at 8mm on uncoated stock — the size it will actually appear at on an appointment card.

WHAT CHANGED AND WHY

Both territories now hold a mark that is **complete without colour, without the wordmark and without scale**. That is the bar the 3rd Stage starts from — everything after this is polish, not rescue.

VARIANTS

The four survivors, built out identically so they can be judged like for like

 **MyHero**

T1 · HERO

 **MyHero**

T1 · BADGE NODE

 **MyHero**

T2 · VITAL SHIELD

 **MyHero**

T2 · KEPT RECORD

HOW TO JUDGE THESE

Compare **down the columns, not across the rows**. Every route holds at full size; the bottom row — 40, 28 and 20px — is where two of these four fail, and that failure matters more than which looks best on this page.

3RD STAGE

POLISH

Optical correction, construction and the size bands

CONSTRUCTION

The shoulder sits on the 14 line and the base on 50; the cue is **optically centred, one unit above mathematical centre**, or it reads low inside the container.

SIZE BANDS – ONE DRAWING PER BAND, NOT ONE VECTOR SCALED

96

64

44

28

16px

Stroke thickens as the mark shrinks. Below 28px the cue is dropped entirely — **a single vector used everywhere looks wrong at both ends.**

FINAL MARK

Two candidates, one per territory — pending the decision on the Chosen Territory page

TERRITORY 01 · HERO

A companion who remembers for you. **Strongest recall and the best app icon in the book** — and a permanent illustration, motion and voice commitment.

TERRITORY 02 · VITAL SHIELD

A life under protection, and a record that is live rather than archived. **Credible to a clinician at first glance**, and it survives one-colour print.

PROVISIONAL

Both marks are drawn to the same standard so the territory decision can be made on finished artwork rather than a sketch. **Only one will be built out.**

WHY THE MARK

What each candidate claims, and what it costs

MARK	TERR.	WHAT IT SAYS	STRENGTH	COST
Hero	T1	A companion who remembers for you. The elephant never forgets — one line the client can repeat	Recall no competitor has; the best app icon in the document	Permanent illustration, motion and voice commitment
Vital Shield	T2	A life under protection, and a record that is live rather than archived	Credible to a clinician at first glance; survives one-colour print	Quieter; must earn attention through craft
Badge Node	T1	Protection that has been earned rather than claimed	Mark and completed step are one shape	Silent about family without the wordmark
Kept Record	T2	The file itself is the object of care	Most on-strategy — the record is the product	Weakest silhouette of the four

THE TEST BOTH MUST PASS

Would this still feel right to **a parent whose child is seriously ill**? A shield passes. A cheerful character passes only if it never celebrates a diagnosis — which is a rule, not a drawing.

CLEARANCE

Both require a trademark search in the relevant classes plus an app-store name search.
Territory 01 needs the character cleared separately — a mascot is its own asset and needs its own protection.

LOCKUPS

How the mark and the name sit together, and the space they need

PRIMARY HORIZONTAL LOCKUP • TERRITORY 02 SHOWN

CLEAR SPACE

Clear space equals the cap-height of the **M** on every side. Nothing sets inside it.

RULES

- ✓ Lead with the horizontal lockup wherever width allows
- ✗ Never re-space, re-weight or re-colour the wordmark
- ✗ Never place the mark on a busy photograph
- ✗ Never use the descriptive lockup inside the product

ENDORSEMENT

Required on signage, letterhead and referral material. Nowhere else.

COLOUR & SHAPE TEST

The mark under every condition it will actually meet

FULL COLOUR

REVERSED ON INK

KNOCKOUT ON SKY

ONE COLOUR · PRINT

GREYSCALE 50%

BLUSH · MILESTONES ONLY

TILED · SCREEN ONLY

16PX · SILHOUETTE

THE RULE THIS PAGE PROVES

The pressable underside is **screen-only**. On print, embroidery or signage the mark is flat, one colour and shadowless — and the blush treatment exists for milestones alone, never for a warning, a result or a system state.

COLOUR PSYCHOLOGY

What each hue does to a parent before they have read anything

Sky
Trust

Harbour
Competence

Ink
Fact

Mint
All clear

Blush
Milestone

Amber
Soon

Flame
Momentum

Signal
Urgent

HUE FAMILY	WHAT IT TRIGGERS IN A HEALTH SETTING	DECISION FOR MYHERO
Blue	Lowered heart rate, competence, cleanliness. The most used hue in healthcare — the evidence and the problem at once	Taken as the core , pulled toward daylight rather than navy so it reads calm rather than institutional
Green	Recovery, growth — and inside a clinic, a normal result	Refused as a brand colour. Held back as Mint, which only ever means resolved
Pink	Care, softness, maternity. Also the fastest way to gender a product	Rationed. Blush appears on milestones only, never on structure, never on a whole screen
Orange / Amber	Urgency without threat. Reads as a countdown rather than a warning	Territory-scoped. Amber for timing, Flame for streaks — Territory 01 only
Red	Stop. In a clinical context it is read as a result, not as decoration	Reserved. Signal exists to be rare; using it for a badge would make it stop working
Yellow & Purple	Yellow is illegible at body size; purple is currently owned by femtech	Neither adopted. Amber covers the useful half of yellow, and purple would put MyHero on the wrong shelf

THE GOVERNING RULE

Colour here is not decoration — it is **a claim about a result**. A parent reads the colour of a screen before the words, and is right to.

TESTED AGAINST

Deuteranopia and protanopia simulations for the Mint / Signal pair, and a greyscale pass on every state colour. Where two states match in greyscale, an icon carries the difference — not the hue.

Every hue that already means something in a clinic is held back as a state colour. The brand keeps only what means nothing clinically: blue, and a rationed pink.

CONTRAST FLOOR

Sky on white is 3.1:1 — enough for a large control, **not for body text**. Clinical copy is always Ink.

TERRITORY SPLIT

Flame and Amber belong to Territory 01 alone. Territory 02 runs on the core four plus Blush.

THE REFUSAL

No green as a brand colour. In a clinic **green already means result normal**.

COLOUR DETAIL

The ramps, the ratios and the pairs that are allowed to touch

Hero Sky

Harbour

Blush

Mint

USAGE RATIO

70 ground · 18 ink · 9 sky · 3 accent. Past 9% Sky, a screen has stopped being calm.

ALLOWED TEXT PAIRS

- Ink on Cloud — 15.2:1 · body copy
- Ink on white — 17.4:1 · clinical data
- White on Harbour — 8.9:1 · headings
- White on Sky — 3.0:1 · large control labels only
- Sky on white — 3.1:1 · never body copy

RAMP RULES

Steps 100–300 are grounds and fills. 400–600 are the only steps a mark or control may use. 700–1000 carry text on light.

A tint is never made at run time by lowering opacity.

COLOUR IN CONTEXT

The palette doing its job across the three places it actually appears

IN PRODUCT · THE HOME SCREEN

IN HAND · THE APPOINTMENT CARD

ON THE WALL · CLINIC SIGNAGE

SKY IS A VERB

In product, Sky appears only where something can be **tapped or is currently true**. It is never a background for reading.

PRINT INVERTS THE RATIO

On paper the ground is white and Sky is reduced to a 7px rule. Ink carries everything else, because print has no states to signal.

SIGNAGE RUNS ON DEEP

At three metres, white on Deep out-reads every other pair in the system — and it is the only place the palette is allowed to go dark.

WHY THE COLOUR

Where the palette comes from, and what it is not allowed to do

COLOUR	WHERE IT COMES FROM	WHAT IT MAY NEVER DO
Hero Sky	Daylight through a consult-room window — the calmest thing in a clinic, and the opposite of institutional green or corporate navy	Carry body text, or appear on a page reporting an abnormal result
Harbour	The deeper end of the same hue — authority without turning to navy, which reads as insurance	Become the primary. It supports; it does not lead
Blush	The one warm note, borrowed from the maternity side of the clinic	Carry a warning, a result or a system state — that is what amber and signal are for
Mint	Chosen so "all clear" is legible to the most common forms of colour blindness alongside signal red	Be used decoratively. Mint always means something is complete or normal
Signal	Reserved, not designed — it exists to be rare	Appear on anything about points, streaks, badges or progress

ONE SENTENCE

The palette is built so a parent can tell **what kind of news a screen carries before reading a word** — and so no piece of good news is ever coloured like bad news.

You will never walk into an
appointment **unsure of where
you stand.**

ROLE	SIZE / WEIGHT	WHERE
Display XL	40 / 800 · -3%	Section openers, signage
Display	28 / 800 · -2.5%	Screen titles
Heading	20 / 700 · -2%	Card titles, result names
Subhead	16 / 600	Table leads, inline labels
Body	15 / 400 · 1.55	Every piece of reading copy
Data	14 / 500 mono	Values, dosages, identifiers
Eyebrow	10 / 600 mono · +16%	States, section labels

THREE HARD RULES

- Body never drops below 15px.** A parent reads this one-handed, at night, in a corridor.
- Display never carries a number a clinician acts on.** Dosages and values are mono, always.
- No third face.** A new voice means a new weight, not a new typeface.

NEXT STEPS

What closes this book at v1.0

#	STEP	DETAIL	OWNER	STATUS
1	Choose a territory	Territory 01 or 02. They are alternatives, not layers — nothing downstream can begin until this lands	Dr Amira	Blocking
2	Answer the character question	Only if Territory 01 is chosen. A character is a permanent illustration, motion and voice commitment	Dr Amira	Blocking
3	Trademark & store clearance	Search MyHero in the relevant classes and in app-store results; clear the character separately if carried	Client / legal	Not started
4	Build the chosen mark	Optical correction, construction grid, full variant set and the complete file package	Brand Method	Awaiting step 1
5	Build the UI kit	Components, states and screen templates for the parent app and the clinic-side view	Brand Method	Phase 2
6	Test with parents	Six to eight parents at Elite Care, including at least two with a child under ongoing treatment	Joint	Phase 2
7	Issue guidelines v1.0	This book completed, provisional marks replaced and every pending tag cleared	Brand Method	Phase 2

OPEN QUESTION 01

Does **My Health Record** appear inside the lockup, or only in the app store listing and clinical settings?

OPEN QUESTION 02

Is the **endorsement lockup** with Elite Care required for signage, letterhead and referral material?

OPEN QUESTION 03

Does the record serve **children only, or the whole family**? A path built on the childhood schedule does not extend to an adult without rework.

PLACEHOLDER NOTICE

Every mark in this book is **provisional**. Photography is indicated rather than shot, and the clinic address is pending confirmation.
