

BRAND BOOK

The core manual that defines how Agensia operates, looks and communicates. It unites strategy, identity and design into one clear system, so every message, visual and experience stays consistent across all touchpoints.

ENTERPRISE AUTOMATION

INTELLIGENT SIMPLICITY

BRAND OS V3.0

INTRODUCTION

This is the Agensia Brand Book. It defines who we are, how we speak and how the identity is applied, in the shortest form that still governs the work. It is the controlled master for the confirmed logo, palette and typeface.

01

READ 01 FIRST

Every visual rule that follows exists to carry the story in Brand. A layout that looks right but says the wrong thing has still failed.

02

WORK FROM 03

Visual Identity is the working reference. Logo, colour and type rules are specified with values you can copy straight into a file.

03

CHECK 3.6 BEFORE YOU SHIP

The Logo Don’ts page is short on purpose. If your work appears there, change it.

04

ESCALATE ANYTHING ELSE

This edition covers the essentials. Anything it does not answer goes to Brand Governance, on the closing page.

BRAND PROMISE

INTELLIGENT SIMPLICITY. TRUSTED TRANSFORMATION.

TABLE OF CONTENTS

01 BRAND

Who Agensia is, what it promises and the beliefs behind every product decision.

- 1.1 Company Introduction
- 1.2 Positioning and Script
- 1.3 Vision and Mission
- 1.4 Values and Culture

COMPANY INTRODUCTION

Agensia builds AI native, no code automation for enterprises that operate under regulation. Through one adaptive platform we help teams unlock scalable growth, intelligent workflows and regulatory compliance without replacing the systems they already rely on.

Powered by the SEAL engine, Self Evolving Agent Logic, our solutions deliver explainable, compliant automation that evolves with your operations rather than against them.

Digital transformation is not a one off project. It is a continuous journey. With Agensia you are not keeping up. You are staying ahead, with technology that listens, learns and leads.

POSITIONING AND SCRIPT

INTELLIGENT SIMPLICITY, FOR COMPLEX ENTERPRISE NEEDS

Agensia delivers AI native, no code automation built for regulated sectors such as healthcare, aerospace and manufacturing. Designed to simplify complex systems, the platform merges intelligent workflows with seamless compliance, helping businesses scale faster, reduce friction and stay audit ready from the first day of deployment.

BRAND SCRIPT

At Agensia we turn complexity into clarity.
Through adaptive automation and explainable
AI we help businesses work smarter without
overhauling the systems they already rely on.

CHOOSE AGENSIA,
WHERE INTELLIGENT
TRANSFORMATION STARTS.

SAY IT IN THIS ORDER. PROBLEM, MECHANISM, INVITATION.

CATEGORY

AI NATIVE ENTERPRISE
AUTOMATION

No code, agent driven,
built to integrate

AUDIENCE

REGULATED B2B ENTERPRISE

Aerospace, healthcare,
manufacturing, agriculture

DIFFERENCE

EXPLAINABLE AND
COMPLIANT BY DESIGN

Automation that can be
audited, not assumed

PROOF

THE SEAL ENGINE

Self Evolving Agent Logic
at the core of the platform

VISION AND MISSION

The vision states where Agensia is going.
The mission states how we get there.

WHERE WE ARE GOING

VISION

To be the global leader in AI first enterprise automation, empowering businesses with adaptive intelligence to scale efficiently, operate seamlessly and remain resilient in any environment.

Category leadership in AI first automation

Adaptive intelligence at enterprise scale

Resilience in any regulatory environment

HOW WE GET THERE

MISSION

To help B2B businesses automate with purpose. We provide intelligent, compliant and modular automation systems that integrate effortlessly into existing workflows, reducing friction and enabling transparent, trusted decision making.

Modular systems that drop into existing workflows

Insight unlocked without disruption

Transparent, trusted decision making in real time

VALUES AND CULTURE

Six values, and each one is a test a release has to pass rather than a word on a wall.

INTEGRITY

We build systems people can audit, question and trust. Transparency is a design decision, not a disclosure.

ADAPTABILITY

We design for change. Every system we ship is expected to evolve with the operation it supports.

COLLABORATION

We work alongside our clients rather than in front of them.

EMPOWERMENT

We remove friction so teams can do the work only humans can do.

CLARITY

We reduce complexity at every level, from architecture to interface to the words we choose.

RESILIENCE

We build for regulated environments where uptime, compliance and continuity are not negotiable.

02

VERBAL IDENTITY

How Agensia sounds: the message pillars
and the character behind every sentence.

- 2.1 Messaging Pillars
- 2.2 Voice and Character

MESSAGING PILLARS

Every piece of Agensia communication ladders back to one of four pillars. If a claim cannot be traced to a pillar, it does not belong in the message.

PILLAR 01

ADAPTIVE BY NATURE

Systems that evolve with the operation rather than freezing it in place.

We adapt, so you do not have to rebuild.

PILLAR 02

EXPLAINABLE BY DEFAULT

Every automated decision can be traced, audited and understood.

If it cannot be explained, it does not ship.

PILLAR 03

COMPLIANT FROM DAY ONE

Regulatory readiness designed in, not retrofitted after launch.

Audit ready from the first deployment.

PILLAR 04

HUMAN IN COMMAND

Automation that expands judgement instead of replacing it.

Technology that listens, learns and leads.

VOICE AND CHARACTER

01 **CLEAR, NOT SIMPLISTIC**

We explain complex systems in plain language without diluting the engineering behind them.

02 **CONFIDENT, NOT LOUD**

We state what the platform does and let the evidence carry the claim.

03 **PRECISE, NOT COLD**

Technical accuracy delivered with warmth. There is always a person on the other side of the sentence.

04 **FORWARD, NOT HYPED**

We talk about what is real and shipping, not what might be possible one day.

Four traits define how Agensia sounds. They hold on a landing page, in a proposal and in a support reply without adjustment.

WE SAY

WE AVOID

+ Intelligent automation	× Magic AI
+ Explainable and audit ready	× Black box intelligence
+ Built for regulated industry	× Built for everyone
+ Adaptive systems	× Future proof forever
+ Agents that assist your team	× Agents that replace your team

RULE OF THUMB

If a sentence would not survive a compliance review, it is not Agensia copy.

03

VISUAL IDENTITY

The mark, the palette and the typography that make Agensia recognisable anywhere.

- 3.1 Logo Overview
- 3.2 Logo Concept
- 3.3 Logo Formats
- 3.4 Clearspace and Size
- 3.5 Backgrounds
- 3.6 Logo Don'ts
- 3.7 Colour Palette
- 3.8 Colour in Use
- 3.9 Typography
- 3.10 Type Scale

LOGO OVERVIEW

The Agensia logo pairs a contoured symbol with the wordmark set in Ardela Edge. The symbol is built from concentric contour lines that resolve into an A, a form that reads as a system finding its shape rather than a static icon.

The horizontal lockup is the primary configuration. Use it wherever horizontal space allows. Alternative formats are specified in 3.3, and no other arrangement is approved.

PRIMARY LOCKUP

SYMBOL

REVERSED ON INK

VERTICAL ON GREEN

LOGO CONCEPT

SINGLE CURVE

One continuous curve, the simplest statement of the form. Everything in the mark begins here.

OFFSET REPETITION

The curve redrawn many times, each pass set slightly inside the last. The mark is built the way a model converges: many iterations settling into one form.

THREEFOLD SYMMETRY

Three lobes standing for the platform, the operation and the person. Balanced, and stable from any angle.

THE APERTURE

The open counter at the centre. It keeps the mark light at any size, gives the A its shape, and is the human space inside the system.

These four ideas combine to form the Agensia symbol: a mark that reads as a system finding its shape rather than a static icon. Its depth comes from line density alone, never from gradients or shading.

The symbol is one curve drawn many times, each pass slightly offset. Four ideas hold it together.

LOGO FORMATS

Three approved configurations. All keep identical proportion, so the identity holds across digital, print and spatial use.

HORIZONTAL LOCKUP

The primary version. Websites, documents, signatures and any layout with horizontal space.

VERTICAL LOCKUP

Stacked alternative for narrow or centred layouts, mobile views and print assets.

SYMBOL

The standalone mark for app icons, favicons, avatars and compact digital environments.

CLEARSPACE AND SIZE

The logo always sits inside a clear field equal to the height of the symbol.

CLEARSPACE	1X ON ALL SIDES
X IS	THE HEIGHT OF THE SYMBOL
MINIMUM LOCKUP	110 PX • 28 MM
MINIMUM SYMBOL	24 PX • 8 MM
PREFERRED	SCALE FROM THE CORNER, PROPORTIONALLY

X is the full height of the symbol. Because it is taken from the artwork itself, the rule holds at any reproduction size. Where a layout is tight, scale the logo down rather than reducing the clearspace.

MINIMUM LOCKUP • 110 PX

MINIMUM SYMBOL • 24 PX

BACKGROUNDS

Six approved combinations. Never place the mark on a busy image or a low contrast field.

GREEN ON WHITE

WHITE ON GREEN

GREEN ON INK

WHITE ON INK

WHITE ON GRAPHITE

INK ON WHITE

LOGO DON'TS

Eight things that break the mark. If your artwork appears here, change it before it ships.

01 Do not recolour the mark

02 Do not stretch or distort

03 Do not rotate the mark

04 Do not add effects or shadows

05 Do not outline the contours

06 Do not reset the wordmark

07 Do not crowd the clearspace

08 Do not place on a busy image

COLOUR PALETTE

Four values carry the whole system.
Green is the signal, and it is rationed.

AGENSIA GREEN

#8AD000

RGB 138, 208, 0
CMYK 34, 0, 100, 18
PANTONE TO BE MATCHED

The signature. Used for the mark, one call to action per surface and nothing else.

INK

#0B0C0A

RGB 11, 12, 10
CMYK 8, 0, 17, 95
PANTONE TO BE MATCHED

Headlines, body copy and dark grounds. Carries the weight the green does not.

GRAPHITE

#5A5B5B

RGB 90, 91, 91
CMYK 1, 0, 0, 64
PANTONE TO BE MATCHED

Neutral panels and photographic grounds. The quiet middle of the system.

MIST

#F2F4EE

RGB 242, 244, 238
CMYK 2, 0, 2, 4
PANTONE TO BE MATCHED

The default light ground. An off white with a trace of the green in it.

SPOT COLOUR Pantone references are matched by the production partner against a physical guide before first print. Screen values are final, spot values are not.

COLOUR IN USE

APPROVED PAIRINGS

AGENSIA INK ON PAPER19.9 : 1AAA	AGENSIA INK ON MIST18.6 : 1AAA	AGENSIA PAPER ON INK19.9 : 1AAA
AGENSIA INK ON GREEN12.0 : 1AAA	AGENSIA GREEN ON INK12.0 : 1AAA	AGENSIA PAPER ON GRAPHITE6.9 : 1AA
NEVER FOR TEXT		
AGENSIA GREEN ON PAPER1.7 : 1FAIL	AGENSIA GREEN ON MIST1.6 : 1FAIL	AGENSIA PAPER ON GREEN1.7 : 1FAIL
AGENSIA GRAPHITE ON INK2.9 : 1FAIL		

Green never carries text on a light ground. It is a signal, not a typographic colour. Where green text is unavoidable, use Green Deep #6FA800 and check the ratio.

TYPOGRAPHY

Agensia is set in Ardel Edge, the family the wordmark itself is drawn from. Its flat sided geometry and squared terminals give the brand its engineered edge at large sizes.

Ardela Edge is unicas. Sixteen of its twenty six lowercase letters carry their own outlines, but every one is drawn at cap height, so a paragraph set in it reads as capitals. It is a display face, and we use it as one.

Three faces carry reading text, each tied to a surface rather than a preference. Axiforma for brand and print, Inter for the website and the product interface, Arial for documentation and email. Choose by where the words will be read, never by taste.

JetBrains Mono handles technical annotation only: labels, colour values and specifications.

CHOOSE BY SURFACE

LANGUAGE VARIANTS

Where Simplified Chinese is required for interface, documentation or marketing material, Agensia uses Alibaba PuHuiTi. The family blends cleanly with the Latin system, holding clarity and technical elegance across a multilingual experience.

WEIGHT MAPPING

Ardela Edge	PUHUITI 40 BOLD
Axiforma SemiBold	PUHUITI 25 MEDIUM
Axiforma Regular	PUHUITI 20 REGULAR

RULES

- Latin text inside a Chinese setting stays in Axiforma.
- Never mix two Chinese families inside a single document.
- Chinese sets around 4 per cent larger than Latin at the same nominal size.
- Increase line height by one step when the two are mixed.

Alibaba PuHuiTi is not embedded in this document. The specimens above render in the reader’s system Chinese face, so treat them as a layout reference. Install PuHuiTi to reproduce the setting exactly.

HEADLINES • ALIBABA PUHUITI 40 BOLD

智能未来

Smart Future
Confident and impactful for dashboards, decks and major headlines.

SUBHEADS • ALIBABA PUHUITI 25 MEDIUM

赋能您的业务成长

Empowering Your Business Growth
Clean and structured for interface labels and bilingual slides.

BODY • ALIBABA PUHUITI 20 REGULAR

平台采用智能架构与自动化系统，简化业务流程并提升操作效率。
The Agensia platform adopts intelligent architecture and automated systems to simplify business processes and improve operational efficiency.
Highly legible for interface instructions, technical documentation and Chinese product content.

04 APPLICATION

The identity in use across stationery,
correspondence, digital surfaces and social.

- 4.1 Stationery
- 4.2 Email Signature
- 4.3 Envelope
- 4.4 Digital and Social

STATIONERY

The card leads with Ink and the letterhead leads with paper. The headed sheet carries the symbol as a tint, the footed sheet carries the contact rail.

TRIM	90 × 55 MM
STOCK	400 GSM UNCOATED
FINISH	SOFT TOUCH MATT
FRONT	INK, SYMBOL IN GREEN
BACK	PAPER, GREEN EDGE RULE
BLEED	3 MM ALL SIDES

TRIM	A4 • 210 × 297 MM
MARGINS	20 MM ALL SIDES
LOGO	TOP LEFT, 18 TO 20 MM
RULE	3 MM GREEN, HEADER OR FOOT
TINT	SYMBOL AT 35 PER CENT, HEADED SHEET
BODY	ARIAL REGULAR 10 / 16 PT
STOCK	120 GSM UNCOATED WHITE

Names and details shown are placeholder content for layout reference only.

EMAIL SIGNATURE

Two approved layouts. The signature is the last impression of every message, so it stays identical across the organisation.

SIZE	640 × 250 PX, BOTH LAYOUTS
PORTRAIT	120 PX SQUARE, OPTIONAL
NAME	ARIAL BOLD 17 PX
ROLE	ARIAL REGULAR 14 PX
DETAIL	ARIAL REGULAR 12 PX
LOGO	LOCKUP 26 PX, OR SYMBOL 108 PX
SOCIAL	20 PX INK TILES, 6 PX APART
FACE	ARIAL ONLY, NO EMBEDDING

01 • WITH PORTRAIT, CLIENT FACING ROLES

02 • COMPACT, EVERYONE ELSE

RULES

Two layouts are approved. Use the portrait version for client facing roles and the compact version for everyone else.

Social icons are monochrome ink. Never brand green, never full colour.

No quotes, awards, campaign banners or coloured disclaimers.

The whole signature is set in Arial. Email clients cannot embed a brand font, so no brand face is attempted here.

The logo is the only green in the signature. Every line of text is ink or slate.

Names and details shown here are placeholder content for layout reference only.

The portrait is a photograph of the person. Never an avatar, an illustration or the symbol.

No rules, dividers or borders. Columns are separated by space alone, so the block survives a client that strips styling.

ENVELOPE

The envelope introduces the brand before the letter is opened.
One green rule at the foot of the front, and nothing else.

FORMAT	DL • 220 × 110 MM
STOCK	120 GSM UNCOATED WHITE
FRONT	LOCKUP ON THE UPPER LEFT
BACK	FLAP PLAIN, RETURN ADDRESS LOWER RIGHT
LOGO HEIGHT	13 MM
RETURN ADDRESS	ARIAL REGULAR 8 PT
GREEN	4 MM RULE AT THE FOOT OF THE FRONT
WINDOW	NONE. ADDRESS PRINTED

The lower right of the front face stays clear for the recipient address and the postal mark.

The same construction scales to C5 and C4. The logo height ratio does not change.

FRONT

BACK

DIGITAL AND SOCIAL

Every small surface where the brand appears without a wordmark. Recognition is carried entirely by the symbol.

APP ICON 1024 PX
Symbol in green on Ink, centred at 66 per cent optical size. Never the wordmark.

FAVICON 32 AND 16 PX
Symbol in green on transparent. Contour count reduces at 16 px.

AVATAR 400 PX
Symbol in green on Ink. Identical across every platform.

OPEN GRAPH 1200 x 630 PX
Ink ground, horizontal lockup top left, one statement in Display.

HANDLE
@agensia on every platform, never a regional or product variant

AVATAR
Symbol in green on Ink, identical everywhere

BIO
One sentence, the positioning line, then the site

COVER
Ink ground with one statement, refreshed by campaign

CONTACTS AND LEGAL

This edition defines the brand as it stands today. It will evolve as Agensia does. Keep it close, hold the work to it, and route anything it does not answer to Brand Governance.

BRAND GOVERNANCE
