## About IAQ

Who we are and what we build. The delivery models are in 01.7.

# Established 1995. A trailblazer in total facility solutions.

Engineering, procurement, construction and maintenance for the industries where contamination, uptime and safety decide the outcome, from semiconductor wafer fabs to gigafactories, data centres and pharmaceutical plants.

|                  |                                      |

### Vision

To be a regional facility solutions provider with engineering excellence that facilitates technological innovation and advancement in quality of life.

### Mission

Providing innovative, sustainable facility and engineering solutions benefitting our clients and stakeholders, driven by our leadership, employees and partners globally.

## IAQ at a Glance

The company in six numbers, the delivery cycle behind them, and the certifications that stand behind both.

### THE DELIVERY CYCLE

A proudly Malaysian company on three continents, delivering mission-critical cleanroom facilities where contamination control, precision and compliance are absolute.

## Global Footprint

Seven markets, from the Malaysian headquarters outward.

**1995****Malaysia**

Turnkey design, procurement, construction and commissioning for hi-tech clients. Selangor (HQ), Penang, Johor and Kuching.

**2020****Sweden**

Gigafactory construction for EV battery manufacture, part of Europe's clean and digital transition.

**2023****Singapore**

Design & build EPCM services to global clients in the semiconductor industry.

**2025****Germany**

EPCC services following the semiconductor industry expansion in Europe.

**2026****India**

D&B turnkey delivery for India's first wafer fab.

**2026****United States**

Entry to the US following the localisation of advanced technology facilities.

**2026****Ireland**

Incorporated to support a client's wafer fabrication project.

## Core Values

Six commitments that govern how every project is run. Not words, but working rules.

### Safety First

Our services and works are carried out to the highest standard of safety and ethics.

01

### Quality Consistency

We take pride in the quality of solutions delivered, to achieve maximum client satisfaction.

02

### Honesty and Integrity

Our core code of conduct, fostering trust, accountability, professionalism and ethical practice.

03

### Efficiency & Proficiency

Committed to maximising available resources to achieve the best result collectively.

04

### Engineering Capabilities

Our way of working revolves around engineering principles, developing precise and sustainable solutions.

05

### Pursuit of Excellence

Devoted to excellence in all our works, providing sustainable solutions to complex challenges.

06

## Business Units

Three delivery capabilities under one group, covering the full chain.

### 01

IAQ SOLUTIONS SDN BHD

#### Engineering, Procurement and Construction (EPC)

EPC from conception to operation, completion and maintenance. Every stage managed, from initial design through commissioning, so clients in hi-tech industries can bring their visions to life.

### 02

IAQ UTILITY SOLUTIONS SDN BHD

#### Process Critical Utilities & Total Tool Installation Solutions

EPCM partner for semiconductor manufacturing: process-critical utility infrastructure and total tool installation, bridging facility readiness and manufacturing start-up to accelerate fab ramp-up.

### 03

IAQ ENERGY FACILITY MANAGEMENT SDN BHD

#### Energy Management

Energy management solutions that optimise operations and reduce carbon footprint, keeping facilities running at the highest levels of efficiency and sustainability.

## Delivery Models

The three models IAQ contracts under, across the full life of a facility.

### EPCM

### PROCESS CRITICAL UTILITIES

Delivered by IAQ Utility Solutions as an EPCM package: the utility infrastructure a fab runs on, and the tool installations that bring it to production.

#### Water Solutions

- UPW plant & distribution
- Process waste drains, WWT
- Reclaim and ZLD
- Chemical storage & dispensing

#### Chemical & Slurry Solutions

- Bulk chemical
- Blending systems
- Dispense systems

#### Gas Solutions

- Bulk gas
- Specialty gas & abatement
- Bunker: NH<sub>3</sub>, SiH<sub>4</sub>, H<sub>2</sub>
- Liquid dispense system

#### Process Exhaust Solutions

- General and acid
- Caustic and solvent
- Calamity exhaust

#### Tool Installations

- Progressive hook up
- Gas detection & monitoring
- Electrical power & controls

## Industry Focus

Seven sectors, one discipline: contamination control under code and class.

### Semiconductor

Wafer fab, advanced packaging, test & assembly

### Data Centre

Hyperscale cooling, security, uptime

### EV Battery

Dry rooms, moisture control, explosion proofing

### District Cooling & Heating

Urban energy plant and distribution

### Photovoltaics

Cell and module lines, toxic material handling

### Pharmaceuticals & Hospitals

GMP grades, regulated environments

### Food & Beverage

Hygienic design, quality and safety standards

## Safety, Quality & ESG

SECTIONS 03.1 TO 03.6

Highwire Gold safety award

ISO 45001:2018 occupational health & safety

20 tons per annum carbon footprint reduction

## ESG Commitments

Three pillars, applied to operations and to every project we take on.

### E

#### Environmental Responsibility

Minimising environmental footprint through sustainable design and construction. Energy-efficient solutions and eco-friendly technologies, prioritised at design stage.

### S

#### Social Accountability

The well-being and safety of employees and communities first. A diverse, inclusive work environment and ethical labour practices.

### G

#### Corporate Governance

Transparency, accountability and ethical decision-making, with the highest standards of compliance, building trust with clients, partners and stakeholders.

### THE SEVEN CRITERIA

01

#### Company performance

Standing and delivery record

02

#### Project management

Programme, cost and site control

03

#### Technical expertise

Engineering depth and method

04

#### Innovation

New method and technology

05

#### Quality

Workmanship against the standard

06

#### Safety

Zero-harm practice on every site

07

#### Sustainability

Environmental and social outcome
