NAME GUIDE

BRAND METHOD

BY ZIEEL.COM

NAME FUNNEL

Why Are You Renaming?

This is a big change for your company, but why is your existing name not working? It's critical to focus on this as a first step.

1. What are the clear business benefits to renaming?
2. Is there a legal reason to change the name?
3. Do you need to change the name for marketing reasons?
4. What emotional turmoil will this change have – is it worth it?
5. Has your business model changed?

A Good Brand Name

A Great Name makes you SMILE because it is
It must be Memorable

Easily remembered when merged into an existing knowledge base (association)

Names that are associated with images make a strong impression and are hard to forget.

The most powerful names get noticed, get buzz, and get sales because they connect with consumers on an emotional level, making us feel good.

- **Suggestive** — evokes something about your brand
- **Memorable** — makes an association with the familiar
- **Imagery** — aids memory through evocative visuals
- **Legs** — lends itself to a theme for extended mileage
- **Emotional** — moves people

A Bad Brand Name

A bad name, on the other hand, makes you SCRATCH your head because it is
Anytime you have to make excuses for your name, you're apologising for it. And when you apologise for your name, your brand is devalued.

- **Spelling challenged** — looks like a typo
- **Copycat** — resembles competitors' names
- **Restrictive** — limits future growth
- **Annoying** — seems forced, frustrates customers
- **Tame** — feels flat, descriptive, uninspired
- **Curse of knowledge** — speaks only to insiders
- **Hard to pronounce** — confuses and distances customers

Reduction of unwieldy name to shorter

Federal Express	FeDex
Pan American	Pan Am
The National Art Collections Fund	Art Fund
Acumen Fund	Acumen
Unique Clothing Company	Uniqlo
Thomson-Houston Electric Company	General Electric
Southern Pacific Railroad Internal Network Telecommunications	Sprint

Brand names that have become generic terms

Industry	Category	Real Example Names	Why It's a Great Name	Logic Behind the Name
Hospital	Premium	Mayo Clinic	Authoritative, trusted, and professional; the name evokes high-quality healthcare services.	Named after its founders (Dr. William Worrall Mayo and sons), conveying heritage, family trust, and expertise.
	Family-Friendly	Children's National	Clear and approachable; directly communicates its focus on child and family care.	The name emphasizes care and protection for children, appealing to parents and caregivers.
	Specialist	Cleveland Clinic	Geographically rooted and known for specialty care; communicates credibility and expertise.	Highlights a trusted location (Cleveland) while positioning itself as a center of excellence for specialized care.
Technology	Innovative	Apple	Simple, memorable, and approachable; avoids technical jargon and breaks the norm of tech naming.	Symbolizes simplicity and user-friendliness; inspired by Newton's apple, representing innovation and discovery.
	Consumer-Friendly	Nest	Evokes warmth, security, and comfort, aligning perfectly with its smart home product line.	Represents a safe and comfortable home environment, reinforcing its mission of making homes smarter and cozier.
Food & Beverage	Premium	Godiva	Luxurious and elegant; rooted in European sophistication, ideal for a high-end chocolate brand.	Named after Lady Godiva, symbolizing luxury, indulgence, and an iconic legacy.
	Friendly	Ben & Jerry's	Personal, quirky, and fun; humanizes the brand, making it approachable and relatable.	Named after the founders, adding authenticity and a personal story to the brand.
	Health-Focused	Kind Snacks	Simple, positive, and value-driven; reflects compassion and its focus on health and mindfulness.	The word "Kind" appeals to emotions, highlighting the brand's emphasis on kind-to-you snacks and ethical practices.
Fashion	Luxury	Chanel	Timeless and elegant; represents heritage and exclusivity in high fashion.	Named after founder Gabrielle "Coco" Chanel, emphasizing individuality, elegance, and classic appeal.
	Trendy/Youthful	H&M	Short and modern, appealing to younger demographics with its affordability and style accessibility.	Abbreviates the founders' names (Hennes & Mauritz), making it concise, global, and easily memorable.
	Sustainable	Patagonia	Reflects adventure, sustainability, and outdoor exploration; appeals to eco-conscious consumers.	Named after the Patagonian region in South America, reinforcing its outdoor and environmental values.
Real Estate	Premium	Sotheby's International Realty	Sophisticated and globally recognized; evokes luxury and exclusivity.	Builds on Sotheby's brand heritage in auctions and luxury, reinforcing high-end credibility in real estate.
	Family-Friendly	Lennar	Friendly and modern; suggests homes built for families and communities.	A short and approachable name that's easy to remember and adaptable across markets.
	Commercial	WeWork	Collaborative and modern; reflects flexible workspaces for businesses and professionals.	Combines "We" (community) and "Work" (productivity), emphasizing shared workspaces and collaboration.

Industry	Category	Real Example Names	Why It's a Great Name	Logic Behind the Name
Retail	Affordable	Dollar Tree	Clear and straightforward; directly communicates affordability and value.	Symbolizes a store where everything is affordable, with "Tree" adding a friendly and approachable tone.
	Premium	Nordstrom	A classic name associated with quality, service, and upscale shopping experiences.	Named after the founders, the name emphasizes heritage, luxury, and customer-first principles.
Education	Premium/Elite	Harvard University	Historic and authoritative; synonymous with academic excellence and prestige.	Named after its first benefactor, John Harvard, reinforcing legacy and long-standing academic quality.
	Youthful/Creative	Kumon	Short, unique, and easily memorable; reflects a systemized and creative approach to education.	Named after founder Toru Kumon, emphasizing personal dedication and innovation in teaching methods.
Automotive	Luxury	Rolls-Royce	Heritage-rich and synonymous with ultimate luxury and craftsmanship.	Combines the names of founders Charles Rolls and Henry Royce, emphasizing heritage and engineering precision.
	Mass-Market	Toyota	Short and globally recognizable; reflects reliability and quality across diverse markets.	Named after founder Kiichiro Toyoda, modified to "Toyota" for easier pronunciation and aesthetic appeal globally.
	Electric/Modern	Tesla	Innovative and cutting-edge; reflects sustainability and futuristic thinking.	Inspired by inventor Nikola Tesla, aligning the brand with innovation and groundbreaking technology.
Healthcare	Wellness	Peloton	Unique and energetic; referencing a cycling term that aligns with fitness and community.	A cycling term that signifies teamwork and momentum, connecting to its fitness-oriented ecosystem.
	Pharmaceuticals	Pfizer	Professional and scientific; conveys trust and expertise in medicine.	Named after founders Charles Pfizer and Charles Erhart, emphasizing heritage and trust in pharmaceuticals.
Hospitality	Premium	The Ritz-Carlton	Exudes luxury, service, and exclusivity; ideal for premium travelers.	Named after legendary hotelier Cesar Ritz, known for unparalleled service, paired with Carlton Hotel heritage.
	Affordable	Holiday Inn	Friendly and welcoming; communicates accessibility and comfort for budget-conscious travelers.	Evokes a sense of casual, family-friendly vacations, making it memorable and inviting.
Financial	Banking	Goldman Sachs	Strong, professional, and authoritative; evokes stability and financial expertise.	Named after its founders, the name reflects professionalism and longstanding trust in the finance sector.
	Digital	PayPal	Simple, modern, and user-friendly; suggests ease and friendliness in digital payments.	Combines "Pay" (transactions) and "Pal" (friend), symbolizing a trustworthy and helpful payment companion.

LOGO GUIDE

LOGO CREATION

Ideation > Features > Refinement

Process & Progress

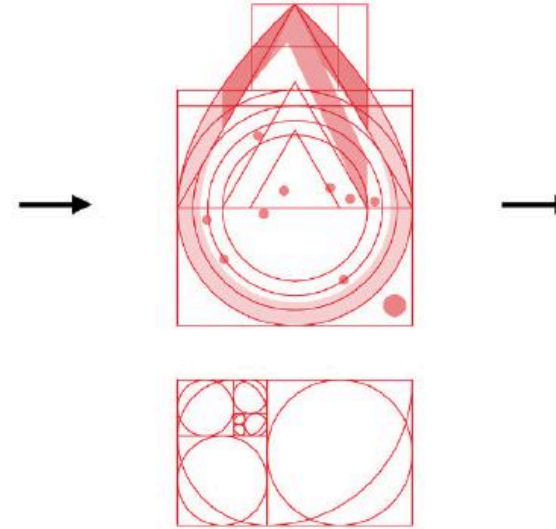

1. It is important to trust the process, a great branding takes time to go through concepts.
2. Designs requires to breathe when each are completed. This means its important to step back and revisit.
3. If visualization is needed, wireframes can be done in early stages. However take in mind the logo is not complete without going through all the process.

LOGO FEATURES & MEANING

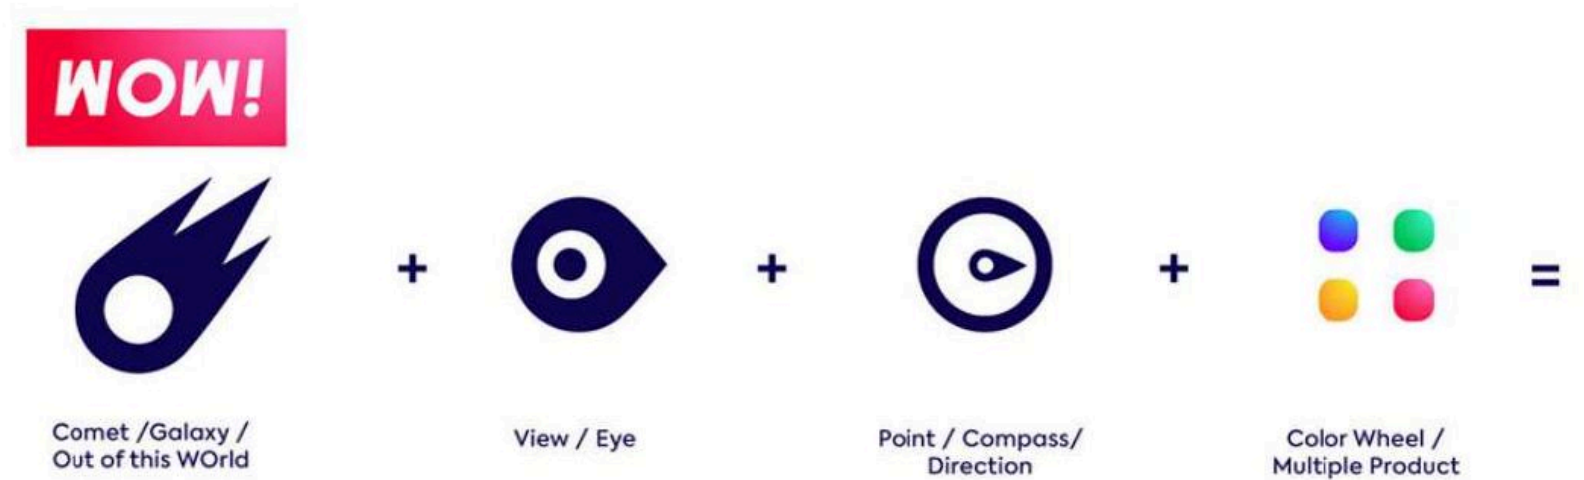

LOGO DEVELOPMENT

The process starts with defining the brand's key ideas, such as innovation, focus, and versatility. These ideas are transformed into visual symbols, like a comet for innovation or a compass for direction.

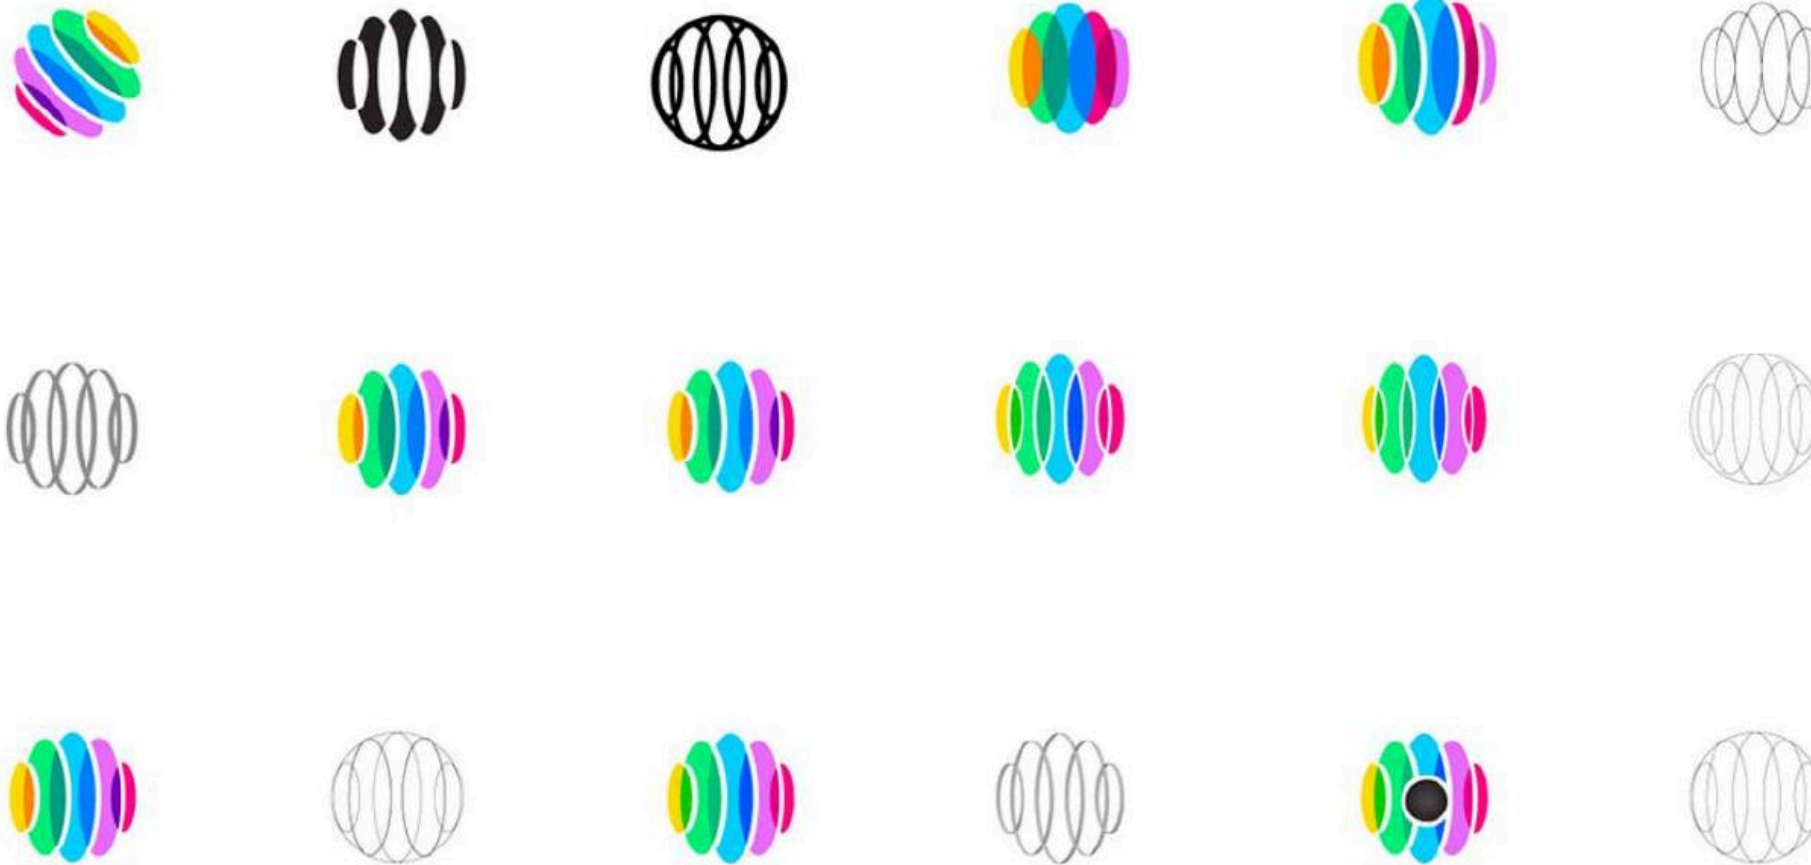

The elements are then combined into a single design, ensuring everything works together harmoniously. Afterward, the design is refined with careful adjustments to proportions, colors, and details, making it adaptable for any application.

Finally, the logo is tested to ensure it performs well across all mediums, from digital platforms to physical materials, delivering both meaning and functionality.

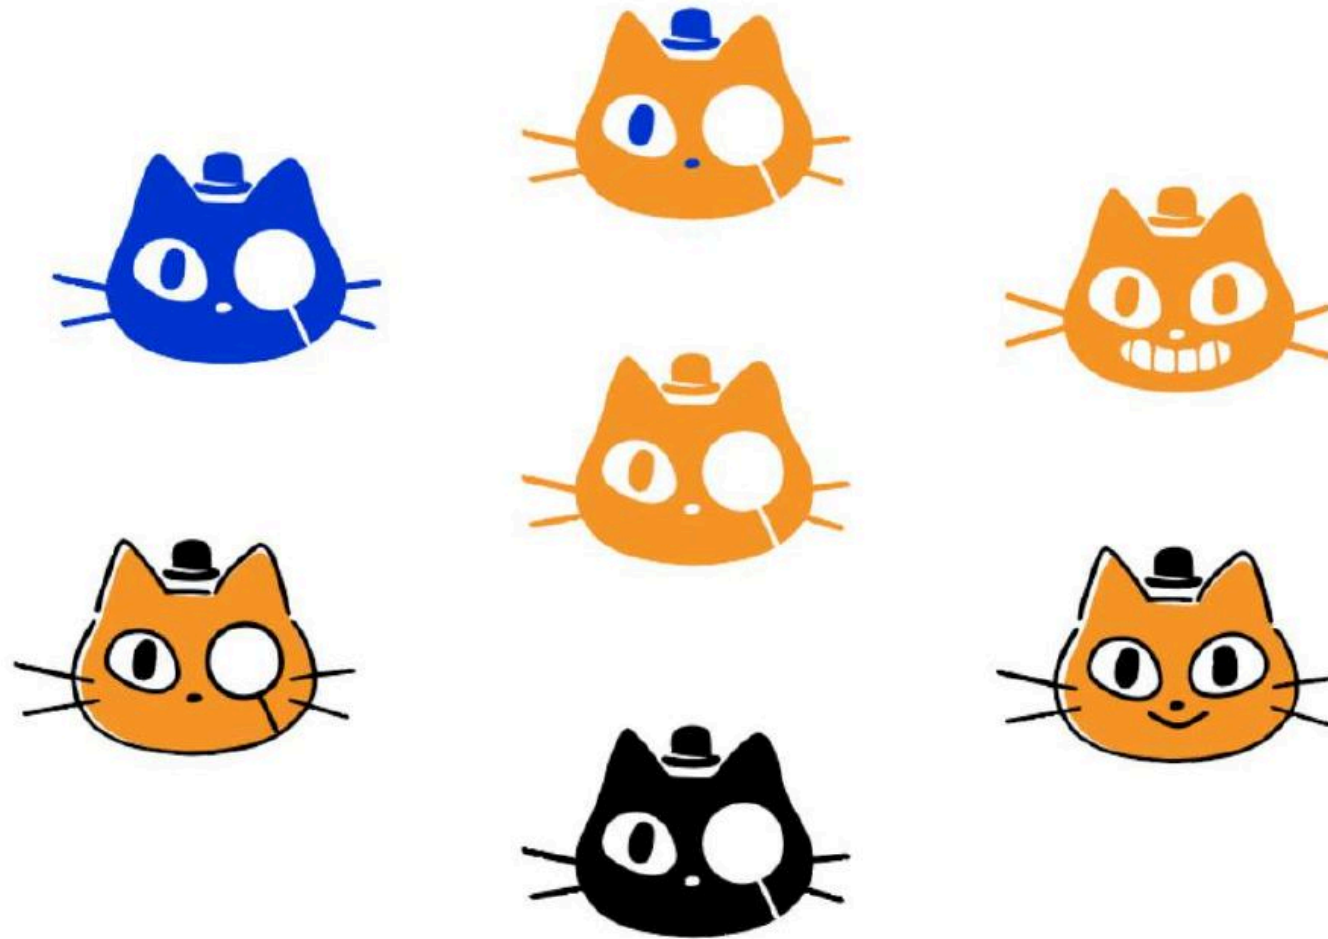

LOGO EXPLORATION

This phase involves refining the logo through adjustments in shapes, angles, and effects. By testing different alignments, layering techniques, and perspectives, the design is enhanced for balance and depth. Simplified versions, such as outlines, are created for versatility in minimalistic applications like embossing or subtle branding. This ensures the logo is polished, adaptable, and ready for diverse uses.

ART STYLE & PERSONALIZATION

DETAILING & DIRECTION

semi abstract

shape

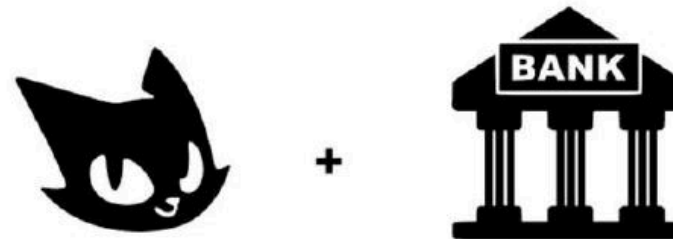

clear visual

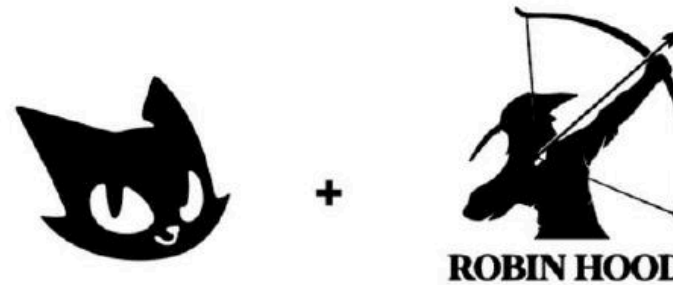

CONCEPT DIRECTION

This process explores how a single character can take on different directions while retaining its core identity and positioning. By integrating distinct themes—like professionalism for a corporate look or heroism for a community-focused persona—the character evolves to convey unique meanings. Each direction aligns with the brand's values, ensuring consistency across all variations.

LOGO REFINEMENT

The Process of Logo Refinement: Creating a Unified Visual Identity System

This visual outlines the systematic approach to refining logos, emphasizing precision, consistency, and adaptability

1. Golden Ratio for Balance:

- Proportions are fine-tuned using the golden ratio to achieve harmony and visual appeal across all logo elements.

2. Geometric Grids for Consistency:

- A structured grid system ensures alignment, symmetry, and proportionality, making the logo adaptable for various sizes and applications.

3. Iterative Refinement Process:

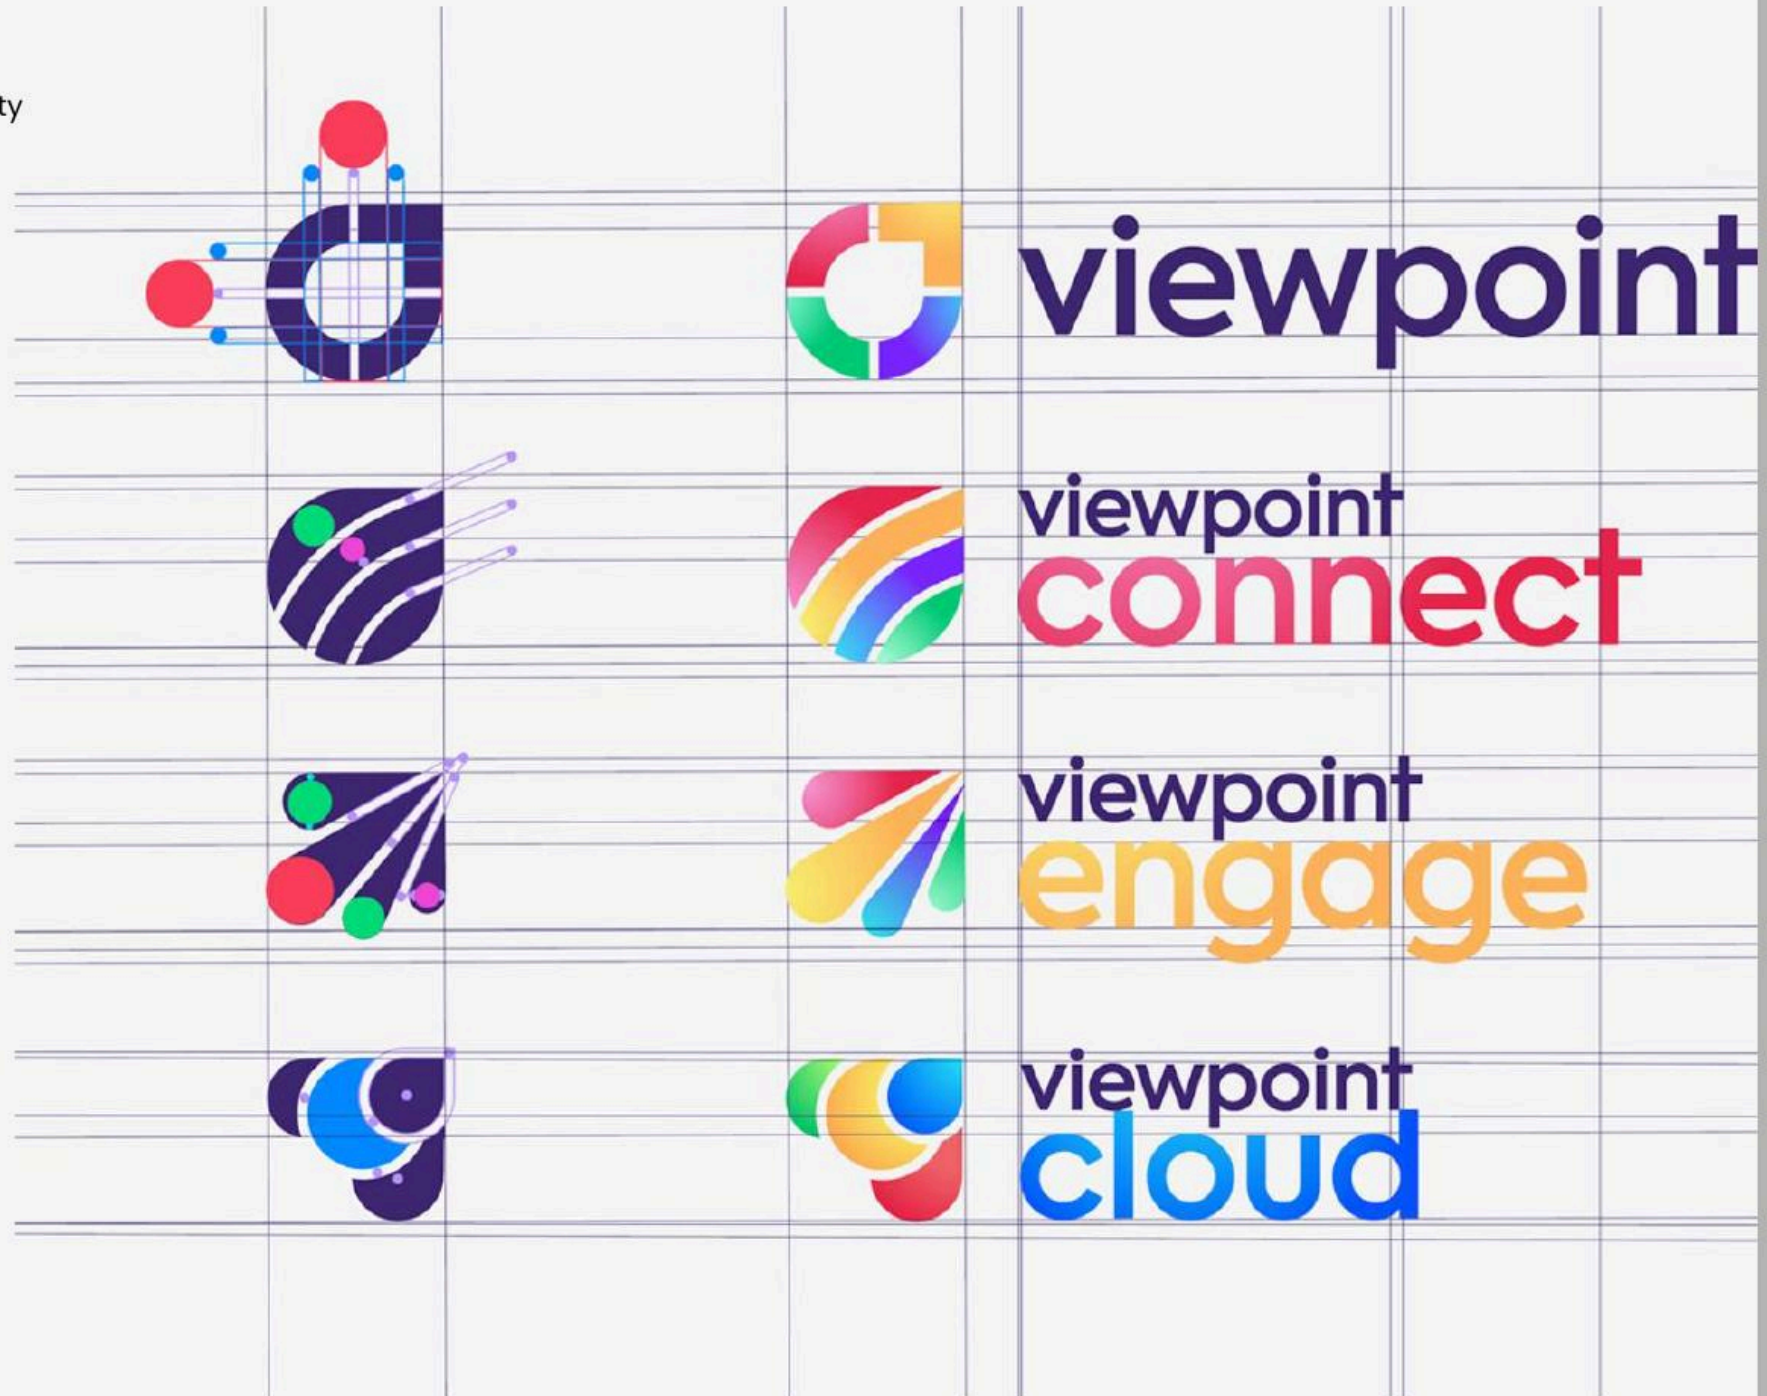

- Multiple design iterations allow for continuous improvements, focusing on clarity, scalability, and user feedback integration.

4. Developing a Visual Identity System:

- From the core logo, complementary versions are refined to represent different services or products while maintaining design consistency.

5. Adaptability Across Mediums:

- Ensuring the logo works seamlessly in digital and print formats, from small icons to large displays, without losing impact or clarity.

LOGO SET

During the logo refinement process, various adaptations are created to ensure the logo functions seamlessly across all brand touchpoints. This includes:

- **Primary Logo:** The centrepiece of the visual identity, designed for high visibility on platforms like websites, storefronts, and advertisements.
- **Alternate Shapes and Sizes:** Variants like oval or compact designs are created for applications such as stickers, stamps, or seals, where space is limited but brand recognition is essential.
- **Specialized Applications:** Custom versions tailored for unique uses like embossing, heat branding, or merchandise. These designs ensure consistency even in unconventional formats.
- **Versatility Testing:** Each design is tested across multiple mediums—digital, print, large displays, and small-scale items—to guarantee clarity and adaptability.

BRAND FOUNDATION

NAME

Brand name	MyHero
Pronunciation	my · HEER · oh
Name origin	My plus hero. A possessive joined to a role, taken from a parent interview.
Core meaning	The record that lets a parent be the capable one.
Tone and feel	Warm, plain spoken, competent. Clinically credible without being clinical.
Industry fit	Consumer health records, paediatrics, maternity, clinic-side care.
Symbolism	Shield, record, pulse. Protection held around a life being tracked.
Emotional association	Preparedness. Relief. Being the one who remembers.
Functional association	Visits, results, prescriptions, immunisation, milestones.
Why it works	Ownable emotional half, clean pronunciation in English and Malay, findable in store.
Visual identity fit	Two open vowels and a hard H give a wide, even wordmark with no descender.
Naming flexibility	MyHero Kids · MyHero Bump · MyHero Clinic · MyHero Records

MyHero

MY · HEER · OH

My, the possessive that puts the record in the parent’s hands, joined to hero, the role the parent is already playing in the clinic.

Wordmark note. Four syllables across two words with an open vowel rhythm and no awkward letter pairs. The capital H is the pivot, and nothing in the word carries a descender to protect.

NAMING FLEXIBILITY

MyHero Kids
MyHero Bump
MyHero Clinic
MyHero Records

WHY THE NAME

The selected name, argued in full. Seven traits, each tested against the criteria set at stage one.

MyHero

MY · THE POSSESSIVE	HERO · THE PROMISE
The record belongs to the family that carries it, not to the clinic that typed it. Ownership is claimed in the first two letters.	Not a rescuer. The parent who turns up knowing what happened last time. The app is what they carry, never the hero itself.

PRONUNCIATION · MY · HEER · OH

Stage one criterion	How the name answers it	Pass
Suggestive	Evokes a capable parent	✓
Memorable	Familiar words, new pairing	✓
Imagery	Shield, record, pulse	✓
Legs	Carries a family of modules	✓
Emotional	Preparedness, relief	✓

SEVEN TRAITS, TESTED

01	A role, stated plainly Built on a word every parent already uses about themselves. It names the relationship, not the mechanism, and never borrows the word AI.	✓
02	Possession by construction My turns a service into a belonging. MyHero reads as the parent's record, not the clinic's file with the parent granted access.	✓
03	Warm without being soft Open vowels and a hard consonant pivot. It sits beside a paediatrician's letterhead and a nursery wall with equal ease.	✓
04	Regionally speakable Two words, four syllables, no consonant clusters. Pronounced consistently across English, Malay, Mandarin and Tamil without coaching.	✓
05	Ownable and clean The emotional half is defensible where Health Record, MediFile and CareTrack are not. Clear search profile in the category.	✓
06	Extendable without strain Descriptors attach without the parent fighting the child. MyHero Kids and MyHero Bump read as one family.	✓
07	Ambition matched to audience Serious enough for a clinic contract, plain enough for the parent who opens it at 2am in a corridor.	✓

NAME FUNNEL

Eight stages from criteria to selection. Attrition is planned into the process rather than treated as a setback.

Stage	What happens
1 · Establish criteria	Agree the feel, match the positioning, stay sayable in a waiting room, remain legally viable with a route to clearance.
2 · Generate 240 names	Wide generation across descriptive, associative, invented and metaphor territories before any filtering begins.
3 · Expect 40 to 60 per cent to fall	Most candidates fail on availability, pronunciation or association. This attrition is planned, not a setback.
4 · Shortlist 15 to 20	Regenerate where a territory is thin. Carry survivors into deeper low cost legal and domain checks.
5 · Shortlist and test	Write messaging, tone and a clinic sentence for each survivor so the name is judged in use, not in a list.
6 · Legal checks	Trademark class scan, domain and app store availability, linguistic screening across Malay, Mandarin and Tamil.
7 · Choose 2 to 4 into design	Only names that survive testing carry into visual exploration.
8 · Choosing process	The final call is made against the criteria set at stage one, in writing.

Candidate	Outcome	Reasoning	Trademark	Domain	Say it	Own it
MyHero	Selected	Possession plus a role the parent already plays.	Ownable	Clean	Clear	High
CareBook	Rejected	Describes the object, not the relationship.	Weak	Contested	Clear	Low
Wellnest	Rejected	Warm, but reads as wellbeing rather than record.	Partial	Contested	Clear	Medium
Medibook	Rejected	Clinical and generic in equal measure.	Weak	Taken	Clear	Low
Rekod	Rejected	Local and plain, but institutional in tone.	Ownable	Clean	Difficult	Medium
HeroHealth	Retired	Doubles the promise and loses the possessive.	Partial	Contested	Clear	Medium

EXTENDING THE NAME

The name has to carry a product family without the parent becoming a prefix that fights its own children.

Name	Role	Function
MyHero	Master brand	The family health record, carried by the parent.
MyHero Kids	Product module	Immunisation schedule, growth and childhood milestones.
MyHero Bump	Product module	Pregnancy timeline, scans and week-by-week measurements.
MyHero Clinic	Staff module	Desk-side view for nurses and front-desk staff.
MyHero Records	Utility	Export, portability and the printable immunisation card.
MyHero Care	Roadmap	Ongoing treatment plans for children under continuing care.

NAMING RULES

- Parent name plus a functional descriptor. Never an invented module name.
- The descriptor is one word. Two word descriptors become acronyms in use, and acronyms leak the parent out of the conversation.
- A module never appears without MyHero somewhere in the composition, and never carries a mark of its own.
- Roadmap names are held, not published, until the module ships.
- Each descriptor is cleared separately. The master registration does not cover it.

LIGHT BRANDPOSITIONING

Where MyHero stands, and what it refuses to be

Element	Description
Archetype	The Caregiver, with a Sage undertone — competent and reassuring, never rescuing or dramatic
Category	Consumer health records for families, delivered through the clinic that creates the record
Core Offering	One trusted place where every visit, result and milestone is kept, explained in plain language, and carried forward
Target Audience	Primary: parents of young children, 28–40 · Secondary: expectant mothers · Tertiary: clinic staff at the desk
Brand Tone	Warm authority — the doctor who sits down before speaking. Professional first, cheerful second
Position Range	Premium-accessible. Trusted like a clinic, easy like a consumer app. Not free-and-ad-supported, not enterprise
Brand Promise	You will never walk into an appointment unsure of where you stand
Differentiation	Clinic-sourced rather than self-reported; plain-language rather than raw values; family-structured rather than single-user
Emotional Benefit	Preparedness. The relief of being the parent who remembers
Technology Enabler	AI-assisted record keeping, positioned strictly as background support — never named in the promise

SERVICES

What the brand actually delivers, module by module

Module	Description	Use case	Key benefit
Family Health Record	Every visit, result, prescription and immunisation for each family member, written by the clinic that performed it	Parents managing care for more than one person	Nothing to file, nothing to lose
Plain-Language Results	Every result carries a one-line answer in human words, with raw values underneath rather than above	Results received between appointments	Closes the wait-and-worry gap
Appointments	The next date is always visible, with reminders timed to the care plan rather than a generic calendar	Families juggling paediatric and maternity schedules	Fewer missed appointments
MyHero Kids	Immunisation schedule, growth tracking and childhood milestones held per child	Children aged 0–12 in care at the clinic	One timeline per child
MyHero Bump	Pregnancy timeline covering scans, measurements and week-by-week milestones	Expectant mothers at the clinic	No second app needed
MyHero Clinic	Desk-side view for nurses and front-desk staff — denser, faster and tabular	Clinic operations	The record is created once

BRAND ARCHITECTURE 1 · PORTFOLIO

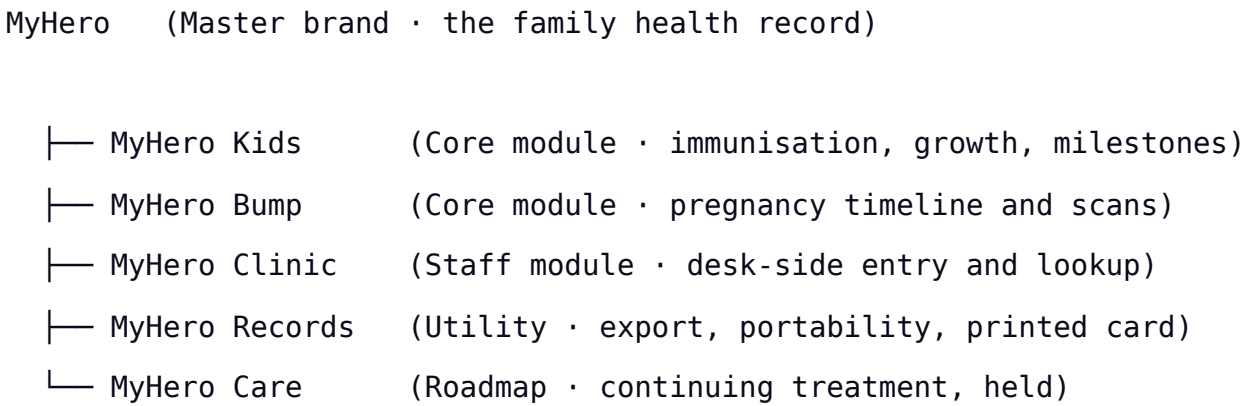

#	Entity	Type	Function	Managed by	Branding
1	MyHero	Product brand	The family health record, carried by the parent	Elite Care Clinic	Required
2	Elite Care Clinic	Parent and endorser	Paediatric and maternity clinic that creates the record	Elite Care Sdn Bhd	Owned
3	MyHero Kids	Product module	Immunisation schedule, growth tracking, milestones	Elite Care Clinic	Required
4	MyHero Bump	Product module	Pregnancy timeline, scans and measurements	Elite Care Clinic	Required
5	MyHero Clinic	Staff module	Desk-side record entry and lookup	Elite Care Clinic	Required
6	MyHero Records	Utility	Export, portability, printable immunisation card	Elite Care Clinic	Required
7	MyHero Care	Roadmap	Continuing treatment plans for children under care	Elite Care Clinic	Held
8	Partner clinics	Distribution	Third-party clinics issuing the same record	External	Endorsement only

BRAND ARCHITECTURE 2 · INTERNAL MODULES

#	Module	Type	Role	Branding	Design note
1	MyHero Records	Core product module	Visits, results, prescriptions and immunisations	Required	Needs a record or card glyph. Must not read as a database icon.
2	MyHero Kids	Core product module	Immunisation schedule, growth curve, milestones	Required	Needs a child-scale cue that survives without a mascot.
3	MyHero Bump	Core product module	Pregnancy timeline, scans, week-by-week	Required	Shares the Kids construction. Never a separate illustration style.
4	MyHero Clinic	Interface layer	Desk-side entry and lookup for staff	Required	Denser type, no rounded corners above 8px. Reads as a tool.
5	MyHero Records export	Utility	Printable card and portable file	Optional	Badge only, used inside technical documentation.
6	Result states	System language	All clear, in review, action needed	Required	Colour plus icon. Never colour alone.
7	Consent and access	Execution layer	Who may see the record, and when	Optional	Internal engine badge. Never public facing.

BRAND ARCHITECTURE 3 · HIERARCHY / TREE

One parent, four tiers, no orphans.

READING THE TREE

Every node carries the parent name.	No module is ever written without MyHero somewhere in the composition.
Elite Care endorses, it does not parent.	The clinic appears beside the mark on signage and referral material, never above it in the tree.
Core modules are the only tier with their own glyph.	Utility and roadmap tiers use type alone in the first release.
Infrastructure stays internal.	Consent, access and export engines appear in technical documentation only.
Roadmap names are held until the module ships.	MyHero Care is named here and nowhere outside this document.

TAGLINE TEST

Tagline	Words	Record	Promise	Tone	Strength	Notes
Your family’s health, remembered	4	Implied	Explicit	Warm, possessive	Says memory and belonging in the parent’s own frame.	Working candidate in the brief. Ideal as a subhead.
Never walk in unsure.	4	Implied	Explicit	Direct, human	States the promise from the positioning, word for word.	Lead candidate for the lockup.
One record. Every visit.	4	Explicit	Implied	Plain, functional	Names the mechanism with no adornment.	Good for the app store listing, thin on a cover.
The record that remembers.	4	Explicit	Implied	Calm, assured	Elegant, but repeats the idea already inside the name.	Redundant beside the wordmark.
Be the hero they need.	5	Implied	Explicit	Aspirational	Puts the burden of heroism on the parent.	Rejected. Reads as pressure, not support.
Health, simplified.	2	Explicit	Implied	Generic	True of every competitor on the board.	Rejected. Category boilerplate.

CLOSEST COMPETITORS & BEST OF THE BEST

Capability	MyHero	Paper book	Flo	Huckleberry	MySejahtera	Clinic portal

TERRITORY 01 · PRO AND CHEERFUL

Warm authority. The doctor who sits down before speaking — professional first, cheerful second.

Attribute	How it is expressed
Line	Warm authority. You will never walk in unsure.
Mark	Geometric container plus one cue. Shield or record card, never a character.
Colour	Hero Sky leads, Harbour supports, Ink carries every clinical value.
Type	Switzer 700 tight for headings, Instrument Sans for all reading copy.
Shape	Radius 8 to 12px. Nothing rounder, or the record stops looking like a record.
Photography	Daylight, real clinic, no stock smiles. Parent and clinician at the same height.
Motion	Short, functional, 180ms. Confirmation, never celebration.
Voice	Plain sentences. Answer first, detail underneath, no exclamation marks.

WHAT IT WINS

Credibility with the clinic and the ministry, and a system a nurse can extend without a designer. It is the only route that **reads as a medical record on the first glance**.

WHAT IT COSTS

Less memorable in a store listing. The warmth has to be carried by copy and colour rather than by a character.

DESIGN NOTE

This is the recommended direction. It holds the two halves of the positioning — clinic-sourced and parent-owned — without asking the brand to choose between them, and it survives the one place Territory 02 fails: a printed immunisation certificate handed across a desk.

TERRITORY 02 · DUOLINGO

Progress you can feel. The schedule as a path, the parent as the one who keeps the streak.

Attribute	How it is expressed
Line	Progress you can feel. Never miss the next one.
Mark	A character head, or the node on the path. The mark is the companion.
Colour	Sky leads, Flame and Amber carry streak and timing, Mint closes a step.
Type	Switzer 800 open tracking. Heavier, rounder, louder at every size.
Shape	Radius 16 to 24px. Squircles, big tap targets, one action per screen.
Illustration	Flat colour, no outline, a small cast that can be drawn by anyone.
Motion	Celebration on completion. Streak counters, badge reveals, spring easing.
Voice	Encouraging and short. Second person, present tense, never clinical.

WHAT IT WINS

Adherence. Immunisation is a schedule, and a schedule is the one thing gamification is genuinely good at. **Highest recall of the two** in a crowded store.

WHAT IT COSTS

A character is a permanent illustration, motion and voice commitment, and it cannot be trusted to a third-party clinic or embroidered on a uniform.

DESIGN NOTE

Held as the alternate. The streak logic, the progress ring and the completion state are **harvested into the chosen route** as product patterns rather than as brand identity — the mechanism survives, the mascot does not.

CHOSEN TERRITORY

One direction leads. The other is not discarded, it is harvested.

Direction	Territory	Status	Line	Carried into the chosen route
Direction 01	Pro and Cheerful	CHOSEN	Warm authority.	Leads. Holds clinic-sourced and parent-owned together without asking the brand to pick one, and survives print, embroidery and a photocopier.
Direction 02	Duolingo	Alternate	Progress you can feel.	The streak logic, the progress ring and the completion state, taken as product patterns rather than as identity.

LOGO IDEATION

CONCEPT / ELEMENT

#	Concept theme	Shape and structure	Meaning	MyHero alignment
1	Shield	Rounded shield, soft shoulder	Protection without militarism	The most immediately medical container, and the one a parent reads as care rather than security.
2	Cross	Equal-arm cross, rounded terminals	Care, clinic, treatment	Unmistakable category cue. Generic alone, decisive inside a container.
3	Record card	Rectangle with a header rule	The file itself	Most on-strategy element in the set. The record is the product.
4	Pulse line	Five-stroke beat	A life being tracked	Proves the record is current rather than archived. Survives to 22px.
5	Heart	Geometric, never anatomical	Care, family	Allowed as care. Never as a life, a limit or a result.
6	Squircle tile	50px field on a 15px radius	The app, the one place	Native to the phone. The container every other element can sit inside.
7	Letter M	Chevron or twin peak	MyHero monogram	Ownable but silent on category. The fallback if no character is carried.
8	Tick	Short-long check	A step completed	The immunisation schedule made visible. Reads as government if paired with a green disc.
9	Path node	Point on a dotted route	A step on the schedule	The schedule already is a path. Mark and node can be the same shape.
10	Character head	Soft square, ears out	A companion who remembers	Territory 02 only. The whole territory depends on it, and it cannot be embroidered.
11	Progress ring	Open arc, one accent segment	A course being completed	Harvested from Territory 02 as a product pattern, not as identity.
12	Enclosure	Open-sided container	Protection you can open	Protection that is not closed off. Suggests a record you may look inside.
13	Human figure	Parent, child, clinician	People	Excluded. A drawn human ages, and carries a race and a gender.
14	Cape	Superhero device	Heroism	Excluded by kickstart decision, in both territories.

COMBO / BUILD

#	Combination	Construction	Meaning and metaphor	Why it could work
1	Vital Shield	Shield holding a single pulse	Protection around a life being tracked	The brief drawn at its simplest. Strongest second reading in the set.
2	Badge Node	Shield with a tick	Protection plus a step completed	Needs no character and still prints in one colour.
3	Kept Record	Card with a pulse across it	The file, and proof it is current	Most on-strategy. Orthogonal container survives pixel snapping at 22px.
4	Card and heart	Card with a solid heart	The file as an object of care	Blush earns a home inside the mark. Risks reading as sentiment.
5	Cross in a squircle	Equal cross inside the app field	Health, app-native	No shield defensiveness. The most icon-ready of the set.
6	Open shield	Shield with one dashed edge	Protection you can open	Suggests access rather than lock-up. Subtle at small sizes.
7	Spine card	Bookmark format with a tab	A kept booklet	Closest to the paper book it replaces. Weak as an app icon.
8	Pulse heart	Heart carrying a beat	Care that is measured	Warmest route, and closest to existing femtech marks. Trademark risk.
9	Chevron M	Letter M as forward motion	Momentum under the name	The cleanest escape from the mascot. Silent on category.
10	M over a pulse	Monogram above a beat	Identity plus category	Adds the health cue back at the cost of a busier silhouette.
11	Character head	Rounded head with wide ears	A companion who remembers	Territory 02 signature. Permanent illustration and motion commitment.
12	Head in the tile	Character cropped by the field	The app icon in final form	Solves the icon, keeps the mascot dependency.
13	Node with underside	Circle with a weighted base	A step on the path	Mark and completed step are literally the same shape.
14	Capsule tick	Pill container with a check	A status, confirmed	Works as a UI chip, fails as an app icon. Cannot crop square.

1 SKETCH / SHAPE · SHIELD AND CROSS

Territory 01 — the most literal answer to the brief, drawn three ways.

CHOSEN

ROUNDED SHIELD

DEEP SHOULDER

OPEN EDGE

Concept designed	Element match	Alignment
Rounded shield	Shield, cross	Protection and medical safety. The most immediate reading of the four elements in play.
Deep shoulder	Shield, cross	More protective, slightly defensive. Reads closer to insurance than to care.
Open edge	Enclosure, cross	Protection that is not closed off. The gap is the point, but it is lost below 24px.

DESIGN NOTE

The first round establishes the container as the load bearing idea. All three treat the shield as the primary form and the cross as the figure held inside it.

1 SKETCH / SHAPE · VITAL SHIELD

Territory 01 — swapping the cross for proof that the record is current.

CHOSEN

SHIELD AND PULSE

BADGE NODE

SOFT BADGE

Concept designed	Element match	Alignment
Shield and pulse	Shield, pulse	Adds proof of life to the container. Strongest second reading of the whole territory.
Badge node	Shield, tick	The only route that needs no character and still prints in one colour.
Soft badge	Shield, tick	Warmer shoulder, shorter base. Loses a little authority for a little approachability.

DESIGN NOTE

The pulse outperforms the cross here. The cross is generic across the category, and only the pulse says the record is live rather than archived.

1 SKETCH / SHAPE · THE KEPT RECORD

Territory 01 — the file itself as the object of care.

CHOSEN

CARD AND PULSE

CARD AND HEART

SPINE CARD

Concept designed	Element match	Alignment
Card and pulse	Record card, pulse	Clearest statement that the record is current. Least sentimental of the three.
Card and heart	Record card, heart	The file as an object of care. Blush earns a place inside the mark.
Spine card	Bookmark, heart	Reads as a kept booklet rather than a database. Closest to the paper book it replaces.

DESIGN NOTE

The header rule is what makes a rectangle read as a record rather than a generic app tile. It is held at full weight in every variant, including reversed.

1 SKETCH / SHAPE · CROSS ABSTRACTED

Territory 01 — the category cue, pulled away from the clinic wall.

CHOSEN

CROSS IN A SQUIRECLE

QUADRANT CROSS

ROUNDED TERMINALS

Concept designed	Element match	Alignment
Cross in a squirecle	Cross, squirecle	Health without the shield's defensiveness. The most app-native of the three.
Quadrant cross	Cross	Strong at any size, but the four quadrants read as pharmacy signage.
Rounded terminals	Cross	Warmest cross available, and the closest to a first-aid mark. A legal risk in some markets.

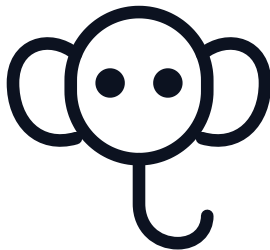

DESIGN NOTE

A cross inside a disc was drawn and dropped: MySejahtera owns that read locally, and the competitor board rules it out before the aesthetics do.

1 SKETCH / SHAPE · THE COMPANION

Territory 02 — the character, drawn three ways.

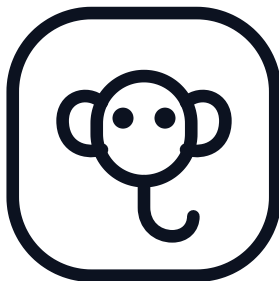

CHOSEN

SOFT SQUARE HEAD

ROUND HEAD

HEAD IN THE TILE

Concept designed	Element match	Alignment
Soft square head	Character head	The base drawing. Wide ears give a silhouette that survives at 20px where the eyes have gone.
Round head	Character head	Friendlier and younger, but the silhouette collapses into a generic circle at small sizes.
Head in the tile	Character, squircle	The app icon in final form. The character is cropped by the field rather than floating in it.

DESIGN NOTE

A character is a permanent illustration, motion and voice commitment. It cannot be redrawn by a nurse, embroidered on a uniform, or trusted to a third-party clinic.

1 SKETCH / SHAPE · NODE AND PATH

Territory 02 — the schedule is already a path, so the mark can be a step on it.

CHOSEN

NODE WITH UNDERSIDE

COMPLETION STATE

DOTTED ROUTE

Concept designed	Element match	Alignment
Node with underside	Path node, tick	Mark and completed step are the same shape. Every finished dose is a small appearance of the brand.
Completion state	Badge, celebration	An animation frame for the moment a vaccination is recorded, not a static mark.
Dotted route	Path, node	The schedule at a glance. Reads as loading rather than progress below 32px.

DESIGN NOTE

This round produces the strongest product pattern in the book. The progress ring and the completion state are carried into the chosen route even though the territory is not.

1 SKETCH / SHAPE · MONOGRAM

Territory 02 — the letter M, for when no character is wanted.

CHOSEN

CHEVRON M

M IN THE TILE

TWIN PEAK M

Concept designed	Element match	Alignment
Chevron M	Letter M	The cleanest escape from the mascot. Still reads as forward motion rather than as a letter alone.
M in the tile	Letter M, squircle	App-icon ready, but the M is doing no work the wordmark is not already doing.
Twin peak M	Letter M	Two peaks read as two people, parent and child. Fragile at small sizes.

DESIGN NOTE

The monogram is the safety net under Territory 02. If the character question is answered no, this is what the territory becomes.

1 SKETCH / SHAPE · THE CONTAINER

Territory 02 — the field the mark sits in, tested three ways.

CHOSEN

DISC

SQUIRCLE

CAPSULE

Concept designed	Element match	Alignment
Disc	Container	Friendliest and most crowded. Sits beside Calm and MySejahtera at the same time.
Squircle	Container	The native shape of the icon grid. The container disappears and the cue does the talking.
Capsule	Container	Works as a UI chip, fails as an app icon. The aspect ratio cannot crop square.

DESIGN NOTE

Containers are chosen last and matter most. The squircle is the only one that behaves identically as an app icon, a favicon and an embroidered patch.

2ND STAGE

2 REFINE, COMBINE, OR EVOLVE · 01

Territory 01 — the shield family narrowed to one survivor.

CHOSEN

VITAL SHIELD

BADGE NODE

SOFT VITAL

Concept designed	Element match	Alignment
Vital Shield	Shield, pulse	Carried forward. Pulse optically centred rather than mathematically centred so it does not sit low.
Badge Node	Shield, tick	Held. Strong at 16px, but the tick plus shield combination reads as clearance, not care.
Soft Vital	Shield, pulse	Dropped. The softer shoulder loses the authority the territory is built on.

DESIGN NOTE

Stroke lifted from 2.6 to 3.2 across the family. Anything lighter turns grey when the mark is printed on a clinic sticker.

2 REFINE, COMBINE, OR EVOLVE · 02

Territory 01 — the record family, resolved to one construction.

CHOSEN

KEPT RECORD

TABBED RECORD

FILED RECORD

Concept designed	Element match	Alignment
Kept Record	Record card, pulse	Carried forward. The header rule is what makes the rectangle read as a record rather than an app tile.
Tabbed Record	Record card, marker	Held. The tab suggests a file among files, which is the clinic's view, not the parent's.
Filed Record	Record card, tick	Dropped. Tick plus card reads as a completed form rather than an ongoing record.

DESIGN NOTE

Both survivors converged on the pulse. The cross is generic across the category, the outlined heart fails below 32px, and only the pulse says the record is current.

2 REFINE, COMBINE, OR EVOLVE · 03

Territory 01 — construction, weight and the small-size correction.

CHOSEN

ON THE GRID

WEIGHT CORRECTED

ACROSS THE SIZE BAND

Concept designed	Element match	Alignment
On the grid	Shield, pulse	Shoulders set on the 26 unit circle, base apex on the vertical axis, pulse on the 45 degree diagonals.
Weight corrected	Shield, pulse	Stroke lifted to 4.2 at display size. The pulse is drawn one step heavier than its container.
Across the size band	Shield, pulse	104, 58 and 30px. Below 30px the pulse drops from five strokes to three.

DESIGN NOTE

The shape of the beat matters at small size, the detail does not. This is the rule that decides the final mark two rounds later.

2 REFINE, COMBINE, OR EVOLVE · 04

Territory 02 — the alternate, taken to the same finish.

CHOSEN

COMPANION

CHEVRON M

NODE

Concept designed	Element match	Alignment
Companion	Character head	Held as an illustration system rather than as the mark. It cannot be embroidered or redrawn by a nurse.
Chevron M	Letter M	Carried as the territory's fallback. Silent on category, but ownable and one-colour safe.
Node	Path node, tick	Carried as a product pattern. The progress ring survives into the chosen route.

DESIGN NOTE

Territory 02 is refined to the point where it could ship, so the decision on the Chosen Territory page is a choice between two finished routes, not between a finished one and a sketch.

2 REFINE, COMBINE, OR EVOLVE - 05

Colour, reversal and the one-colour fallback.

CHOSEN

POSITIVE · SKY

ONE COLOUR · INK

DEPTH · HARBOUR

Concept designed	Element match	Alignment
Positive · Sky	Hero Sky	The default. Sky on white carries the warmth without asking the mark to hold a gradient it cannot print.
One colour · Ink	Ink	The fallback that has to work: fax, stamp, embroidery, engraved plate and the ministry form that accepts black only.
Depth · Harbour	Harbour	Used where the mark sits on a pale ground beside dense clinical data and Sky would pull focus.

DESIGN NOTE

Colour is applied last, and only to confirm the mark does not depend on it. A mark that needs Sky to be legible will fail the first time it meets a photocopier in a clinic corridor.

2 REFINE, COMBINE, OR EVOLVE · 06

Reversal, and the last two candidates standing.

CHOSEN

REVERSED ON DEEP

KEPT RECORD

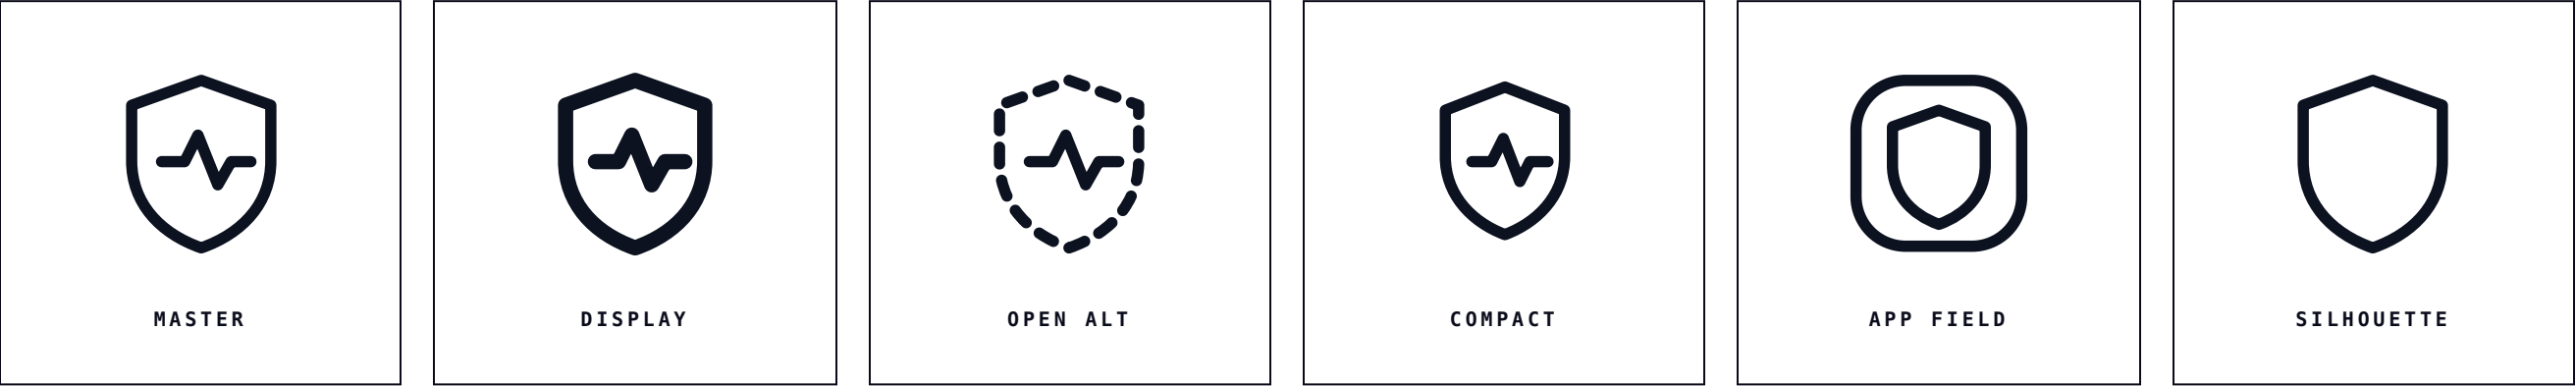

VITAL SHIELD

Concept designed	Element match	Alignment
Reversed on deep	Shield, pulse	White on Deep gains apparent thickness, so no compensation is applied. The eye does it.
Kept Record	Record card, pulse	Finalist. Orthogonal container survives pixel snapping, and the header rule holds when reversed.
Vital Shield	Shield, pulse	Finalist. Highest immediate recognition, and the only mark that reads as protection at a glance.

DESIGN NOTE

Both finalists are complete without colour, without the wordmark and without scale. That is the bar the 3rd Stage starts from — everything after this is polish, not rescue.

3 VARIANTS

Axis	Range explored	Rule that came out of it
Weight	Hairline through to heavy	Stroke is two modules. Every other weight in the system derives from it.
Containment	Free standing, rounded field, square field	Rounded field for the app icon, square for documents, free standing by default.
Orientation	Upright, tilted 4°, tilted 8°	Upright only. Tilt reads unstable in a record mark.
Pulse strokes	Three, five, seven	Five at display, three below 30px. Seven reads as a waveform, not a beat.
Shoulder	Square, soft, deep	Soft. Square reads as security, deep reads as insurance.
Aperture	Closed, one gap, dashed	Closed by default. The dashed variant is reserved for consent and access screens.

3RD STAGE

4 POLISH

Construction	Round	Why it survived
Vital Shield	Round 02	Highest immediate recognition. Reads as protection before it reads as anything else.
Kept Record	Round 02	Most on-strategy. The record is the product, and this mark says so.
Badge Node	Round 01	Strongest at 16px. Held as the favicon and the notification glyph.
Chevron M	Round 04	Carried from Territory 02 as the monogram for dense staff-side interfaces.

STAGE ONE SHORTLIST · 8 ROUNDS RUN · 24 MARKS DRAWN · 4 CARRIED FORWARD

Construction	A rounded shield holding a five-stroke pulse, optically centred.
Parent claim	The container is the parent, the pulse is the child. Protection around a life being tracked.
Complexity	Shield plus pulse. No third element is ever added inside the container.
Balance	Pulse sits 1.5 units above centre so it reads centred inside a tapering form.
Containment	Rounded field for the app icon, square for documents, free standing by default.
Lockup	Measured gap derived from the shield counter, wide variant for signage.

DECISIONS CARRIED INTO POLISH

FINAL MARK

One mark, built out. Pending the decision recorded on the Chosen Territory page.

MyHero

VITAL SHIELD · TERRITORY 01 · PRO AND CHEERFUL

Property	Specification
Container	Rounded shield, 21 unit shoulder, apex on the vertical axis
Figure	Five-stroke pulse, one weight step heavier than the container
Stroke	3.4 at display, 4.6 at 30px, 6.0 at 16px
Minimum size	16px digital, 8mm print, three strokes below 30px
Clear space	Half the shield width on every side, measured from the bounding box
Colour	Hero Sky positive, white reversed on Deep, Ink one-colour

WHY THE MARK

Every element of the mark carries one claim of the brand promise. Nothing in it is decoration.

The Shield

Protection, and the shape a parent reads before any word on the screen. It closes completely, because a record that leaks is not a record you own.

The Pulse

Proof the record is current. A cross would have said clinic and a tick would have said finished — only the beat says this is a life still being tracked.

The Closure

The base carries the whole form to a single point. Everything inside the container is held by one parent, in one place, with nothing filed elsewhere.

PROMISE · WARM AUTHORITY · PROTECTION AROUND A LIFE BEING TRACKED, OWNED BY THE FAMILY THAT CARRIES IT

LOCKUPS

How the mark and the name sit together, and the space they need.

CLEAR SPACE AND MINIMUM SIZE

Clear space equals half the shield width on every side. The horizontal lockup holds to 120px wide, the stacked to 64px, and below that only the mark is used. The descriptive lockup appears on first contact and on the app store listing; the endorsed lockup appears on signage, letterhead and referral material only.

COLOUR & SHAPE TEST

APPLIED COLOUR TEST

One colour recommended, the alternatives shown and answered. The mark is tested, not argued.

CHOSEN  HERO SKY CHOSEN · the brand	 HARBOUR Carried · headings and depth	 DEEP Carried · signage and reversal	 MINT Carried · all clear state only	 SIGNAL Rejected · alarm state only	 INK Carried · one colour fallback
---	--	---	---	--	---

COLOUR PSYCHOLOGY

The mark tinted through the field the guide describes. The palette is chosen against the category, not against taste.

Mark	Colour	Psychological associations	Verdict for MyHero
	Red	Passion, urgency, energy, alarm.	Reads as an abnormal result inside a clinic. Reserved for clinical urgency only, never for a badge.
	Orange	Cheerful, enthusiastic, approachable.	Territory 02's streak colour. Carried as Flame for momentum, never as brand identity.
	Yellow	Optimism, attention, caution.	Caution conflicts with a reassurance promise. Carried as Amber for due soon, and nothing else.
	Green	Growth, health, safety, go.	In a clinic green already means normal result. Refused as a brand colour, held as Mint.
	Blue	Trust, dependability, competence.	The category colour, and the one parents and clinicians both read as safe. CHOSEN as Hero Sky.
	Navy	Depth, institution, authority.	Distinct from daylight blue while keeping its trust. Carried as Harbour for headings and signage.
	Pink	Care, tenderness, maternity.	Rationed. Blush appears on milestones only, never on structure and never across a whole screen.
	Purple	Luxury, imagination, sophistication.	Currently owned by femtech. Would place MyHero on the wrong shelf. Rejected.

COLOUR

COLOUR IN CONTEXT

The palette doing its job across the three places it actually appears.

GOOD MORNING

CONTRAST FLOOR

Sky on white is 3.1:1 — enough for a large control, **not for body text**. Clinical copy is always Ink.

TERRITORY SPLIT

Flame and Amber belong to Territory 01 alone. Territory 02 runs on the core four plus Blush.

THE REFUSAL

No green as a brand colour. In a clinic **green already means result normal**.

WHY THE COLOUR

Where the palette comes from, and what it is not allowed to do

Colour	Where it comes from	What it may never do
Hero Sky	Daylight through a consult-room window — the calmest thing in a clinic, and the opposite of institutional green or corporate navy	Carry body text, or appear on a page reporting an abnormal result
Harbour	The deeper end of the same hue — authority without turning to navy, which reads as insurance	Become the primary. It supports; it does not lead
Blush	The one warm note, borrowed from the maternity side of the clinic	Carry a warning, a result or a system state — that is what amber and signal are for
Mint	Chosen so "all clear" is legible to the most common forms of colour blindness alongside signal red	Be used decoratively. Mint always means something is complete or normal
Signal	Reserved, not designed — it exists to be rare	Appear on anything about points, streaks, badges or progress

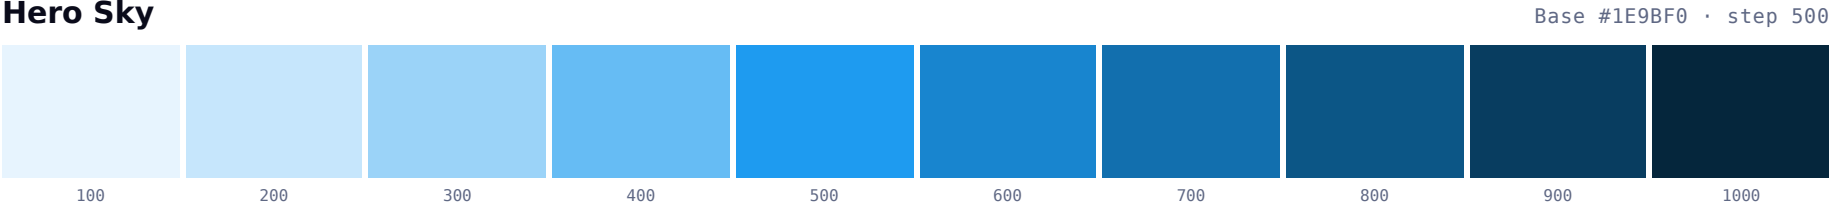

ONE SENTENCE

The palette is built so a parent can tell **what kind of news a screen carries before reading a word** — and so no piece of good news is ever coloured like bad news.

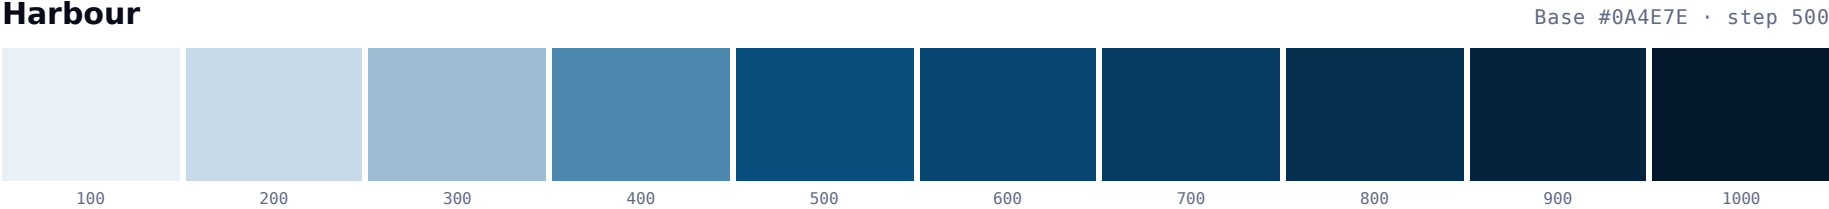

COLOURDETAIL

The ramps, the ratios and the pairs that are allowed to touch

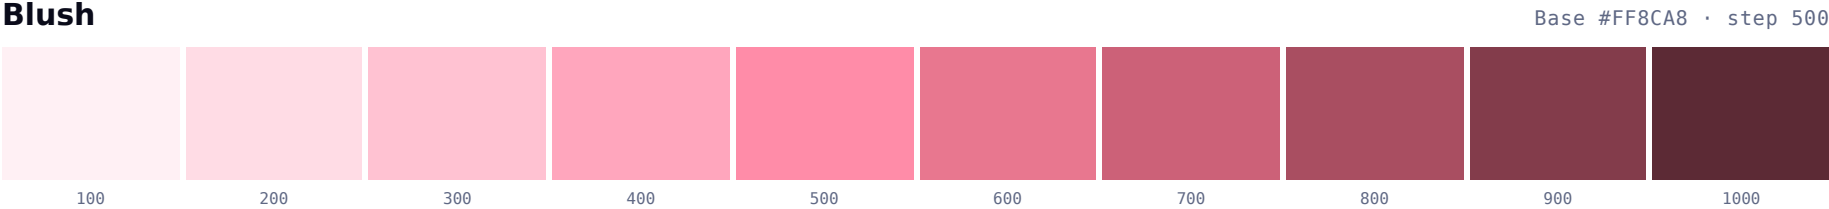

Hero Sky

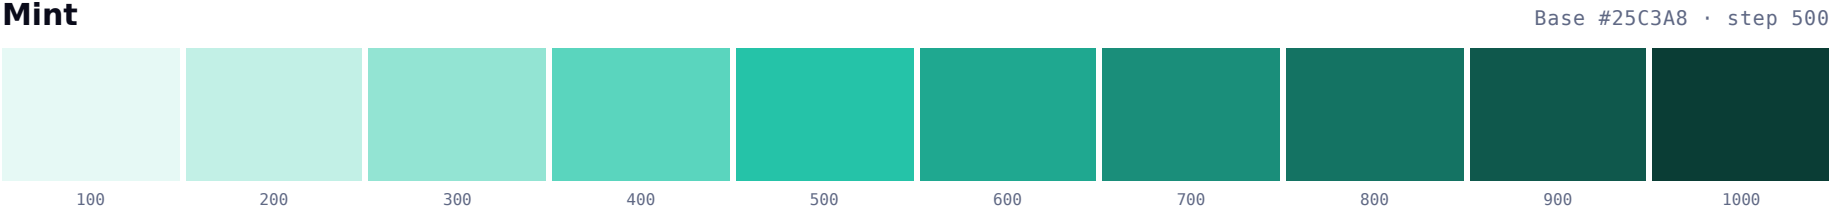

Harbour

Blush

Mint

USAGE RATIO

70 ground · 18 ink · 9 sky · 3 accent. Past 9% Sky, a screen has stopped being calm.

ALLOWED TEXT PAIRS

- Ink on Cloud — 15.2:1 · body copy
- Ink on white — 17.4:1 · clinical data
- White on Harbour — 8.9:1 · headings
- White on Sky — 3.0:1 · large control labels only
- Sky on white — 3.1:1 · never body copy

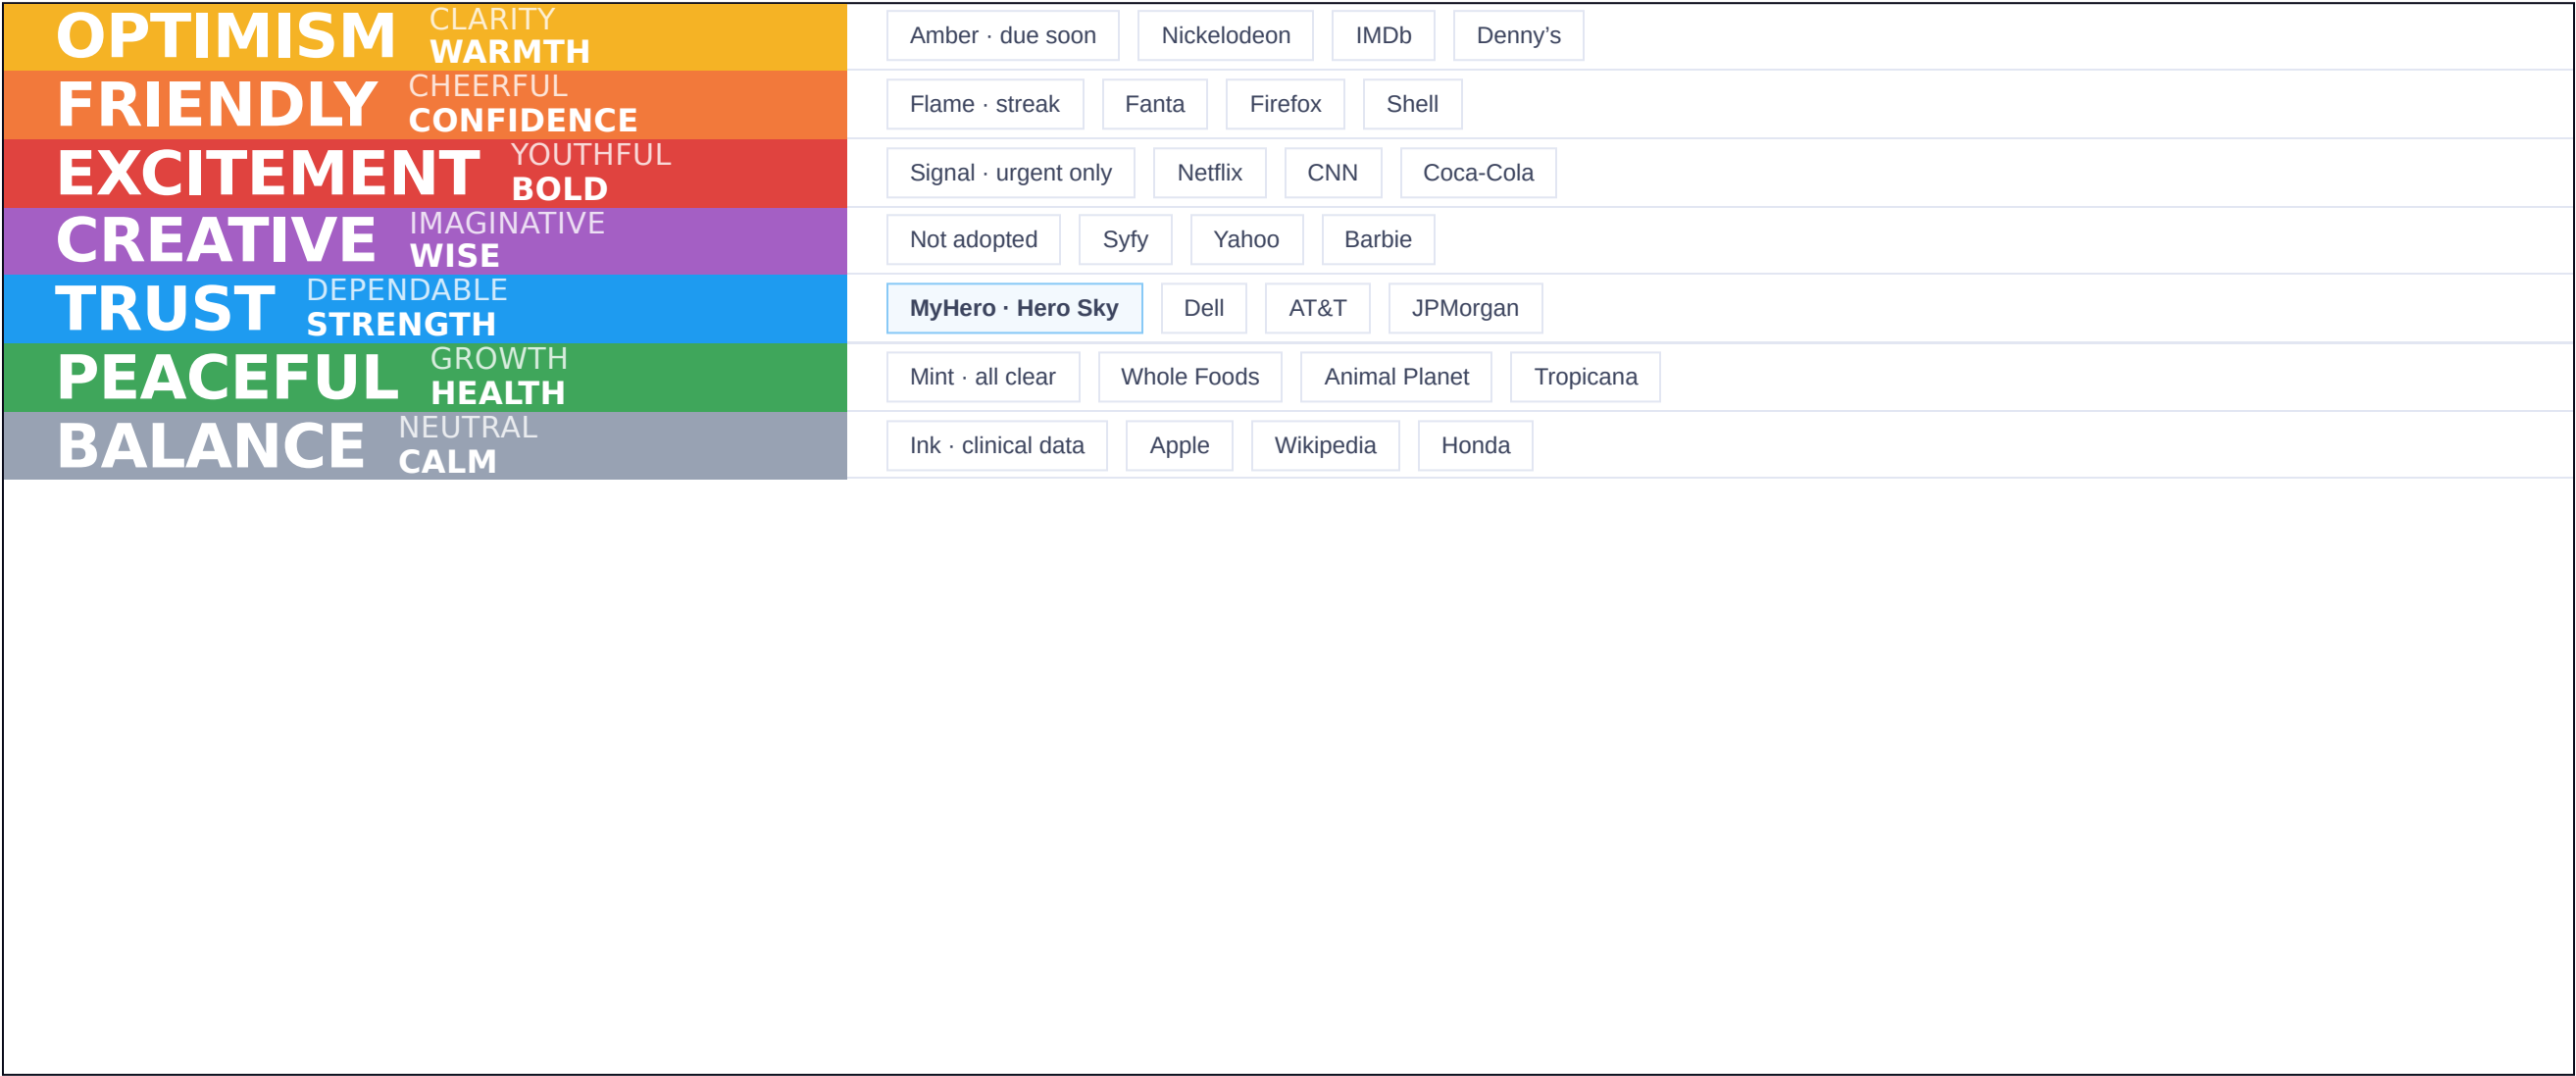

RAMP RULES

Steps 100–300 are grounds and fills. 400–600 are the only steps a mark or control may use. 700–1000 carry text on light.

A tint is never made at run time by lowering opacity.

COLOUR EMOTION MAP

Where every hue already lives in a buyer’s head before a brand touches it — and where MyHero has chosen to stand.

MYHERO TAKES TRUST · EVERY OTHER BAND IS HELD AS A STATE COLOUR, NEVER AS IDENTITY

TYPOGRAPHY

Two faces, three roles, and the one place the voice is switched off

Aa

Switzer

DISPLAY · FIGTREE FALLBACK

- 800 Territory 01 headings and celebration
- 700 Page titles throughout this book
- 600 Territory 02 lockup and labels

Aa

Instrument Sans

BODY · ALL READING COPY

- 400 Every piece of clinical copy and results
- 500 Emphasis inside a paragraph
- 600 Inline labels and table leads

Aa

JetBrains Mono

UTILITY · DATA & LABELS

- 500 Lab values, MRN, dates — read as data
- 600 Eyebrows, page numbers, captions
- Never used for running text

WEIGHT IS THE TERRITORY

The face is shared. Territory 01 sets display at 800 with open tracking; Territory 02 drops to 600 and tightens it. **Nothing else changes.**

WHERE THE VOICE STOPS

Lab values, dosages, allergies and the immunisation certificate are set in plain type on plain white, on a grid, **with no radius above 8px.**

MYHERO FONTS

JETBRAINS MONO · DATA

ABCDEF 0123456789 · 12.4 mmol/L · MRN 8842-1

You will never walk into an
appointment **unsure of where
you stand.**

Role	Size / weight	Where
Display	40 and 28 / 800	Section openers, signage, screen titles
Heading	20 / 700 · -2%	Card titles, result names
Subhead	16 / 600	Table leads, inline labels
Body	15 / 400 · 1.55	Every piece of reading copy
Data	14 / 500 mono	Values, dosages, identifiers
Eyebrow	10 / 600 mono · +16%	States, section labels

THREE HARD RULES

Body never drops below 15px. A parent reads this one-handed, at night, in a corridor.
Display never carries a clinical number. Dosages and values are mono, always.
No third face. A new voice means a new weight.

NEXT STEPS

What closes this book at v1.0

#	Step	Detail	Owner	Status
1	Choose a territory	Territory 01 or 02. They are alternatives, not layers — nothing downstream can begin until this lands	Dr Amira	Blocking
2	Answer the character question	Only if Territory 01 is chosen. A character is a permanent illustration, motion and voice commitment	Dr Amira	Blocking
3	Trademark & store clearance	Search MyHero in the relevant classes and in app-store results; clear the character separately if carried	Client / legal	Not started
4	Build the chosen mark	Optical correction, construction grid, full variant set and the complete file package	Brand Method	Awaiting step 1
5	Build the UI kit	Components, states and screen templates for the parent app and the clinic-side view	Brand Method	Phase 2
6	Test with parents	Six to eight parents at Elite Care, including at least two with a child under ongoing treatment	Joint	Phase 2
7	Issue guidelines v1.0	This book completed, provisional marks replaced and every pending tag cleared	Brand Method	Phase 2

OPEN QUESTION 01

Does **My Health Record** appear inside the lockup, or only in the app store listing and clinical settings?

OPEN QUESTION 02

Is the **endorsement lockup** with Elite Care required for signage, letterhead and referral material?

OPEN QUESTION 03

Does the record serve **children only, or the whole family**? A path built on the childhood schedule does not extend to an adult without rework.

PLACEHOLDER NOTICE

Every mark in this book is **provisional**. Photography is indicated rather than shot, and the clinic address is pending confirmation.
