Who We Are, and What We Stand For

IAQ Group is your total facility solutions provider, building the environments that cannot fail.

Established in Malaysia in 1995, we now deliver across seven countries: wafer fabs, data centres, battery plants and life science facilities, from first drawing to lifetime care.

1995

VISION

Regional facility solutions leadership

To be a regional Facility Solutions provider with engineering excellence to facilitate technological innovation and advancement in quality of life.

MISSION

Innovative, sustainable solutions

Providing innovative sustainable facility and engineering solutions benefitting our clients and stakeholders, driven by our leadership, employees and partners globally.

CORE VALUES

01

Safety First

Safety before speed, on every site, without exception.

02

Quality Consistency

The specification is the standard. Consistency is what makes it verifiable.

03

Honesty and Integrity

Governed conduct with clients, partners and regulators.

04

Efficiency & Proficiency

Disciplined delivery that protects schedule and cost.

05

Engineering Capabilities

Depth across CSA and MEP, held by engineers, not intermediaries.

06

Pursuit of Excellence

The standard rises with every project delivered.

Certified to ISO 9001, 14001 and 45001, with ESG principles carried into every project.

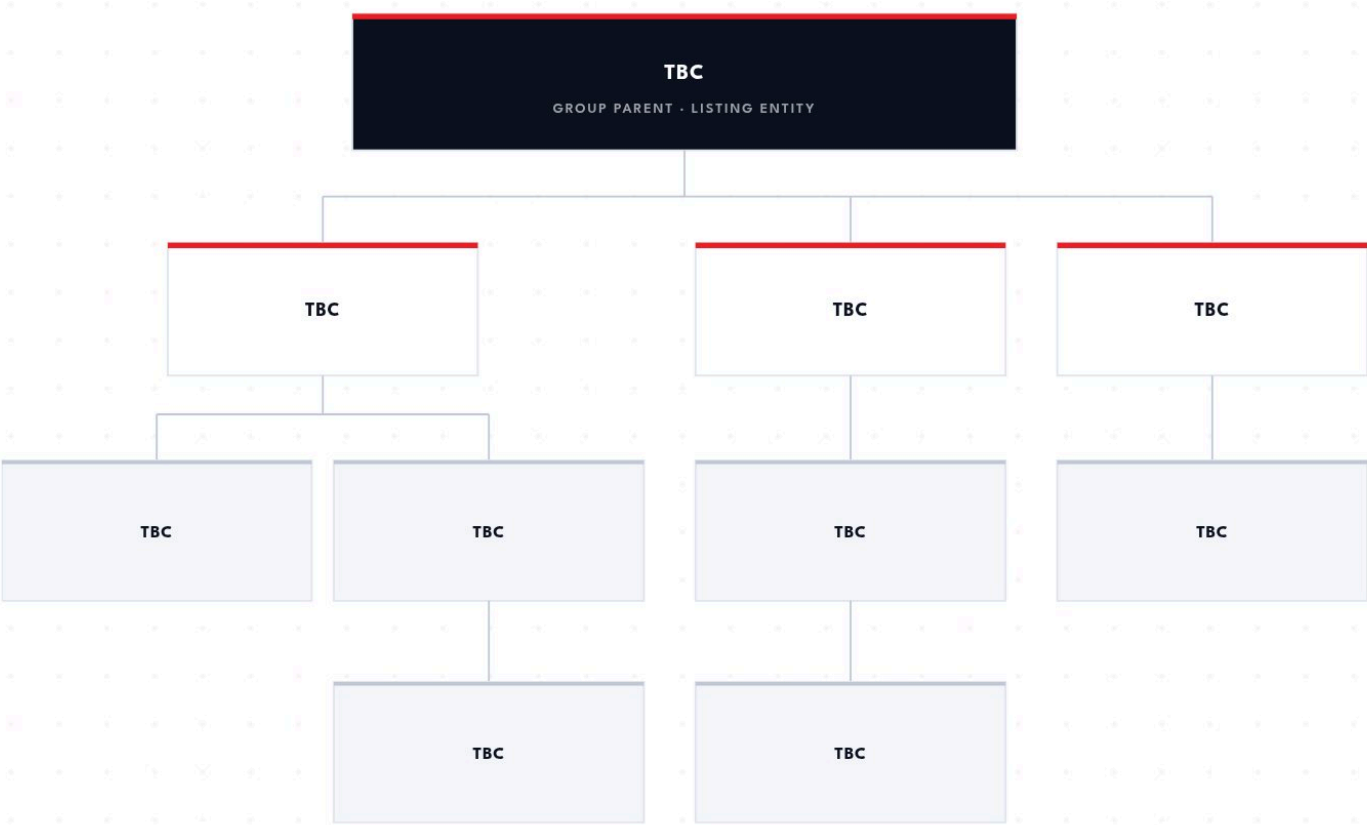

How the Group Presents

The public sees **one brand: IAQ and its three pillars.**

Subsidiary companies operate behind the group brand and receive enquiries through it.

Public face	IAQ GROUP
Capability presented as	THREE PILLARS
Subsidiary names	WITHHELD • ON REQUEST
Enquiry routing	THROUGH THE GROUP
Accountability	SINGLE PARTNER

One brand to the market. One accountable partner to the client.

BRANCH OFFICES • PENANG • JOHOR • SARAWAK

Seven Countries, One Standard

OPERATIONS

Malaysia

Home market since 1995. Group headquarters at Shah Alam, branch office in Penang.

Germany

European engineering presence, Dresden.

India

Semiconductor delivery, Ahmedabad and Dholera.

Ireland

European operations.

Singapore

Regional operations and client coverage. Two registered entities.

Sweden

EV battery gigafactory delivery, Skellefteå since 2020.

United States

Advanced tech facility localisation, since 2026.

The group operates a single delivery standard across every market. Local presence carries the relationship; the engineering standard does not vary by geography.

3

The People

The founder, the leadership and the culture behind the work

A Message From the Group

“We started with a simple discipline: build the environment exactly as the specification demands, then stand behind it for its working life. Three decades later that discipline is still the whole business.”

IR. TIEW SOON AIK • FOUNDER

From one cleanroom specialism, IAQ now designs, builds, commissions and maintains the facilities industry depends on. The scale changed. The standard did not.

Our clients build the hardest projects on their roadmap, and get one chance to build them right. They need a specialist with the record.

CONTROLLED ENVIRONMENT DELIVERY, VALIDATED TO CLASS

4

What We Do

What we build, and how

Three Units, One Roof

Three units under one accountable group, from first drawing to lifetime care.

IAQ SOLUTIONS SDN BHD

Engineering, Procurement, Construction & Commissioning

EPC from conception to operation, completion and maintenance. Every aspect managed, from initial design through commissioning, so hi-tech owners can bring their visions to life.

IAQ UTILITY SOLUTIONS SDN BHD

Process Critical Utilities & Total Tool Install

EPCM partner for semiconductor manufacturing, delivering process critical utility infrastructure and total tool installation. Bridges facility readiness and manufacturing start-up to accelerate fab ramp-up.

IAQ ENERGY FACILITY MANAGEMENT SDN BHD

Energy Management

Energy management solutions that optimise operations and reduce carbon footprint, keeping the facility efficient across its operating life.

OUR PROCESS

01 Design & Consult

Engineering design across CSA and MEP, setting the spec.

06 Maintain

Planned maintenance and energy care through the operating life.

05 Test & Commission

Systems and classification testing, verified to spec.

One Roof
EVERY STAGE

02 Procure

Specification led procurement, managed around long lead items.

03 Build

Construction under a disciplined safety and quality regime.

04 Tools Hookup

Total tool installation and hook up, bringing the line to life.

One Team, Every System

Nine disciplines, held in house, working as one across the project lifecycle.

01 ENVELOPE & STRUCTURE	02 POWER & SERVICES	03 ENERGY & CONTROL
 Cleanroom System A sealed space with filtered air, held to its class.	 Air Conditioning · ACMV Temperature, humidity and airflow held around the clock.	 District Cooling & Heating One central plant serving many buildings. Efficient at scale.
 Civil, Structural & Architectural Foundation, frame and shell, shaped to what happens inside.	 HT & LV Electrical Bulk power on site, delivered down to the tool.	 Tools Hookup The final connection, bringing the line to life.
 Fire Protection Detection, alarm and suppression, integrated as one.	 Process Utilities The water, gases and chemicals that keep production running.	 Facility Monitoring & Control One system watching the whole facility: alarms and trends.

Nine systems, one contractor.

No package left between trades, no interface left to chance, and one line of accountability from the first drawing to the day it runs.

Safe, On Time, On Budget

SAFETY Sites are complex, live and often occupied. Safety governs the sequence.

01

Before mobilisation

ISO 45001 management, and a site plan written before anyone mobilises.

02

On site

Live and occupied sites worked under permit. Every contractor, one regime.

03

After the fact

Incidents reported, investigated and closed. The record reaches the client.

SCHEDULE & COST Schedule and cost are one discipline, never traded against each other.

01

Integrated programme

Design, procurement and construction as one sequence. Long lead tracked from award.

02

Change control

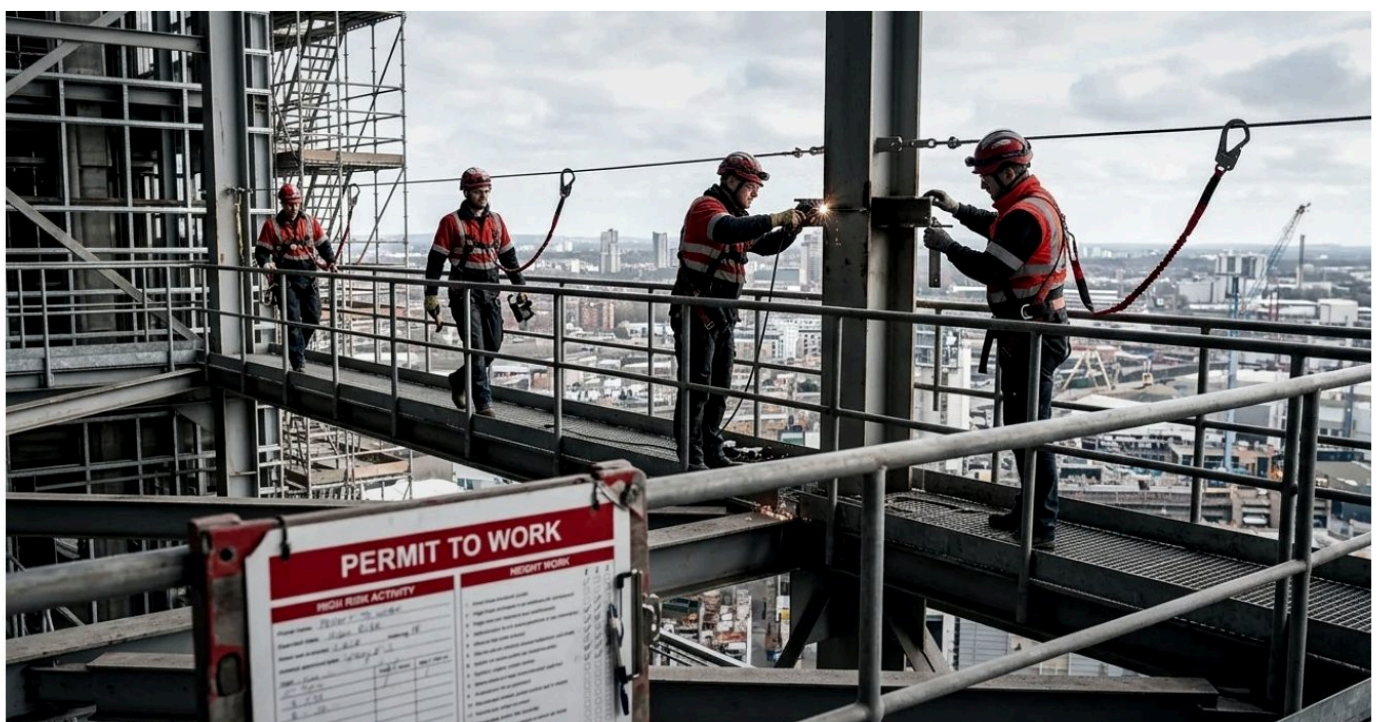

Every change carries its cost and schedule impact before it is committed.

03

Early warning

What threatens either one reaches client governance while it can be acted on.

5

WHAT WE ARE

Design, procurement, construction, commissioning and lifetime care, delivered as one accountable partner.

Semiconductor & Data Centre

Semiconductor

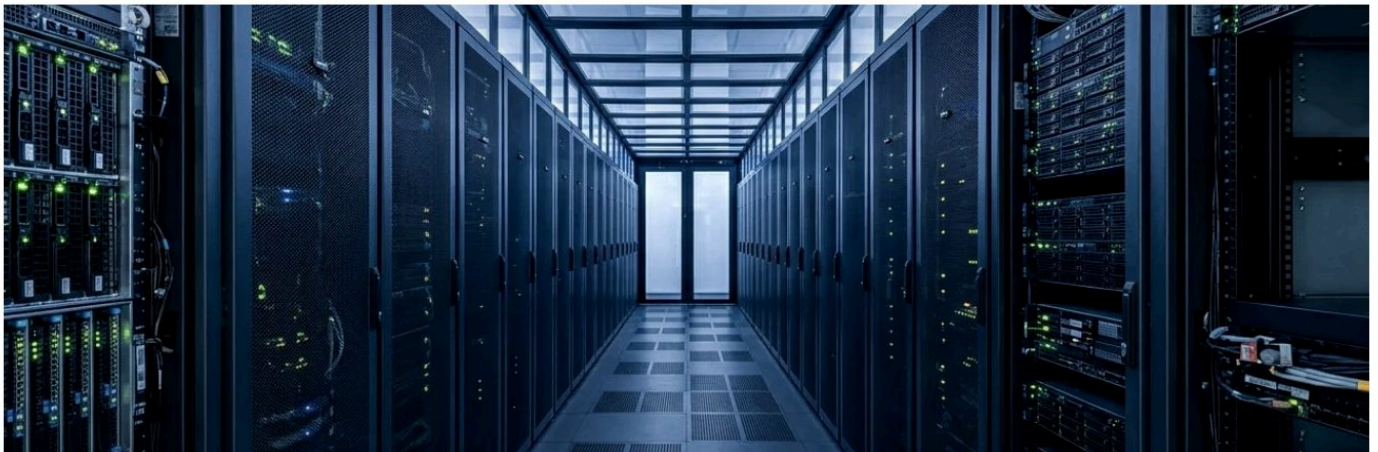

The most stringent contamination control in industry, and the least tolerance for delay.

- 300mm and 200mm wafer fabrication facilities
- Sub-fab and process utility infrastructure
- Assembly and test facilities
- Tool installation, hookup and live fab retrofit

CLEANROOM CLASS
TO ISO CLASS 1

DELIVERED IN
MALAYSIA • INDIA • EUROPE

Data Centre

Uptime is the specification. Thermal management, power resilience and airflow decide performance.

- Hyperscale and colocation facility delivery
- Electrical infrastructure and redundancy
- Precision cooling and airflow systems
- Containment and thermal separation

DESIGN POINT

HANDOVER
COMMISSIONED TO AVAILABILITY TARGETS

EV Battery & Photovoltaics

EV Battery

Dry rooms and contamination control, at a scale new to most builders.

- Dry room design and delivery
- Ultra low humidity control systems
- Cell and module production environments
- Process utility and chemical distribution

ENVIRONMENT

DRY ROOM • ULTRA LOW RH

SECTOR

EV AND ENERGY STORAGE

Photovoltaics

Solar cell and module lines, where yield depends on the environment.

- PV cell and module production facilities
- Cleanroom and dry environment control
- Specialty gas and chemical distribution
- Process cooling, exhaust and abatement

CRITICAL SYSTEMS

GAS, CHEMICAL AND ABATEMENT

DRIVER

YIELD AND LINE UPTIME

District Cooling & Bio LifeScience

District Cooling & Heating

One central plant serving many buildings. Efficient at scale.

- District cooling and heating plants
- Thermal distribution networks
- Chiller plant design and upgrading
- Long term operation and maintenance

DELIVERY MODELS

EPC · BOT · COOLING AS A SERVICE

REFERENCE

KLCC, MALAYSIA'S LARGEST PLANT

Bio LifeScience

Regulated environments where validation is not a milestone, it is the licence to operate.

- Pharmaceutical production facilities
- Medical device manufacturing cleanrooms
- Biotech and laboratory environments
- GMP aligned delivery and validation support

REQUIREMENT

VALIDATED ENVIRONMENTS

HANDOVER

FULL DOCUMENTATION PACKS

Food & Beverages

Hygiene, washdown and contamination control set the specification.

- Food grade processing environments
- Controlled temperature and humidity zones

- Hygienic, washdown rated construction
- Process utility infrastructure

WASHDOWN RATED, HYGIENIC DRAINAGE

Delivered Since 1995

The projects named in the pages that follow are the ones IAQ can name. Work delivered inside an owner's own programme, or held under client confidentiality, is not listed here.

WHERE THE WORK HAS BEEN BUILT

Malaysia & Singapore

Wafer fabs, data centres and pharmaceutical plants, and the largest district cooling centre in Malaysia.

Europe

Gigafactory dry rooms, semiconductor cleanrooms and EPCC works across five countries.

China

Cleanroom, MEP and tool hook up across the manufacturing belt: display, precision, life science and research.

Malaysia & Singapore

Semiconductor, data centre, life science and food & beverage · part one of two

Teksend Photomask, Singapore	EPCC for cleanroom, ACMV, electrical, process utility, BMS, PA, WWT, UPW and tool hook-up.	Class 1 – 10K
Micron MSH Tool Hook-Up, Singapore	2,000 progressive tool hook-up services for MSH.	Tool hook-up
Micron F10A & F10NX, Singapore	F10NX office optimisation. Interior design and mechanical fit-out works.	-
Caterpillar Asia, Singapore	7T office renovation. Three storey office renovation works.	-
M Project	Design & build GC for a greenfield flavouring plant, 40,000 m². CSA, mechanical, electrical, process utilities, waste and fire protection.	-
P Project	Progressive built EPCM for the client's advanced packaging facility, 75,000 m². D&B GC: CSA, MEP, process utilities, chemical & gases, waste treatment.	ISO 4-7
Infineon Kulim Wafer Fab 3	GC for WP06, KLM3 expansion. Greenfield wafer fab with 35,000 m² cleanroom area. PCC for cleanroom and mechanical works.	ISO 4, 5, 6 & 7
XFAB Kuching 40K Expansion	D&B extension wafer fab, CUB and supporting facilities, 30k to 40k capacity, 40,000 m². CSA, MEP, process utilities, UPW, chemical & gases.	ISO 5, 6 & 7
SOITEC PRIA Expansion	EPCM consultant, design & build for the PRIA greenfield plant, 45,000 m², including all related MEP.	ISO 4, 5, 6 & 7
Robert Bosch Testing & Manufacturing Plant	GC for a greenfield testing and manufacturing plant, 25,000 m². Main building CSA, MEP and cleanroom package.	ISO 6 & 7
Wafer Fab Facility & Expansion	EPCC and design & build for FABIE A/B expansion. Cleanroom 1,000 m², new CUB 5,000 m².	ISO 5
P Project · MEP Works	PCC for brownfield MEP works. Retrofit of an existing office into a mega lab, 7,000 m².	P&C
Texas Instruments, Melaka	Facilitation works for residual management, 32,000 m². Mechanical, electrical, process utilities, T&C.	ISO 5, 6 & 7
Texas Instruments (M), Kuala Lumpur	DLP cleanroom project. Cleanroom architectural, mechanical, electrical, process utilities, plumbing and BMS.	ISO 5, 6 & 7
Western Digital (M), Petaling Jaya	Phase 2 and Phase 3 renovation and upgrading works: mechanical, electrical and cleanroom architectural.	ISO 6
WD Media (M), Penang	MA 28 & MA 29. PCC for cleanroom, HVAC, electrical, fire protection, FMCS, process utilities and hook-up.	ISO 6
STMicroelectronics, Johor	Three storey production factory. Cleanroom architectural, ACMV, electrical, process utility and cleanroom works.	ISO 7
Infineon Technologies (M), Melaka	Block 8 testing, probe and assembly plant, 43,000 m². EPCM-GMP for C&S, cleanroom, air conditioning, process utilities and multi-storey carpark.	ISO 6 & 7
MEMC Ipoh	Greenfield project. Mechanical, electrical, process utilities, cleanroom, fire fighting, FMCS, CSA and tools hook-up.	ISO 3-7 · Class 1

Malaysia & Singapore

Life science, solar, data centre and district cooling · part two of two

Flextronics Shah Alam	PCC for 33kV substation, mechanical, cleanroom, C&S works.	ISO 7
First Solar Malaysia	PCC for mechanical and electrical works, First Solar KMW building in Kulim. CSA and M&E for forming gas plant. M&E for SCOI product.	-
AUO Sunpower, Melaka	Fab 3A project for solar cell manufacturing. CSA, utilities, HVAC, electrical, T&C.	-
160 MW Hyperscale Data Centre	Client confidential. Construction, completion, T&C for mechanical packages 1 and 2: office, data halls and mechanical utility building.	-
Microsoft DTC-KUL 03	9.6 MW data centre, KUL03 Phase 1. PCC for CHW and CW piping works.	-
Insulet	Electronic medical device manufacturing plant, greenfield. Design and build mechanical, cleanroom and electrical package.	ISO 8
Vital Healthcare	Medical device manufacturing plant, greenfield. GC for civil & structural, 33kV substation, mechanical, electrical and process utilities.	ISO 8
Ain Medicare	Proposed one unit pharmaceutical building. EPCC civil, structural and architectural, cleanroom system, mechanical and electrical.	ISO 8

What Comes Next

Sustainability, governance and readiness for the next stage

Building for the Operating Life

Controlled environments are energy intensive by design. The responsible position is to build them efficiently, then keep optimising them.

ENVIRONMENTAL

20 Tonnes per annum carbon reduced

ISO 14001 certified

Environmental management, independently registered and audited.

Efficient by design

Energy is engineered out at the specification stage, not after handover.

Monitored and optimised

Consumption tracked against operating targets through facility management.

Compliant in every market

Local environmental regulation met wherever the group operates.

SOCIAL & GOVERNANCE

Social accountability

The well being and safety of our employees and communities first, in a diverse and inclusive workplace built on ethical labour practices.

2.6M

SAFE MANHOURS ON
A MAJOR PROJECT

Corporate governance

Transparency, accountability and ethical decision making, held to the standards our clients, partners and regulators audit us against.

3

CERTIFIED MANAGEMENT
SYSTEMS, EXTERNALLY
AUDITED

Governed Conduct

The group is preparing to list. That has already changed how it runs.

✓	Audited conduct	Financial and operational, independently audited.
📄	Documented systems	Management systems written down, group wide.
🛡️	Board level rules	On publication and on client confidentiality.
📊	Structured risk	Managed and reported, not handled case by case.
🔗	Open governance	Project reporting the client side can read.
★	Listing grade now	Applied before it is required.

Where to Find Us

Offices across Malaysia, Singapore, Germany, Ireland and India.
Enquiries from any market are routed through the group.
