THE COMPANY

COMPANY INTRODUCTION

Your journey, your way.

Imagine stepping into a world where every ride is smooth, every moment effortless, and every destination easily reachable. At **Altigo**, we believe transportation should not just be a means to an end, but an experience that elevates your day and simplifies your journey.

Altigo is more than an elevator and escalator provider — we are your trusted partner in modern vertical mobility. With cutting-edge technology, exceptional craftsmanship, and a commitment to safety and sustainability, our products are designed for the demands of today's fast-paced urban lifestyles.

Welcome to Altigo, where innovation meets reliability. Whether residential, commercial, or industrial, we provide solutions that transform spaces and elevate lives.

Innovation

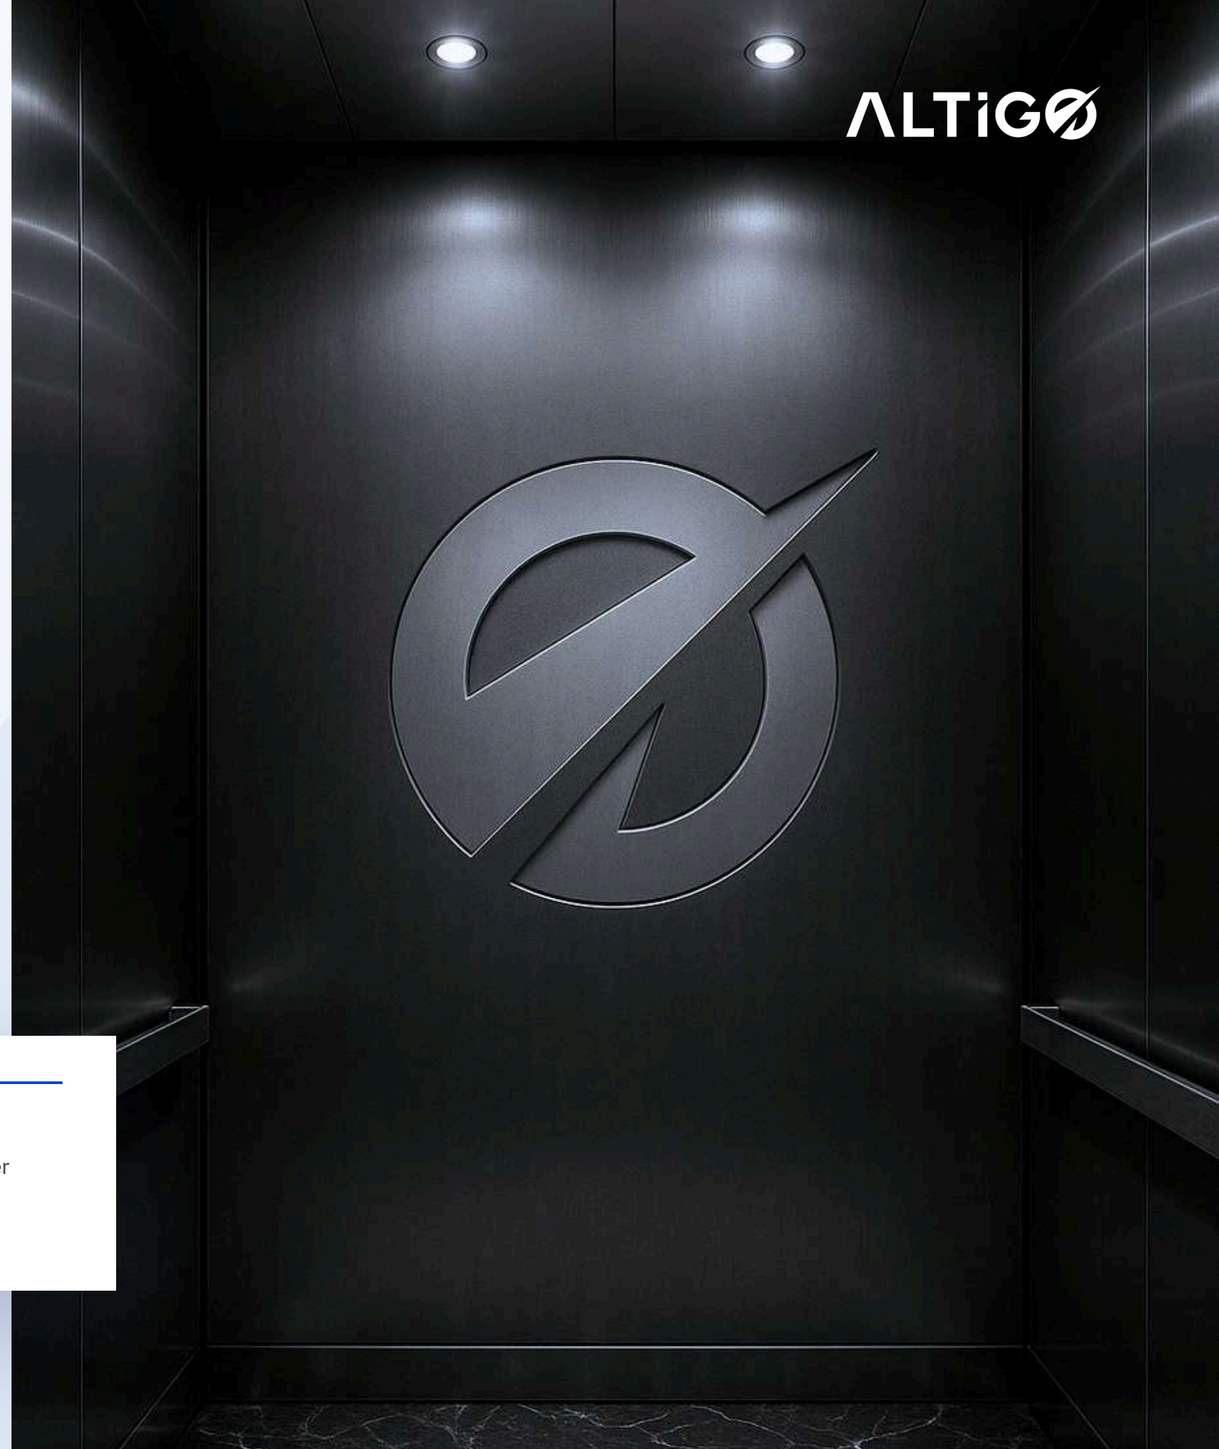

Permanent magnet drives, IoT monitoring and energy regeneration built in.

Reliability

Engineered and tested for smooth, quiet, dependable everyday service.

Sustainability

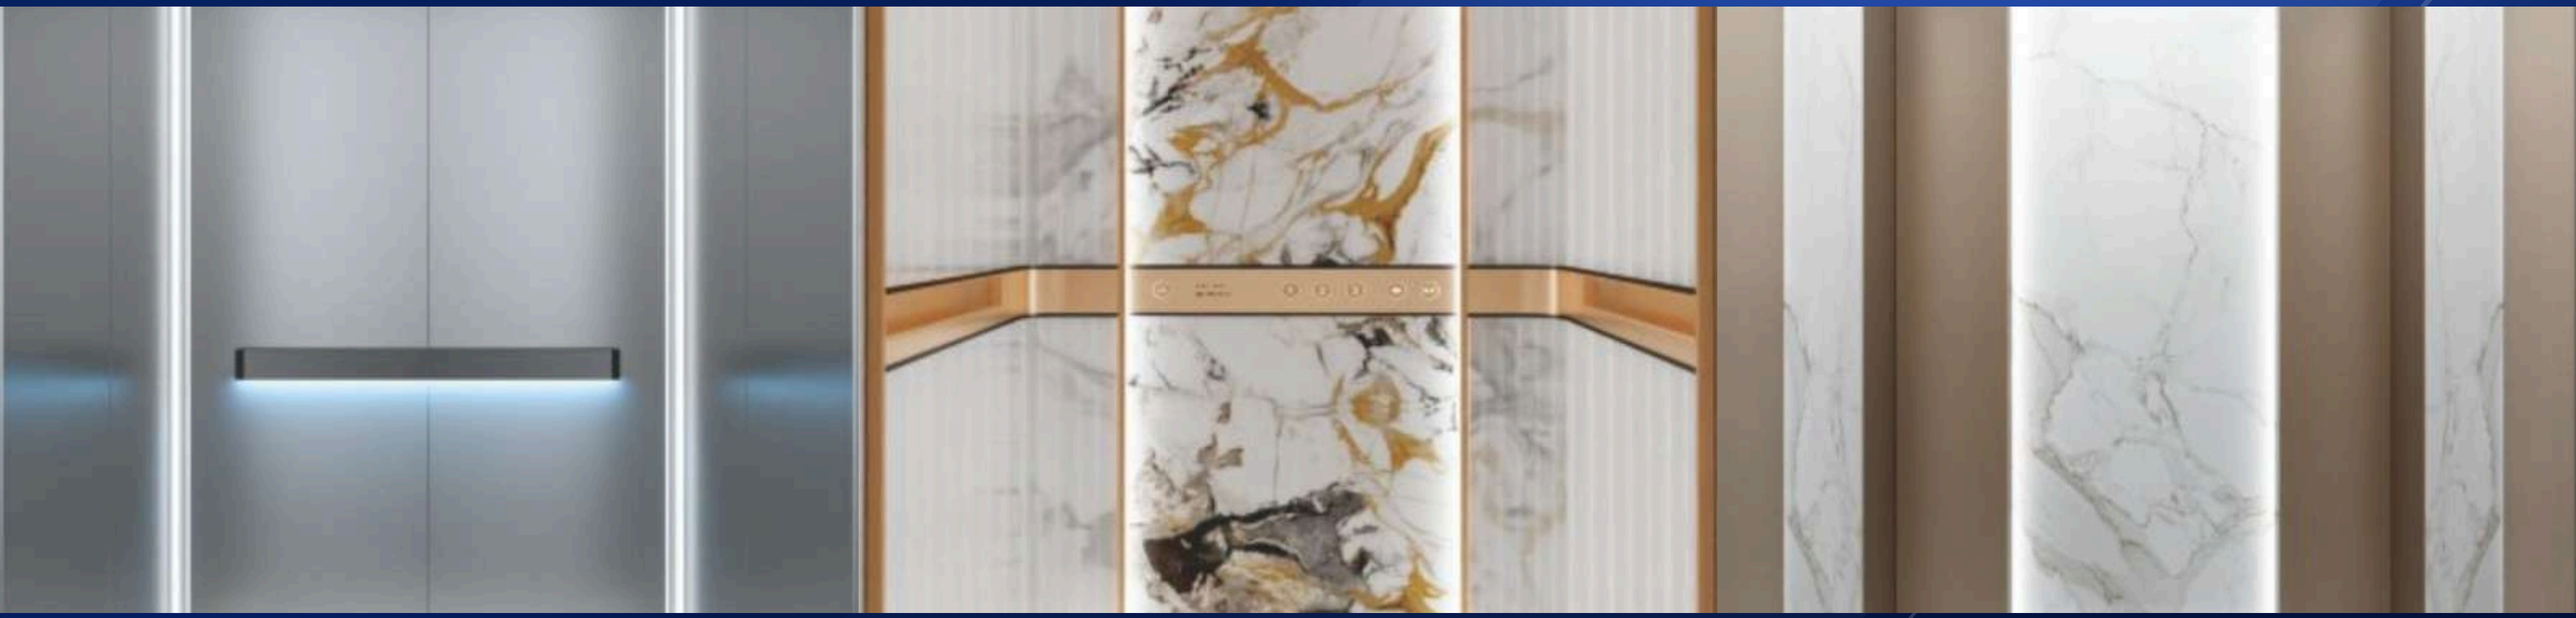

Lower running energy and a longer service life across the range.

THE RANGE · DESIGN

ELEVATOR CAR DESIGN

TAILORED TO THE ARCHITECTURE

Elegant car designs tailored to architectural concepts.

From ceiling height and lighting to wall finishes, colour schemes and flooring materials, every elevator car is designed to complement modern architectural environments — refined, comfortable and visually harmonious.

Intuitive operating panels and clearly visible indicators enhance usability, while smooth, reliable movement ensures a seamless experience. Designed with hygiene, convenience and durability in mind, Altigo cars deliver functional excellence and elevated passenger comfort.

BESPOKE INTERIORS | ARCHITECTURAL FINISHES | INTUITIVE PANELS | HYGIENIC MATERIALS | SMOOTH & QUIET | LED AMBIENCE

ENGINEERING · QUALITY

CORE SAFETY & PERFORMANCE

Every Altigo lift is assembled from internationally certified components — traction, control, door and multi-layer safety systems — and each one is verified before it leaves the factory.

SIX SYSTEMS · ONE STANDARD

01

Traction Machine

Safe operation for 20 years.

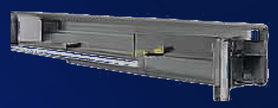

02

Control Cabinet

100+ tests before it leaves the factory.

03

Door System

Adapts to complex site conditions.

04

Speed Governor

3× the national standard lifting test.

05

Safety Gear

Service life up to 30 years.

06

Buffer System

15× the national standard drop test.

THE RANGE

TWO CONFIGURATIONS

FOUR DRIVE PLATFORMS

Altigo passenger lifts come in a **machine room (MR)** configuration for mid- and high-rise buildings, and a **machine-room-less (MRL)** family for tighter shafts and shorter rises. A **compact ≤450 kg** variant suits homes and low-traffic floors. All run 2:1 traction reeving with centre-opening doors.

MR · TRACTION 2:1

MACHINE ROOM

Permanent magnet gearless traction across the full load range, with speeds up to 2.5 m/s for taller buildings.

Load	**630–2000** kg
Speed	**1.0–2.5** m/s
Car height	**2400** mm

MRL · TRACTION 2:1

MACHINE ROOM LESS

No separate machine room — the drive sits inside the shaft. Defined overhead (4350–4950) and pit (1500/1600) per speed.

Load	**630–1600** kg
Speed	**1.0 / 1.75** m/s
Pit	**1500 / 1600** mm

COMPACT · ≤450 KG

COMPACT / HOME

A small-footprint variant for residences and low-traffic floors, with a shallow pit and reduced overhead.

Load	**≤ 450** kg
Pit	**320** mm
Overhead	**4150** mm

Smaller shaft

Optimised structure leaves more car within a tight shaft.

2400 cabin

Integrated ceiling car height across the range.

Powerloss levelling

Emergency battery brings the car to the nearest floor and opens.

IoT monitored

Cloud service watches operation 24/7 for fast maintenance.

PROTECT EVERY HEALTH JOURNEY

MEDICAL ELEVATOR

SERIES

Altigo medical lifts are purpose-designed for hospitals, clinics, rehabilitation centres and nursing homes. Safety and hygiene are the primary considerations — making every move one of care and warmth.

Safe, comfortable, stable

Purpose-built structure and controls for uninterrupted, reassuring transport of patients and staff.

Large space for easy access

Wide, deep cabins account for special-needs groups, letting beds and medical equipment enter and exit smoothly.

Priority emergency call

A low-mounted emergency button lets passengers call for priority response — easy for wheelchair users and children to reach.

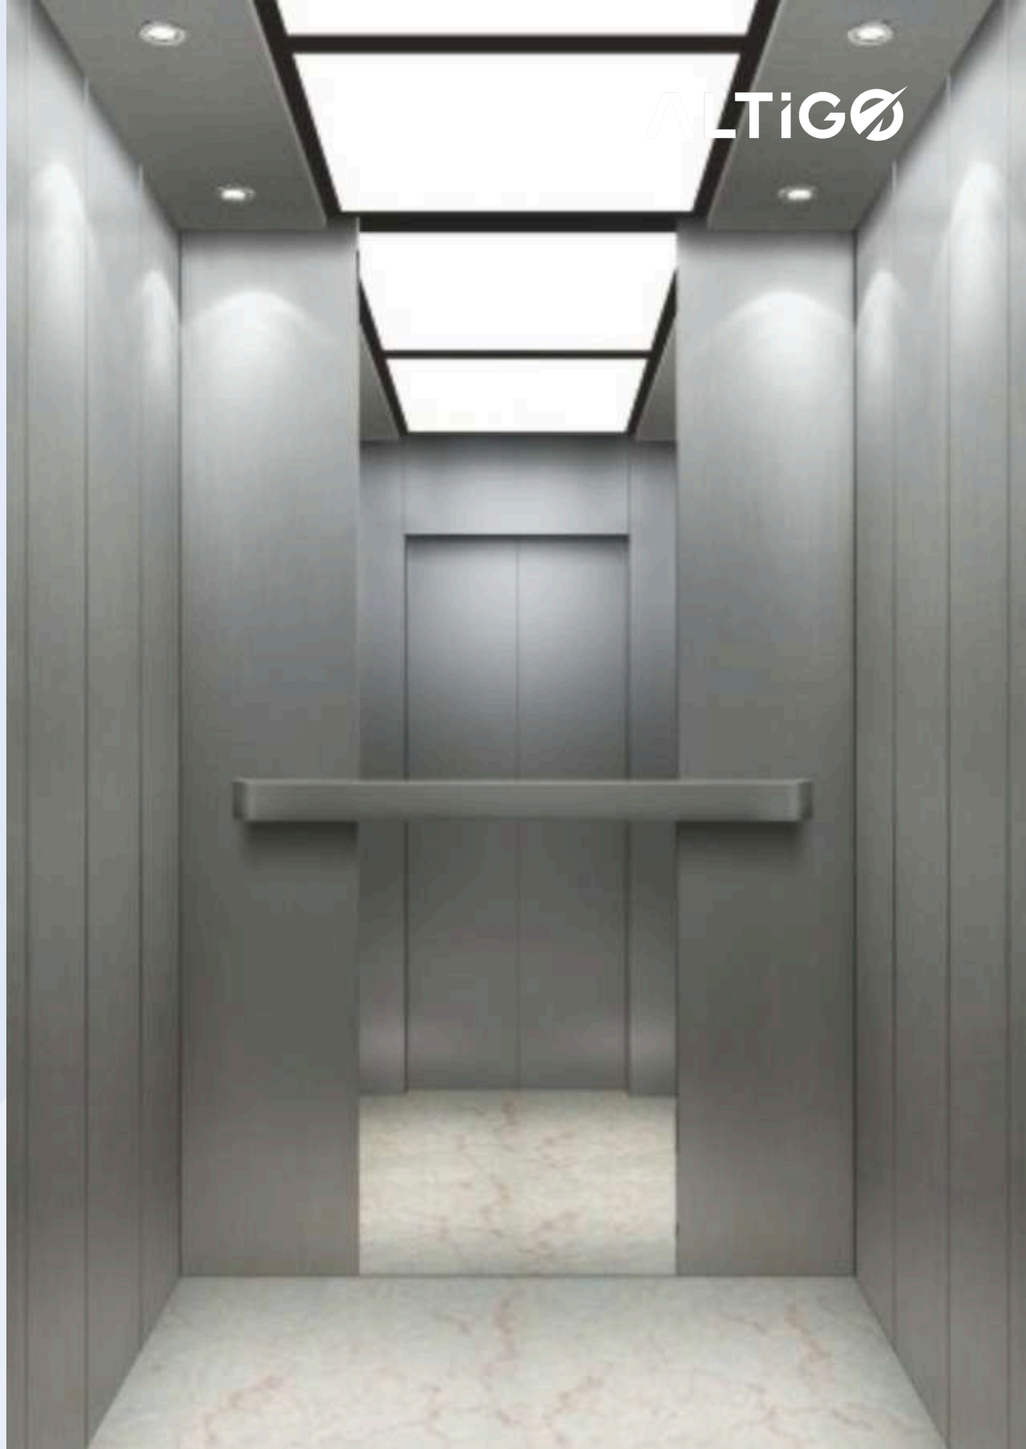

Anti-interference design

Full electromagnetic compatibility compliance prevents interference between precision medical equipment and the lift.

TIGO02-2408 — CAR DESIGN

CEILING	Matte stainless steel + acrylic + LED	REAR WALL	Mirror + matte stainless steel
SIDE WALL	Matte stainless steel	FRONT WALL	Matte stainless steel

ACCESSIBILITY · PLATFORM LIFTS

PLATFORM ELEVATOR

H SERIES & L SERIES

H SERIES · HIGH SHAFT UTILISATION

High shaft utilisation

The X-series footprint is 150 mm larger inside than the E-series — more usable car within the same shaft.

New gantry crane type

More uniform force distribution · more stable operation · three-sided opening achievable.

No-pit MRL

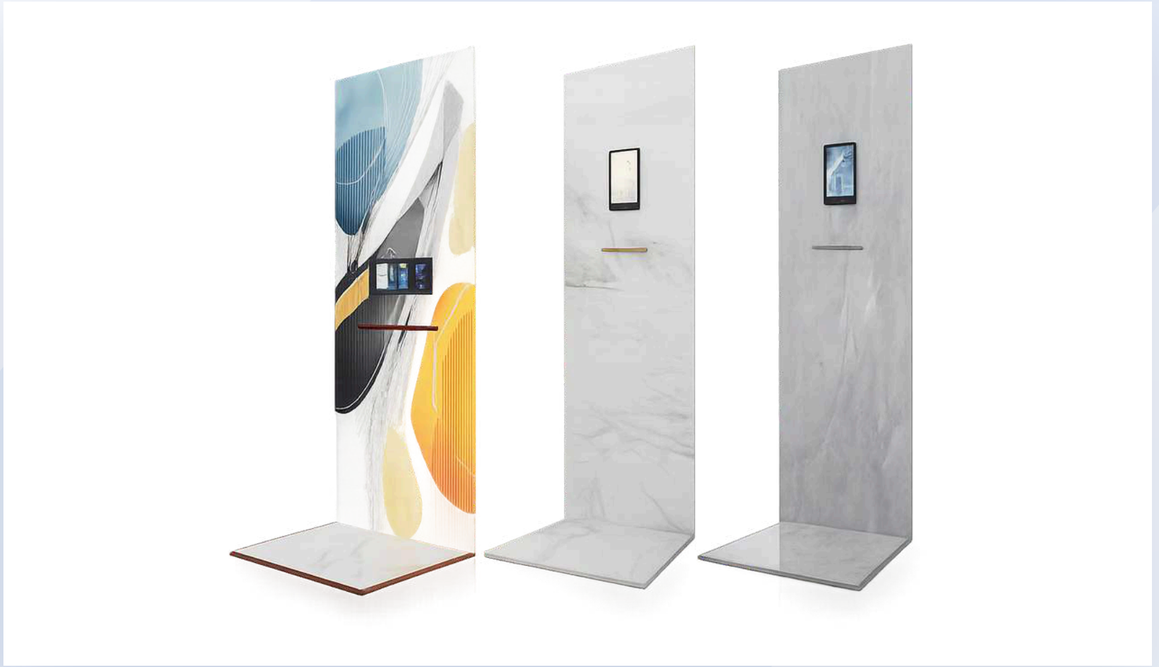

Pit depth 120 mm · overhead height 2600 mm.

After-sales guarantee

Four maintenance services per year · five-year warranty.

L SERIES · THE PLUS ERA

Small space, grand layout. Boundaryless aesthetics blended into a luxurious lifestyle, with finishes that disappear into the architecture.

Pit depth	Overhead height	Warranty
120 mm	**2600 mm**	**5 years**

CIVIL · GENERAL PARAMETERS

CONSTRUCTION PARAMETERS

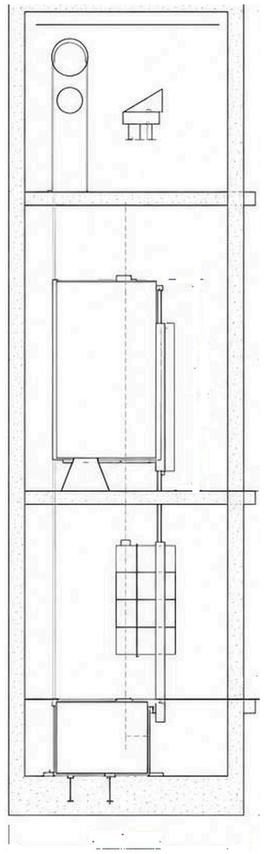

SHAFT · CAR · MACHINE ROOM

Every Altigo installation is set out from the same three arrangements — the shaft section, the machine-room plan and the shaft layout. They show how the equipment sits in the building: where the machine stands, how the car and counterweight are placed in the shaft, and what has to be left clear above the top floor and below the lowest.

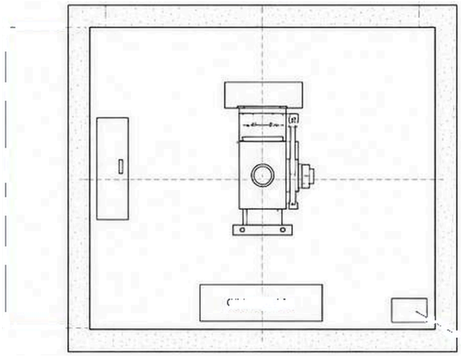

The drawings here are schematic and not to scale. They are the general arrangement, and are read together with the civil-works package.

Dimensioned shaft sections, machine-room arrangement drawings and the full civil-works package are issued separately for each project — matched to the load, speed and travel height specified. Final values are confirmed per project.
