Company at a Glance

ALTIGO Elevator Sdn Bhd is a Malaysian provider of integrated lift and escalator solutions, serving property management, building maintenance and construction since 2001.

FOUNDED

2001

Twenty five years of continuous operation in vertical transportation.

REGISTRATION

562238-H

Registered 22 October 2001 under the laws of Malaysia.

SERVICE

Escalator & Lift

Installation, modernisation and proactive maintenance.

CERTIFICATION

DOSH Certified

Approved supplier, installer and maintenance provider.

PRESENCE

Three States

Penang, Kuala Lumpur and Negeri Sembilan.

Company Overview

Who we are, what drives us and where we are going.
The foundations that every ALTIGO project is built on.

01 Our Objective 02 Our Aim 03 Vision & Mission 04 Operating Footprint

Our Objective

Our mission is to achieve excellence in vertical transportation by providing exceptional lift and escalator solutions ensuring the safety, reliability, and efficiency of every project through proactive maintenance, advanced technology, and a strong emphasis on customer satisfaction.

Global Collaborations

We thrive on robust partnerships with collaborators around the globe.

WORLDWIDE NETWORK

Expert Team

Our staff comprises highly skilled, certified professionals.

CERTIFIED ENGINEERS

Raising Standards

We are dedicated to improving mobility standards within buildings.

BETTER BUILDINGS

Client Connections

We focus on fostering enduring relationships with our clients.

LONG TERM TRUST

Safety Compliance

Upholding all safety regulations remains our highest priority.

DOSH ALIGNED

Our Aim

-  **ALTIGO Elevator Sdn Bhd** is a leading provider of comprehensive lift and escalator solutions, serving the property management, building maintenance and construction sectors across Malaysia.
-  Established in 2001, we have built a reputation for delivering excellence through our installation, modernisation and proactive maintenance services.
-  Our team of highly skilled professionals, supported by global partners, ensures that every project is executed with precision, safety and customer satisfaction at the forefront.
-  As an authorised and certified company, we are dedicated to enhancing the vertical mobility of buildings with innovative technology and an unwavering commitment to quality.

Vision & Mission

A future where accessibility and innovation converge

We envision a future where accessibility and innovation converge, empowering communities and businesses to improve their lives and environments with ease and confidence.

VISION FOR MOBILITY SOLUTIONS

Our goal is to become the leading mobility solutions provider in Southeast Asia and the Middle East. We aim to create products that transform transportation, ensuring it is seamless, safe and reliable.

Reliable, innovative and accessible mobility solutions

Our mission is to provide reliable, innovative and accessible mobility solutions that improve the daily experiences of individuals and businesses. We are committed to achieving engineering excellence, prioritising customer service and utilising forward thinking technology.

HOW WE DELIVER IT

Engineering excellence on every installation, a service culture that answers quickly, and technology chosen for the next twenty years rather than the next twelve months.

Operating Footprint

Three operating bases across Peninsular Malaysia keep our engineers within reach of every site we maintain, with a regional ambition across Southeast Asia and the Middle East.

REGIONAL AMBITION

Southeast Asia & the Middle East

Our stated goal is to become the
leading mobility solutions provider
across both regions, built on the
same standards we hold at home.

- Regional partnerships
- Certified product supply
- Technical training
- Long term service cover

Growth horizon

Brand Identity

What sets ALTIGO apart, the values we hold and the people who carry them into every building we serve.

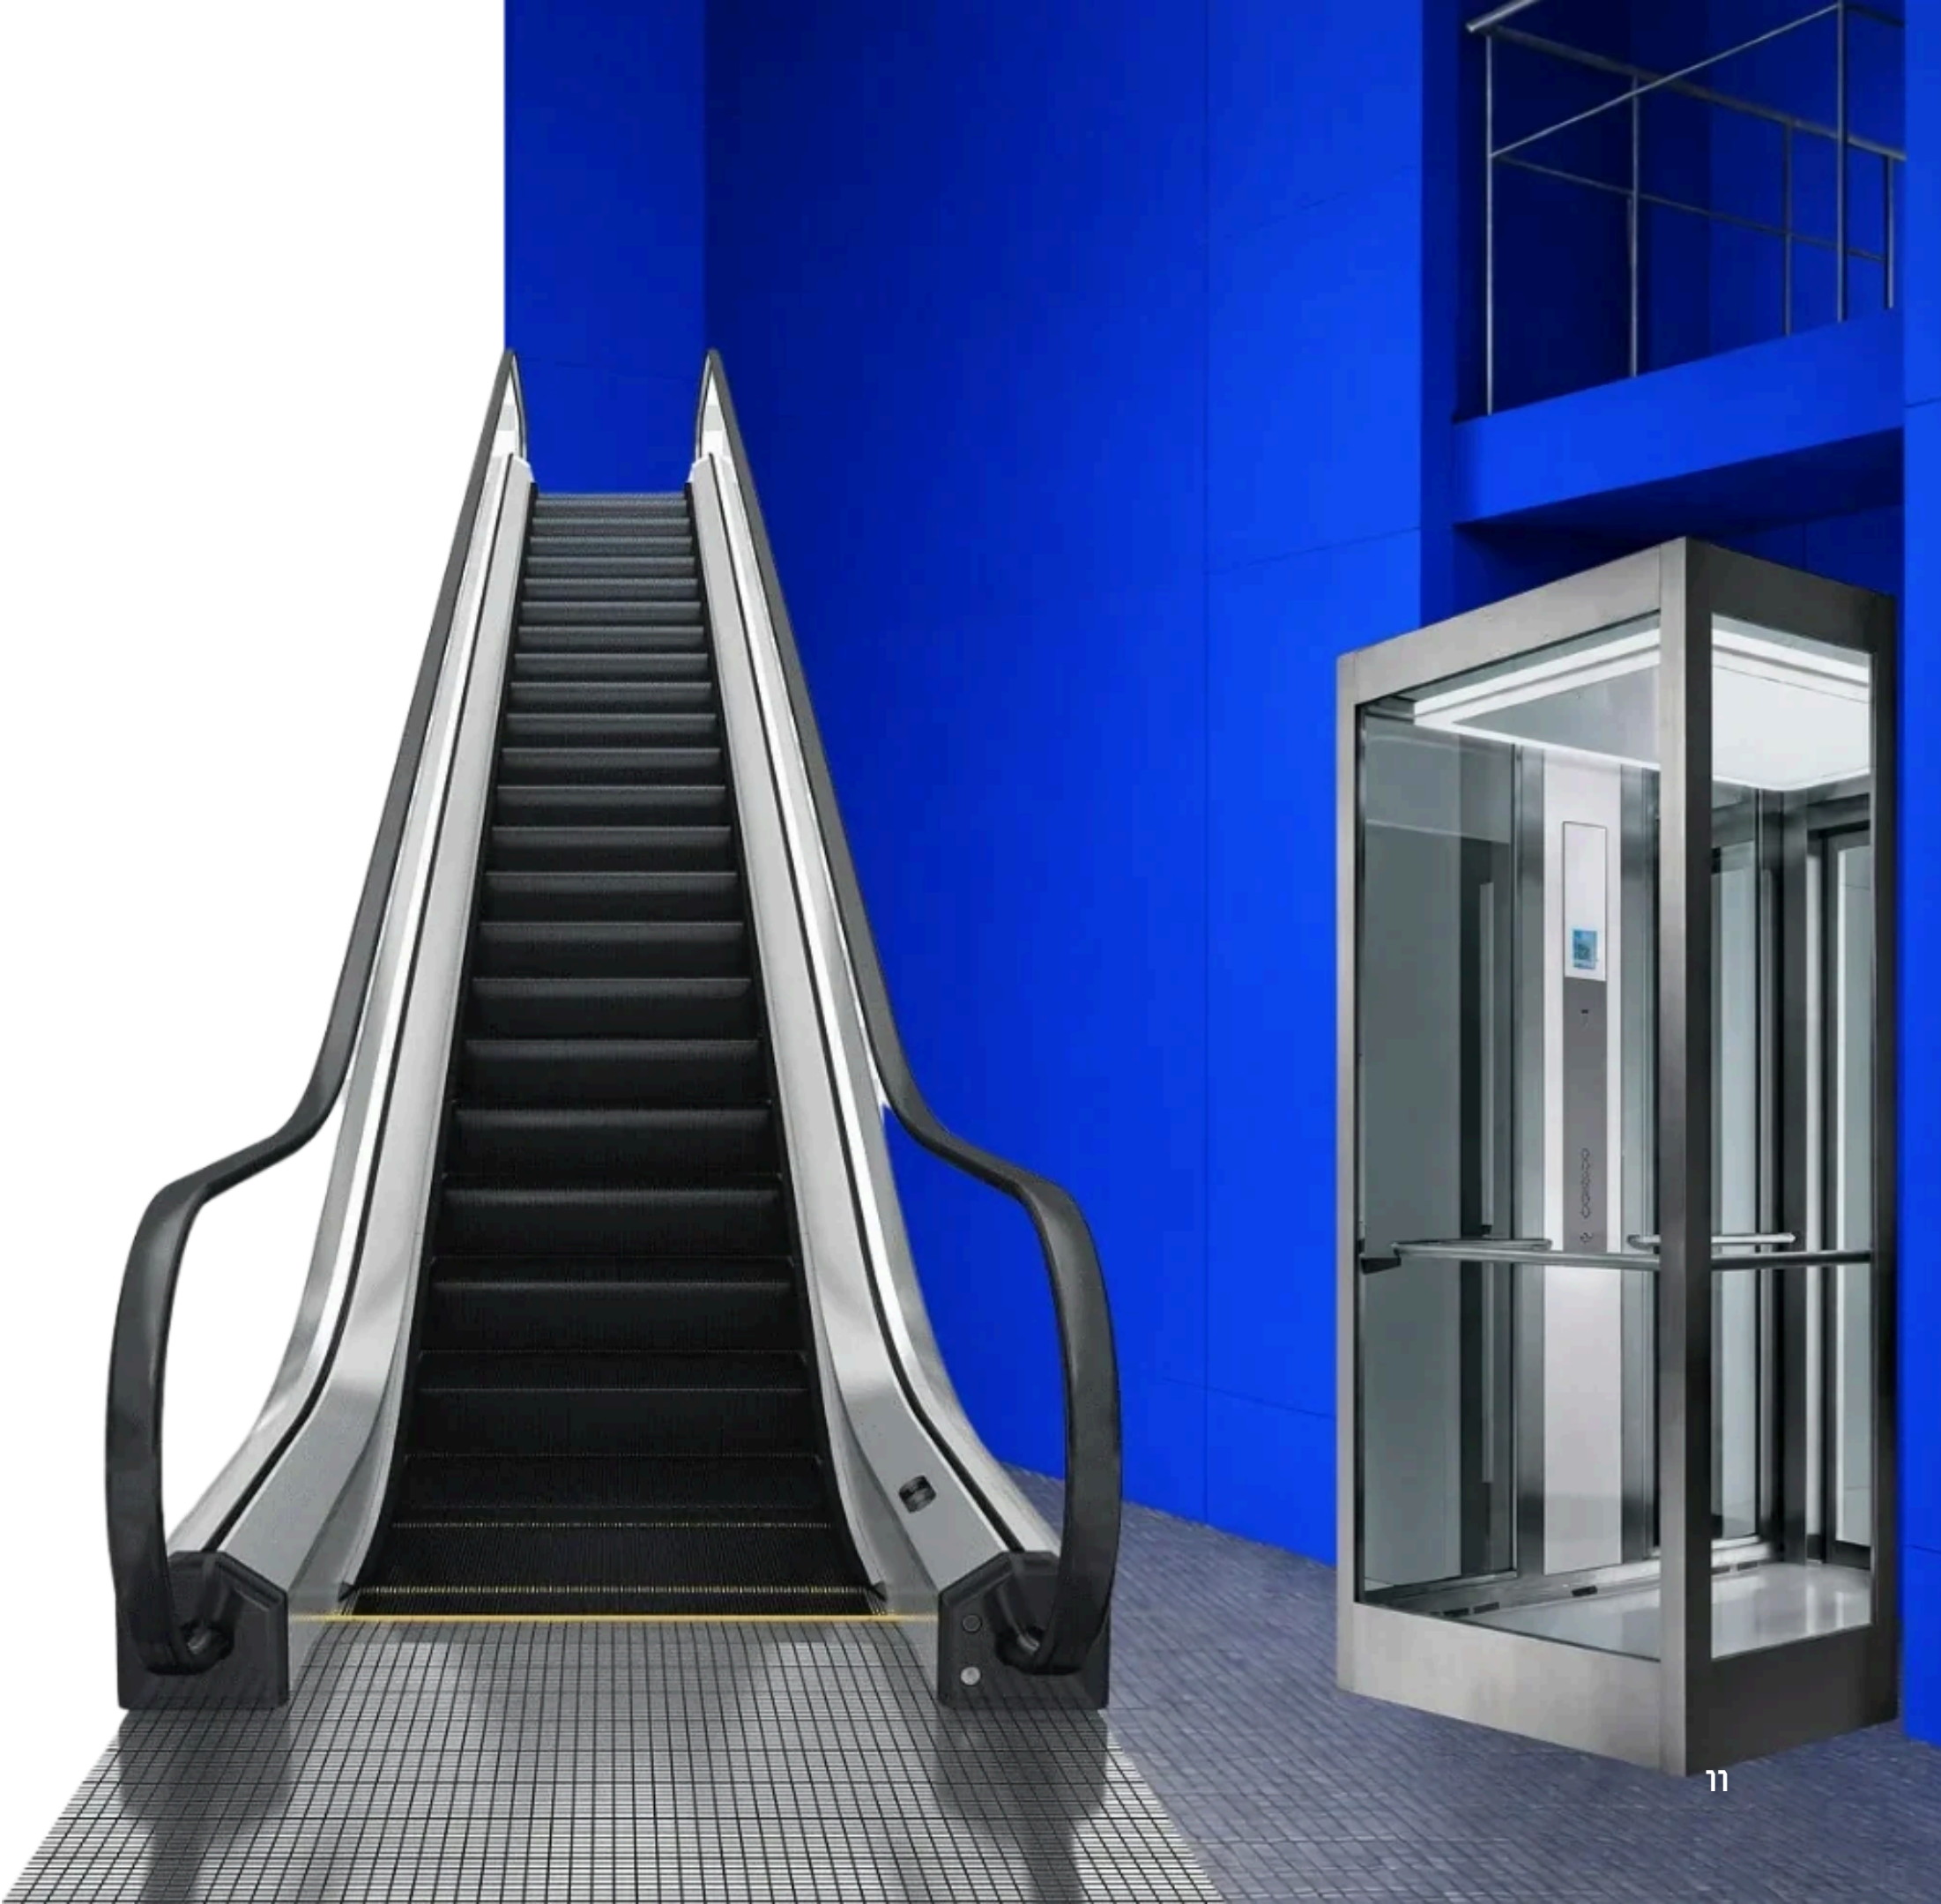

+ 01 . UNIQUE SELLING PROPOSITION

Brand USP

ALTIGO Elevator Sdn Bhd delivers industry leading lift and escalator solutions, combining twenty five years of expertise with proven technology and an unwavering commitment to safety and reliability.

Supported by global partnerships and a team of highly skilled professionals, we provide comprehensive services from installation to proactive maintenance, ensuring seamless vertical mobility for property management, high rise buildings and the commercial sector.

-  **Twenty five years of specialist focus**
Lifts and escalators only, since 2001. No adjacent trades, no divided attention.
-  **Globally certified technology**
Stade manufactured systems, examined by an accredited European notified body.
-  **One team for the full lifecycle**
Consultation, installation, maintenance and modernisation under one accountability.

The ALTIGO Difference

Four positions that separate a specialist from a supplier, and that clients return to us for after the first contract ends.

 One accountable partner

Consultation, supply, installation, testing, maintenance and modernisation sit with a single team. No handover gaps between contractors, and one number to call when something needs attention.

SINGLE POINT OF RESPONSIBILITY

 Certified engineering

Systems manufactured by Stade at certified facilities, examined by an accredited European notified body, and installed to DOSH requirements by our own certified technicians.

EN 81-20 & EN 81-50

 Prevention before repair

Structured preventive schedules and rapid response keep buildings running rather than reacting to breakdowns. Downtime is designed out of the service model, not managed after the fact.

PLANNED MAINTENANCE

 Local depth, global standard

Engineers trained locally and internationally through our Stade partnership, working from three Malaysian bases with the response time only a local team can offer.

MALAYSIAN TEAM

Our Value

Six principles that decide how we quote, how we install and how we answer the phone at seven in the morning.

Safety Without Compromise

Every system we design and install is held to the strictest safety benchmarks. Safety is the foundation every decision is built on.

Engineering Excellence

We leverage advanced technology from our global partnership with Stade to deliver precise, durable, purpose built systems.

End to End Service

From consultation to installation, maintenance and modernisation, we are with our clients for the full lifecycle of every system.

Proactive Reliability

Prevention is better than repair. Our maintenance philosophy keeps systems running and downtime near zero.

People First Thinking

Two decades of experience and a culture of continuous learning meet every client with expertise and genuine dedication.

Long Term Partnerships

We measure success by trust earned over years of consistent delivery, transparent communication and accountability.

+ 04 . LEADERSHIP

People Behind the Brand

Two generations of leadership, one standard. The company was founded on engineering discipline and is carried forward with the same conviction.

FOUNDER & MANAGING DIRECTOR
Mr. Ang Kam Keong

EXECUTIVE DIRECTOR
Mr. Ang Tse Wei, Melvin

Company Culture

Our culture is rooted in innovation, safety and excellence, and it shows up in how we treat both our clients and each other.

Rooted in Excellence

Our culture is rooted in innovation, safety and excellence. We foster continuous learning and collaboration, keeping our team ahead in an ever changing industry. Every choice is driven by integrity and an unwavering commitment to quality.

People Centric Approach

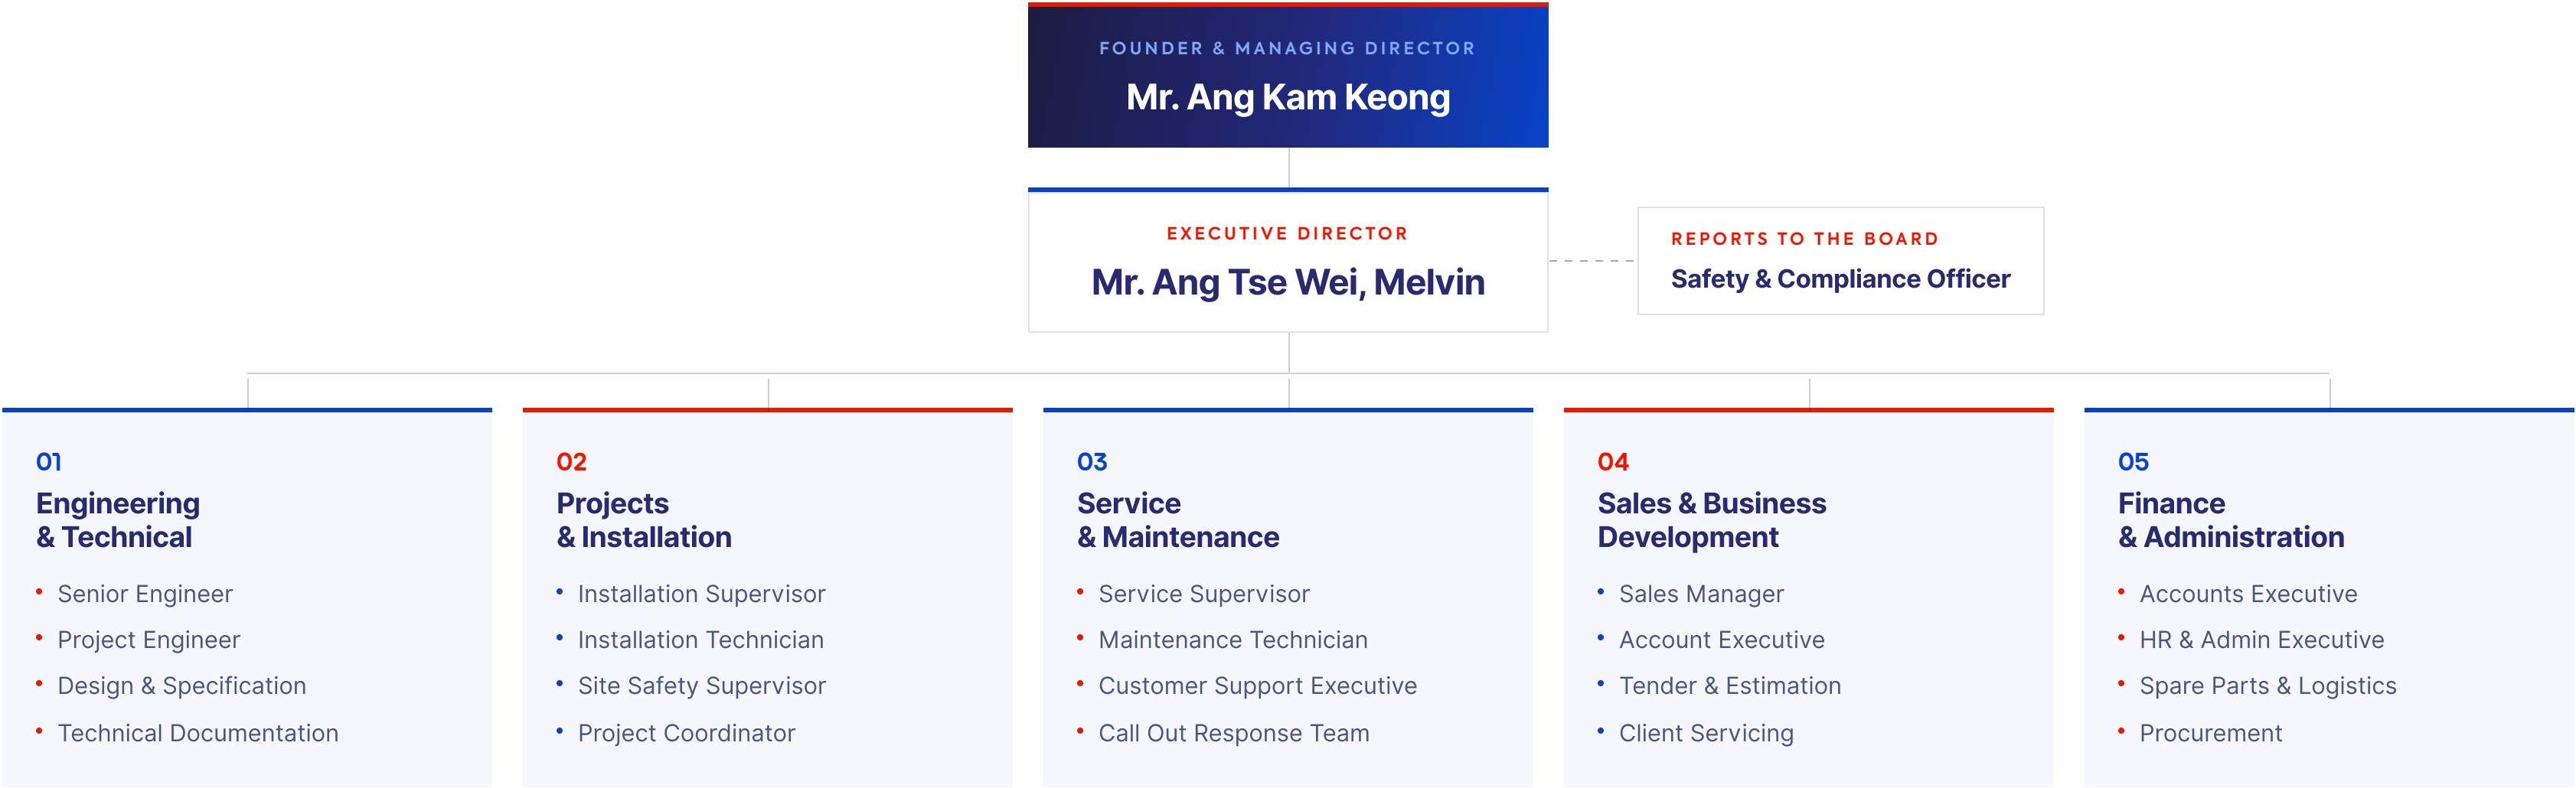

Our people are our priority. We nurture talent and create a supportive workplace where everyone is inspired to excel, built on mutual respect, open communication and a shared commitment to exceptional service.

United by Purpose

We are more than a business. We are a family united by a common mission, to elevate the standards of vertical transportation through safety, reliability and innovative solutions.

Organisation Chart

Two generations of leadership at the top and a deliberately flat structure beneath it, so a client’s issue reaches the person who can resolve it without travelling through layers.

02

Market & Performance

The demand behind vertical transportation
and the sectors we build for.

01 Market Statistics 02 Target Market

+ 01 . DEMAND

Market Statistics

Demand for lifts and escalators has climbed steadily for two decades, driven by density above ground and ageing equipment below it.

Urbanisation

High rise development fuels sustained demand across every urban market we serve.

Maintenance Needs

Ageing infrastructure drives recurring service and modernisation requirements.

Rapid Acceleration

The mid 2010s boom steepened the demand curve and it has not flattened since.

446

INDEX PEAK . 2024

100

BASE YEAR . 2000

4.5x

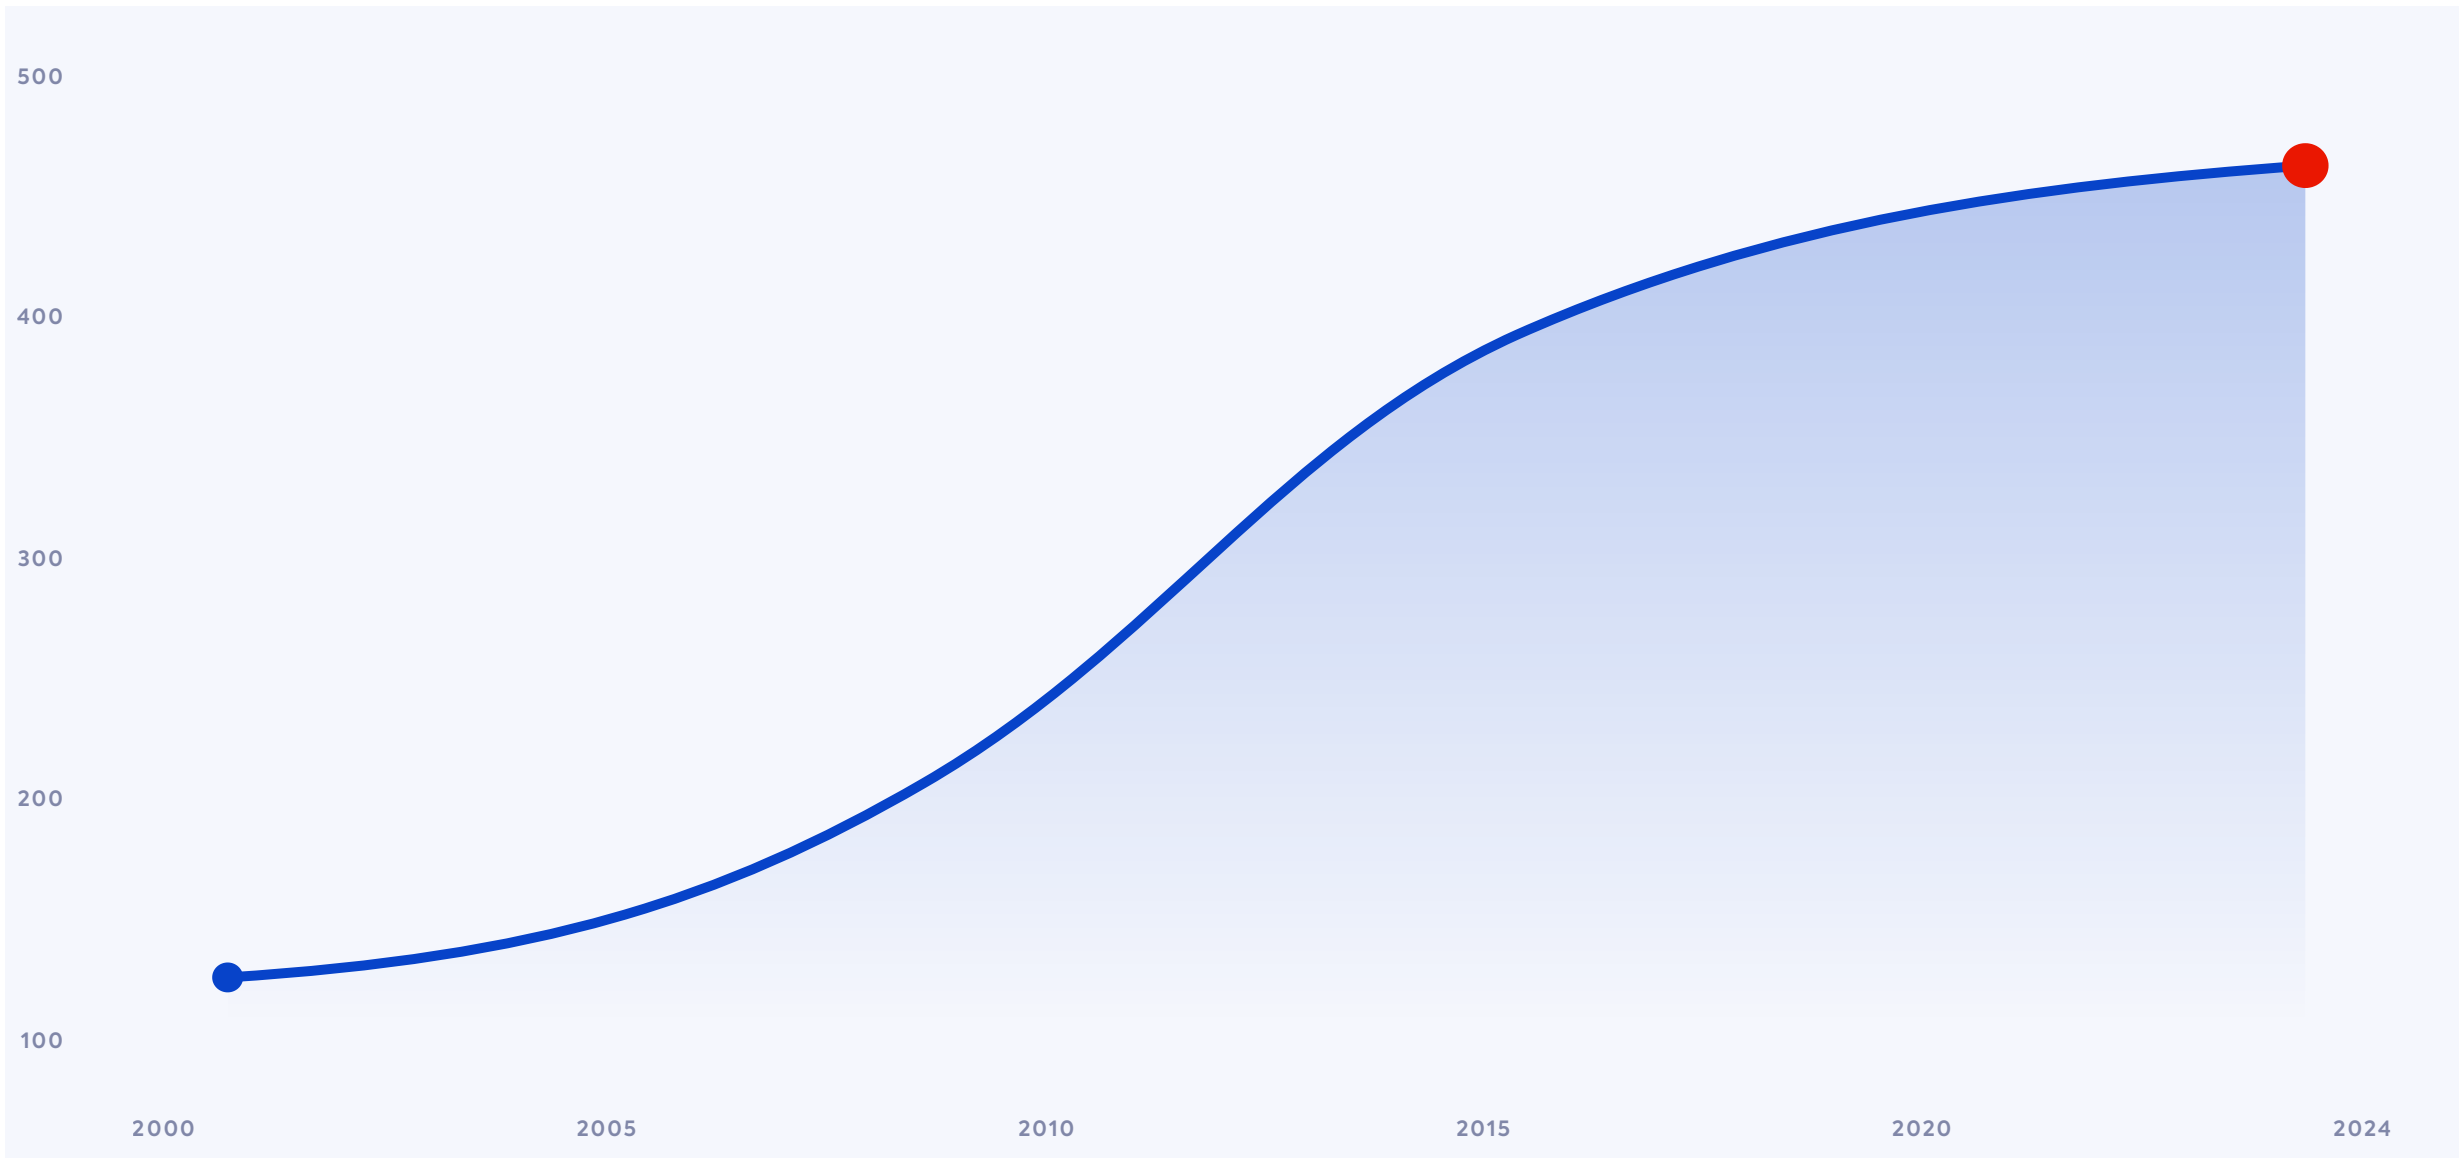

DEMAND MULTIPLE

+346%

GROWTH 2000 TO 2024

MARKET DEMAND . ILLUSTRATIVE INDUSTRY INDEX

ILLUSTRATIVE . BASE 2000 = 100

Illustrative representation of wider market demand, shown for context only. Not a sourced dataset and not ALTIGO performance data.

Target Market

Eight sectors, each with its own traffic pattern, compliance burden and tolerance for downtime. We specify for the building, not for the catalogue.

 Government Buildings

DOSH compliant, dependable systems serving high volumes of daily public users.

 Educational Institutions

Accessible, low noise transport for campuses with concentrated peak hour movement.

 Hotels & Resorts

Quiet, finely finished cabins where ride comfort is part of the guest experience.

 Healthcare Facilities

Bed and stretcher capable lifts with the reliability that clinical operations demand.

 Property Management

Planned maintenance and rapid response that protect asset value and resident goodwill.

 Developers & Builders

Early stage consultation, shaft coordination and on programme installation.

 Malls & Commercial

Escalators and passenger lifts engineered for continuous high traffic duty cycles.

 Residential & Condos

Home lifts and passenger systems for towers, gated developments and private homes.

03

Products & Services

Five product families and one service model that runs from the first site meeting to the twentieth year of operation.

+ 01 . RANGE

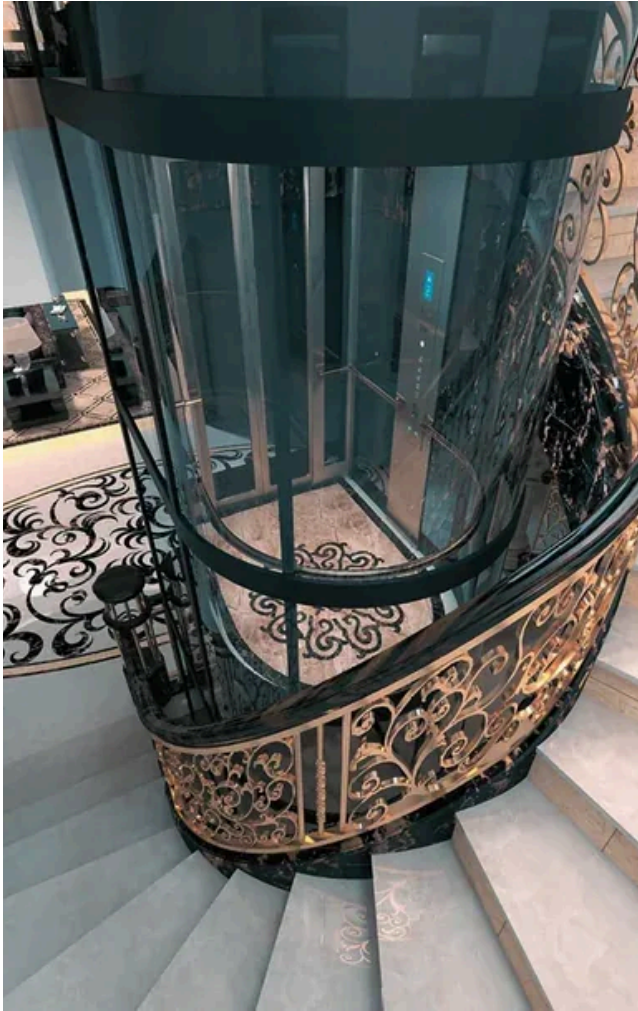

Our Products

Five product families covering every vertical movement requirement in a modern building, from a private residence to a public terminal. Passenger systems are built on the EU type examined TIGO-R platform.

 Passenger Elevators

Safe, smooth and efficient vertical transport for residential, commercial and public buildings.

 Home Lifts

Crafted for private homes and smaller structures, convenience blended with luxury.

 Escalators

Engineered for high traffic environments, moving large groups smoothly and reliably.

 Automated Parking

Optimise space, improve vehicle accessibility and boost parking efficiency.

 Cargo Lifts

Robust freight solutions for moving heavy goods safely between floors.

Vertical Transport for People

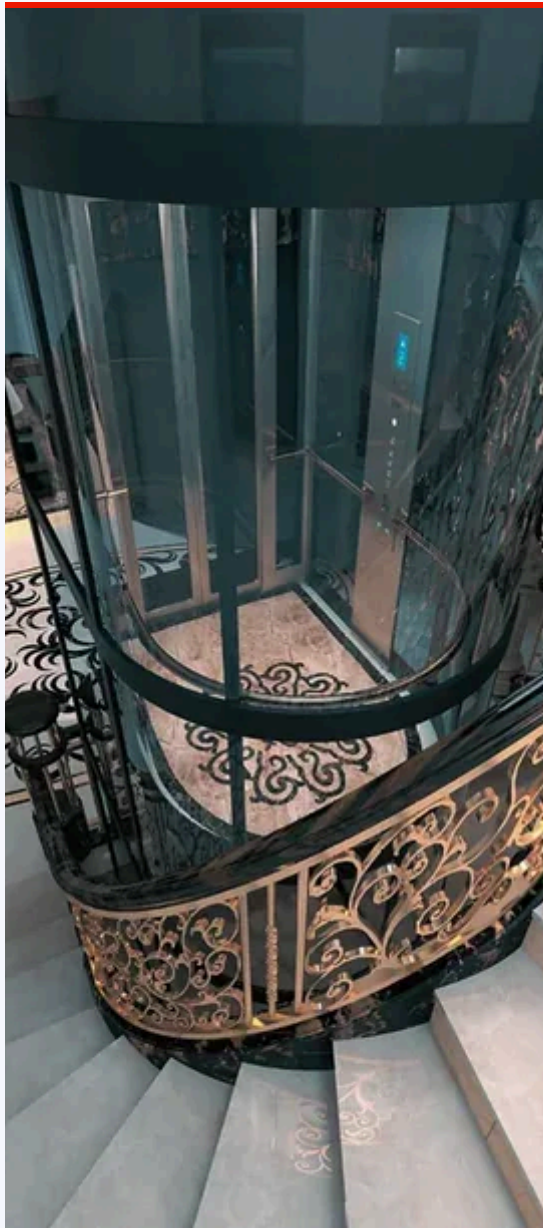

Passenger and home systems, where ride quality, finish and quiet operation are judged every day by the people who use them.

Passenger Elevators

Safe, smooth and efficient vertical transport for residential, commercial and public buildings. Specified around the building's traffic profile rather than a fixed catalogue, with cabin finishes selected to sit inside the architecture.

- Machine room and machine room less configurations
- Traction drive with 2:1 suspension
- Rated load 450 to 2000 kg
- Cabin finishes selected with the design team

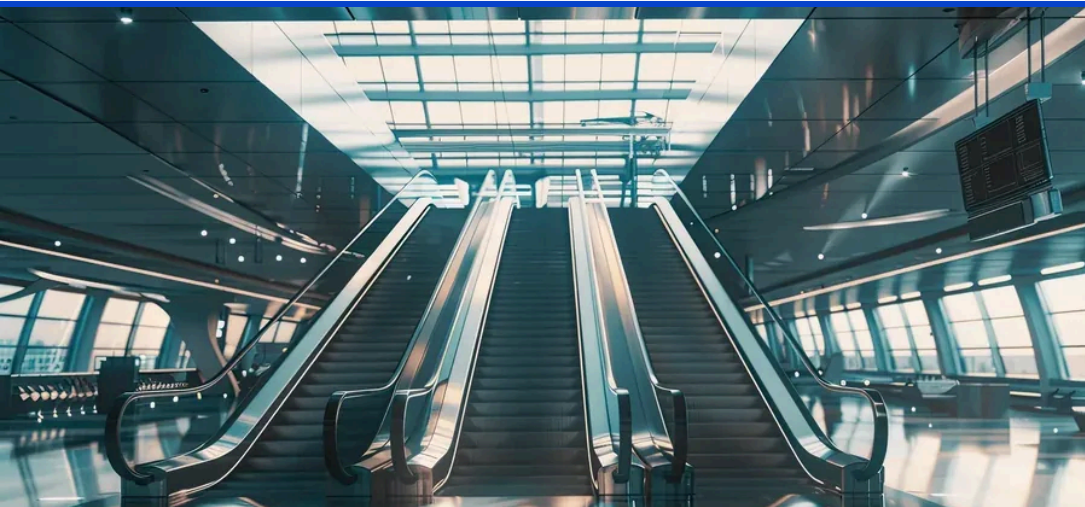

Home Lifts

Crafted for private homes and smaller structures, convenience blended with luxury. Compact shafts and quiet drives allow a lift to be added to an existing residence with minimal structural disruption.

- Compact footprint for existing homes
- Quiet operation for living spaces
- Glass and panoramic cabin options
- Accessibility for multi generation households

Movement at Volume

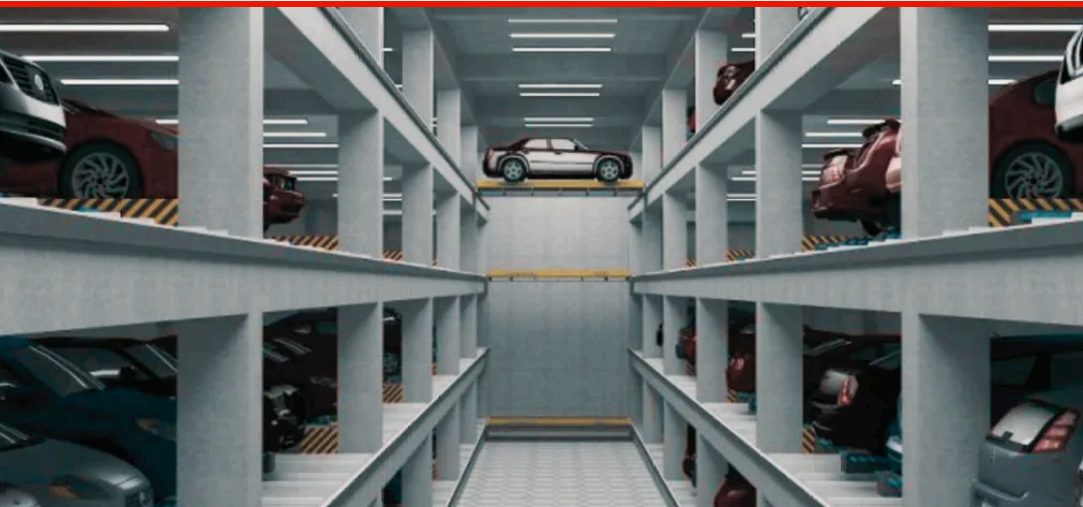

High duty systems for crowds, vehicles and freight, where continuous operation and load capacity decide the specification.

Escalators

Engineered for high traffic environments, moving large groups smoothly and reliably through malls, terminals and public buildings.

- Continuous duty drive systems
- Indoor and semi outdoor configurations
- Safety braking and comb plate protection

Automated Parking

Optimise space, improve vehicle accessibility and boost parking efficiency on constrained urban sites.

- Stacked and tower configurations
- Higher yield from the same footprint
- Controlled vehicle handling

Cargo Lifts

Robust freight solutions for moving heavy goods safely between floors in warehouses, factories and back of house areas.

- Heavy load platforms
- Industrial grade finishes
- Loading protection and interlocks

Service Scope

Four services, one accountable team. Most clients begin with one and stay with us for the rest of the building's life.

Consultation & Design

We meet the design and building team early to match the system to the building's traffic, shaft, energy targets and architecture, before drawings are frozen.

- Traffic analysis
- Shaft coordination
- Specification support

BEFORE CONSTRUCTION

Supply & Installation

Certified systems manufactured by Stade, installed by our own certified technicians in full DOSH compliance, then tested and commissioned before handover.

- Certified supply
- Site installation
- Testing and handover

ON PROGRAMME

Preventive Maintenance

Structured schedules, planned parts replacement and rapid response, so building managers are told about a problem before residents are.

- Scheduled visits
- Condition reporting
- Rapid call out

CONTINUOUS COVER

Modernisation & Upgrades

System upgrades that extend operational life, improve energy efficiency and safety ratings, and bring an ageing lift back to a current standard.

- Drive and control upgrade
- Cabin refurbishment
- Safety gear renewal

ASSET RENEWAL

Maintenance Programme

Scheduled Inspection

Planned visits on a fixed cycle, with mechanical, electrical and safety gear checked against a written schedule rather than by memory.

Condition Reporting

Findings written up after every visit, so building owners see the state of the asset and can budget replacement rather than absorb a surprise.

Planned Parts Replacement

Wear components changed on schedule, before failure.
Genuine parts sourced through our Stade partnership.

Rapid Response

Three operating bases keep an engineer within reach when a call comes in, with entrapment calls treated as the first priority.

Prevention is better than repair. Our maintenance philosophy keeps systems running and downtime near zero.

OUTCOME FOR THE BUILDING OWNER

Downtime designed out, not managed after the fact

A lift that stops without warning costs far more than the part that failed. It costs tenant goodwill, it costs the building manager a day, and in a high rise it costs accessibility for the people who need it most.

98%

CLIENT SATISFACTION

03

RESPONSE BASES

25

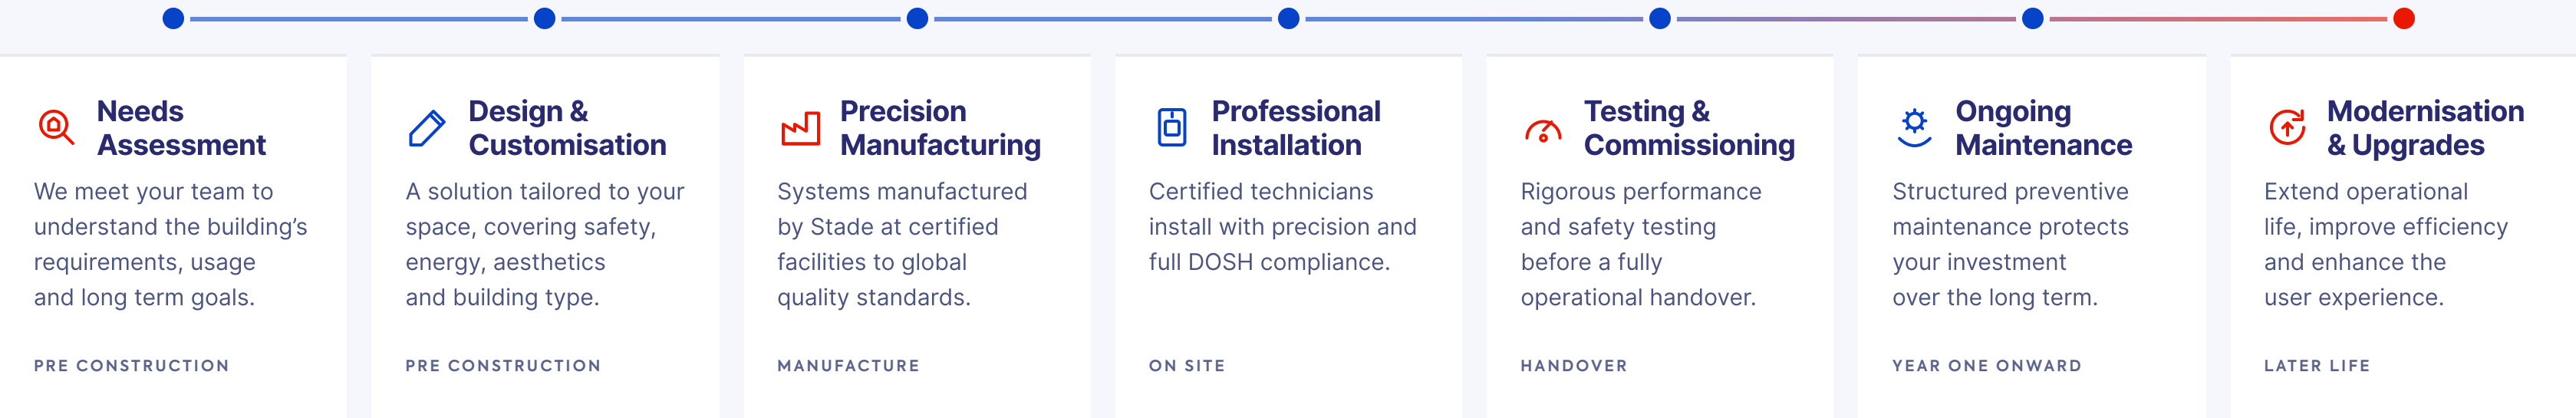

YEARS OF SERVICE DATA

DOSH

COMPLIANCE STANDARD

Product Journey

Seven stages from the first site meeting to the twentieth year of operation, each one owned by the same team.

THE RESULT

A system that still performs in year twenty

One partner, one standard, from specification through to renewal, with the same team accountable at stage one and at stage seven.

Client Testimonials

The clearest measure of our work is what the people responsible for these buildings say once the contract is running.

What Our Clients Say

98%
CLIENT SATISFACTION

200+
PROJECTS DELIVERED

“

Very pleased with the result from ALTIGO. Their attention to troubleshooting in great detail and quality service made a big difference.

Mr. James
COO OF PICCA

“

Professional team and excellent customer service. Our elevators were properly maintained and performance improved tremendously.

Mr. Kevin Neoh
CHAIRMAN, SHANG VILLA APARTMENT

“

ALTIGO was efficient, committed and delivered great results. We are extremely satisfied and will continue using them again.

Mr. Ong
GENERAL MANAGER, FLAMINGO HOTEL PENANG

“

ALTIGO was efficient, reliable and delivered great results. Extremely satisfied with their service and we will definitely use them again.

Mr. Siew
CONTRACT EXECUTIVE, CITRA EMBUN

“

Great experience working with ALTIGO. Very responsive, ensuring all lifts are in tip top condition and safe for public use.

Mr. Andrew Teh
MANAGER, KOMPLEK ADORNA GOLD

WHY IT MATTERS

Retention, not acquisition, is how a maintenance business is judged.

Every reference on this page is a client who chose to stay after the first contract ended.

Our Activities

How we keep our engineers current, our clients informed and our safety practice under constant review.

01 Our Activities

Our Activities

Six programmes that keep our capability, our compliance and our community commitments moving forward together.

Technical Training & Development

Engineers undergo structured training locally and through Stade's international programmes.

Industry Conferences & Exhibitions

We participate in vertical transportation events across Southeast Asia.

Client Engagement & Education

Consultation sessions and technical seminars help clients make informed decisions.

Safety Campaigns & Reviews

Regular safety workshops and on site assessments keep teams aligned with DOSH standards.

Corporate Social Responsibility

Environmental initiatives, educational support and sustainability focused practices.

Employee Wellbeing

Health programmes, team development and a culture where excellence and wellbeing meet.

Achievements & Certifications

The record we have built and the independent approvals that stand behind it.

+ 01 . RECORD

Our Track Record

Since 2001, ALTIGO has earned the trust of property developers, facility managers and building owners across Malaysia, not through promises, but through consistent delivery and a zero compromise approach to quality and safety.

Figures reflect ALTIGO's internal project and service records to 2026.

200+

PROJECTS DELIVERED

Nationwide installations across residential, commercial and public buildings.

98%

CLIENT SATISFACTION

A satisfaction rate reflecting strong long term relationships and repeat contracts.

DOSH

CERTIFIED AND COMPLIANT

Qualified supplier, installer and maintenance provider under Malaysian regulation.

25

YEARS OF LEADERSHIP

Continuous industry leadership in vertical transportation since 2001.

Our Achievements

Six areas where independent recognition, technical capability and service discipline reinforce one another.

Certified by DOSH

Approved by Malaysia's Department of Occupational Safety and Health to the strictest safety benchmarks.

Global Partnership

Globally certified Stade technology, backed by local knowledge and service depth.

Modernisation Projects

System upgrades improving energy efficiency, safety ratings and operational performance.

Industry Recognition

Recognised for technical service, safety leadership and client satisfaction.

Preventive Maintenance

Structured schedules and rapid response that eliminate surprises and downtime.

Skilled Technical Team

Engineers trained locally and internationally, continuously upskilled.

Safety & Compliance

Safety is not a department at ALTIGO. It is the constraint every other decision is designed around.

DOSH Registration and Inspection

Every installation is registered and inspected under Malaysia's Department of Occupational Safety and Health, and we hold the certification required to supply, install and maintain.

European Design Standards

Our supplied passenger lift platform conforms to EN 81-20:2020 and EN 81-50:2020, examined under the European Lift Directive 2014/33/EU.

Certified Installation Teams

Installation and servicing are carried out by our own certified technicians, not subcontracted labour, so responsibility never moves off our team.

Documented Testing and Handover

Performance and safety testing is completed and recorded before a system is handed over as fully operational.

STANDING COMMITMENT

Upholding every safety regulation remains our highest priority

Regular safety workshops and on site assessments keep our teams aligned with DOSH standards, and every system we design and install is held to the strictest safety benchmarks.

• DOSH CERTIFIED

• EN 81-20:2020

• EN 81-50:2020

• DIRECTIVE 2014/33/EU

Certified to the European Lift Directive 2014/33/EU

The TIGO-R passenger lift platform supplied by ALTIGO has undergone EU Type Examination by EUROCERT S.A., an accredited European Notified Body (No. 1128), certified to the latest EN 81-20 and EN 81-50 safety standards.

Independently Examined

Assessed by a third party notified body, not a self declaration of conformity.

Module B Approval

Full EU Type Examination under Directive 2014/33/EU, Annex IV.

Latest EN 81 Standards

Conforms to EN 81-20:2020 and EN 81-50:2020 for passenger lifts.

CE Conformity Pathway

Establishes the basis for CE marking upon final inspection and installation.

ISSUING BODY

EUROCERT S.A. · Notified Body No. 1128

EU Type Examination Certificate for traction drive passenger lift, issued under the European Lift Directive 2014/33/EU.

Certified Performance Range

The examined operating envelope of the TIGO-R traction drive passenger lift platform, as certified under the European Lift Directive.

WHAT THE ENVELOPE MEANS

One certified platform covers a residence and a high rise tower

A range from 450 kg to 2000 kg and travel to 200 m means the same examined platform can be specified for a private home lift or a tower serving fifty floors, without changing supplier or standard.

Figures are taken from the EU Type Examination Certificate for the TIGO-R platform. Final specification for any project is confirmed at design stage.
